

Summer Science Saturday!

Science is Our Middle Name.

Looking for a **fun, free, educational, science-based** learning activity to enjoy with your middle-schooler? Want to introduce your elementary student to some amazing science or just refresh your own knowledge for use around the water cooler? Join the DSP for Science Saturday June 20th! UT Tyler biology students will host four brief presentations, many with hands-on activities, in our DSP Theater. Museum admission is not required for attendance to Science Saturday sessions alone. A certificate of attendance will be available for students whose science teachers offer extra credit!

June 20, 2015

10:30- Cells: Plants, Animals, and Bacteria - Oh My!

11:00- The Big Four: Sugar, Protein, Fat, and Nucleic Acid (the macromolecules)

11:30- Why do I like sugar so much? The story about how you get your energy.

12:00- Stem Cells: Could cells be used to make me feel better?
