Earn 3 hours of Biology Credit by Visiting Health Centers and Archaeological Sites of Turkey
Spring Break: March 4-13, 2016

University of Texas at Tyler (UTT) will offer Biol 4395-001: Turkish Culture and Medicine, during the Spring of 2016. This Special topic in Turkish culture and medicine will explore the interplay between culture, religion, socioeconomics and medicine. We will tour the historic sites as the origin of local culture and religion, evaluate Turkish socioeconomics, and discuss the influence of these factors on health care delivery systems and practice of medicine.

Who Benefits from this Course? Senior students of Biology, Pre-med/Pre-Dental/Pharm, Nursing, Psychology, and Health and Kinesiology; Allied Health Professionals will benefit from this course. Any community member, student, or faculty member may enroll for this project without getting any course credit. All age groups are welcome to join this tour.

Package Includes: Accommodations, Two Meals a Day per itinerary, Entrance Fees, Land Transportation within Turkey and Hotel Transfers, Administration Fees and Orientation costs.
Cost for the Ten Day Tour: $1590 for the land portion plus the international and domestic airfares.

A deposit of $590 is required before Friday, December 1, 2015. A full payment is due by January 1, 2016. Enrollment after January 4th will be based on the space availability and on a first come first serve basis. Travelers are welcome to join the tour the last minute, as long as we have space and we are able to make arrangements after the deadline.

Students will earn three hours of credit if they enroll at UTT for BIO 4395
Project Director: Dr. Ali Azghani, Professor of Biology
