COURSE DESCRIPTION: This course is an introduction to drawing; students will become familiar with materials, general techniques, and methods applied to drawing. Students will develop skills of seeing, examining, isolating sight, interpreting and exploring mark-making through the use of both dry and fluid drawing mediums. In this course students will also acquire an introduction into concepts and media in contemporary art. Students will also gain a vocabulary to participate in art critiques and conversations that will be an essential part of their grade.

COURSE EXPECTATIONS: Drawing courses are oriented towards two main goals: the rational acquisition of knowledge and self-expression. While we will primarily focus on the technical and fundamentals of making 2-dimensional images, the underlying goal is to develop an artistic value system.

The first part of our goal is up to the instructor to present the nuts and bolts of drawing. The second part is up to the student to approach this course wholeheartedly, searching for that which can help the student develop as a person as well as an artist, giving it 100%, only then will the student succeed in making successful drawings.

The professor will define specific technical and formal assignments, and students will present completed works during regularly scheduled critiques. Participation in critiques, showing completed works on time, and active discussion is expected of every student.

Students may expect to spend at least 5-6 hours per week working in the studio and drawing outside of class time.
