Preferred Contact Method:	Canvas Discussion Board for non-personal issues alegate@uttyler.edu for personal issues

Credit Hours

3 semester hours

Course Description

This course covers an advanced set of quantitative statistical analyses that are key to creating new knowledge in human resource development. Students will learn how to interpret, conduct, and report select quantitative statistical techniques that answer research questions or hypotheses that involve multiple dependent variables.

Course Philosophy

Learning quantitative statistical analyses is similar to learning a new language. There are often words that are hard to pronounce, difficult to remember, and may have similar meanings. However, by continually practicing the new language through observation, reading, and writing, learners have the opportunity to pick up the language quickly and sound like a native speaker. Therefore, this course has weekly assignments that culminate around five scheduled class meetings to give learners the opportunity to regularly practice the new language of quantitative statistical analyses. Learners will be expected to work individually and in teams to facilitate both individual and peer learning. To facilitate a safe learning environment, learners will have opportunities to build from their mistakes as they practice the new language through a variety of means.

Grading Philosophy

I understand that the process of receiving grades can inhibit the learning process. I endeavor to create a safe learning environment. As part of that environment, you have several opportunities to maintain a high grade in the course, including:

- Two attempts at each module quiz, where you receive the highest grade of the attempts made
- Opportunity to resubmit attempted module assignments with the exception of the draft final paper
- Bonus points opportunity for each module
- Opportunity to submit a draft version of your final paper
- Feedback provided on assignments turned in late
- End of semester provisions to replace grades assigned 0 because work was not turned in or late

It is possible to get to the end of the semester with a very high grade that can be drastically reduced based

HRD 6355 – Multivariate Statistics Course Syllabus (Rev A)

on your performance on the final project. The idea is that by the end of the semester, you should have the requisite knowledge and skills to perform at a higher level than when you were first learning the material. Therefore, the grading of the final project is less lenient than the grading of the module assignments.

Course Design

The course was designed according to the 4MAT method. According to Bernice McCarthy, developer of the 4MAT system, there are four major learning styles, each of which asks different questions and displays different strengths during the learning process. The course has 9 learning modules, each with four sections except for the last modules that contain three sections. Learning modules begin with a “getting started” activity to answer *why*. To answer *what*, learners will read a chapter from the required text and/or published articles and test their knowledge over the required reading via quizzes. To answer *how*, learners will complete the necessary steps to conduct, interpret, and/or report on a particular statistical analysis. To answer *if*, learners will be asked to conduct peer reviews and provide constructive feedback on module activities.

Course Objectives

At the conclusion of the course, learners will be able to:

1. Critically evaluate the psychometric properties of data from published instrumentation.
2. Select appropriate instrumentation to test HRD related models.
3. Collect, clean, and analyze multivariate data.
4. Conduct, interpret, and write-up the results of reliability analysis, exploratory factor analysis, multivariate analysis of variance, descriptive discriminant analyses, canonical correlation analysis, repeated measures analysis of variance, and predictive discriminant analysis.
5. Compare and contrast univariate statistical analyses to relevant multivariate statistical analyses.
6. Effectively communicate the results of multivariate analyses for human resource development scholars and practitioners using text and graphics.

Required Software

- IBM® SPSS® Statistics Standard GradPack 29 or higher (remote access at one.utttyler.edu; 6 and 12 month licenses available at <http://www.onthehub.com/spss/>)
- R (v. 4.3.2 or later) (Available for free at <http://cran.rstudio.com/>)

HRD 6355 – Multivariate Statistics Course Syllabus (Rev A)

Required Texts

- American Psychological Association. (2020). *Publication manual of the American Psychological Association* (7th ed.). Author.
- Field, A. (2018). *Discovering Statistics Using IBM SPSS* (5th ed.). Sage.
- Field, Miles, & Field (2012). *Discovering Statistics Using R*. Sage.

Course Syllabus (Rev A)**

Course Schedule

Week	Module	Getting Started ^a	Quiz	Assignment	Peer Review ^b
1	Class Meeting 1 (1/17)				
2	Introduction to Multivariate Statistics	1 (1/25)	10 (1/25)	10 (1/25)	1 (2/1)
3	Validity of Data Reliability of Data	1 (2/1)	10 (2/1)	10 (2/1)	1 (2/8)
4	Class Meeting 2 (2/7)				
5	AHRD Conference (2/11~2/13)				
6	Survey Development	1 (2/22)	10 (2/22)	10 (2/22)	1 (3/1)
7	Survey Deployment	1 (3/1)	10 (3/1)	10 (3/1)	1 (3/8)
8	Class Meeting 3 (3/7)				
9	Spring Break (3/9-3/13)				
10	Construct Validity	1 (3/22)	10 (3/22)	10 (3/22)	1 (3/29)
11	Class Meeting 4 (3/28)				
12	Multivariate Analysis of Variance Descriptive Discriminant Analysis Canonical Correlation	1 (4/5)	10 (4/5)	10 (4/5)	1 (4/12)
13	Final Project Draft			10 (4/12)	1 (4/19)
14	Repeated Measures Analysis of Variance	1 (4/19)	10 (4/19)	10 (4/19)	1 (4/26)
15	Class Meeting 5 (4/25) Final Project			70 (4/25) 170 (4/28)	
16	Predictive Discriminant Analysis	1 (5/2)	10 (5/2)	10 (5/2)	
	Total	8 bonus	80	330	8 bonus

Note. Course schedule may be adapted during the semester to meet learner needs. Bolded numbers indicate maximum possible point value. Work due on Sundays will not be counted late if submitted within 24 hours of due date/time. ^aParticipation in *getting started* is worth 1 bonus point if substantive post and substantive reply is posted by the due date. ^bParticipation in *peer review* is worth 1 bonus point if post of student's own work and review of peer's work is posted by due date. Bonus points are only awarded if all other module work (e.g., quiz, assignments) has been completed and/or submitted and is not late.

Course Evaluation

Component	Points
Module Quizzes	80 (8 @ 10 points each)
Module Assignments	80 (8 @ 10 points each)
Final Project	250 points
• Draft Paper	• 10 points
• Presentation	• 20 points
• Oral Exam	• 50 points
• Final Paper	• 170 points
Total	410

A = 90% – 100% B = 80% – 89% C = 70% – 79% D = 60% – 69% F = < 60%

HRD 6355 – Multivariate Statistics Course Syllabus (Rev A)

Course Policies:

Assignment Resubmission

Assignments that receive less than 70% may be resubmitted and reevaluated pending the following conditions: (a) Original submission was not assigned a grade of 0. (b) Resubmissions are submitted within one week of the date that the original grade was assigned. (c) Resubmission includes all files identified on assignment directions. (d) Resubmissions clearly indicate what has changed since the original submission (e.g., tracked changes in MS Word). (e) Resubmission includes a separate file that provides the graded rubric as well as an additional column that indicates how the assignment was changed based on the feedback provided. Resubmitted assignments may only receive a maximum of 70% credit.

Class Meeting Attendance

Attending all class sessions demonstrates the learner's personal commitment to learning. Therefore, physical attendance is expected for the accomplishment of course objectives. Excused absences for religious holy days or active military services are permitted according to the policies outlined in the UT Tyler Graduate Handbook. One unexcused absence may result in a final grade reduced by one letter grade. Two or more unexcused absences from class will likely result in a grade of Incomplete (I) requiring the student to retake the course.

Late Work

No credit will be given for late assignments unless the learner's provider and/or UT Tyler's system prevents the student from submitting a discussion post, assignment, or quiz. The student is responsible for contacting the instructor, providing evidence of the outage and submitting any missed work within 24 hours of resolution of any system outage. **Students may request to take a comprehensive exam to replace grades of 0 for quizzes and/or to use their final project draft grade to replace grades of 0 for assignments, other than peer reviews and getting started activities, up to 70%. Such requests must be made by the Thursday of the 15th week of class.**

Academic Dishonesty Statement

The faculty expects from its students a high level of responsibility and academic honesty. Because the value of an academic degree depends upon the absolute integrity of the work done by the student for that degree, it is imperative that a student demonstrates a high standard of individual honor in his or her scholastic work.

Scholastic dishonesty includes, but is not limited to, statements, acts or omissions related to applications for enrollment of the award of a degree, and/or the submission, as one's own work of material that is not one's own. As a general rule, scholastic dishonesty involves one of the following acts: cheating, plagiarism, collusion and/or falsifying academic records. Students suspected of academic dishonesty are subject to disciplinary proceedings.

University regulations require the instructor to report all suspected cases of academic dishonesty to the Dean of Students for disciplinary action. In the event disciplinary measures are imposed on the student, it becomes part of the students' official school records. Also, please note that the handbook obligates you to report all observed cases of academic dishonesty to the instructor.

Plagiarism will not be tolerated and learners should be aware that all written course assignments will be checked by Plagiarism detection software. Violations of academic integrity will be reported and processed according to the guidelines established by the University.

HRD 6355 – Multivariate Statistics Course Syllabus (Rev A)

Student Standards of Academic Conduct

Disciplinary proceedings may be initiated against any student who engages in scholastic dishonesty, including, but not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts.

- i. “Cheating” includes, but is not limited to:
 - copying from another student’s test paper;
 - using, during a test, materials not authorized by the person giving the test;
 - failure to comply with instructions given by the person administering the test;
 - possession during a test of materials which are not authorized by the person giving the test, such as class notes or specifically designed “crib notes”. The presence of textbooks constitutes a violation if they have been specifically prohibited by the person administering the test;
 - using, buying, stealing, transporting, or soliciting in whole or part the contents of an unadministered test, test key, homework solution, or computer program;
 - collaborating with or seeking aid from another student during a test or other assignment without authority;
 - discussing the contents of an examination with another student who will take the examination;
 - divulging the contents of an examination, for the purpose of preserving questions for use by another, when the instructors has designated that the examination is not to be removed from the examination room or not to be returned or to be kept by the student;
 - substituting for another person, or permitting another person to substitute for oneself to take a course, a test, or any course-related assignment;
 - paying or offering money or other valuable thing to, or coercing another person to obtain an unadministered test, test key, homework solution, or computer program or information about an unadministered test, test key, home solution or computer program;
 - falsifying research data, laboratory reports, and/or other academic work offered for credit;
 - taking, keeping, misplacing, or damaging the property of The University of Texas at Tyler, or of another, if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct; and
 - misrepresenting facts, including providing false grades or resumes, for the purpose of obtaining an academic or financial benefit or injuring another student academically or financially.
- ii. “Plagiarism” includes, but is not limited to, the appropriation, buying, receiving as a gift, or obtaining by any means another’s work and the submission of it as one’s own academic work offered for credit.
- iii. “Collusion” includes, but is not limited to, the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any section of the rules on scholastic dishonesty.
- iv. All written work that is submitted will be subject to review by plagiarism software.

Soules College of Business Statement of Ethics

The ethical problems facing local, national, and global business communities are an ever-increasing challenge. It is essential that the Soules College of Business helps students prepare for lives of personal integrity, responsible citizenship, and public service. In order to accomplish these goals, both students and faculty of the Soules College of Business at The University of Texas at Tyler will:

- Ensure honesty in all behavior, never cheating or knowingly giving false information.
- Create an atmosphere of mutual respect for all students and faculty regardless of race, creed, gender, age, or religion.
- Develop an environment conducive to learning.

**HRD 6355 – Multivariate Statistics
Course Syllabus (Rev A)**

- Encourage and support student organizations and activities.
- Protect property and personal information from theft, damage, and misuse.
- Conduct yourself in a professional manner both on and off campus.

University Policies and Information
