

Participants Needed For Research Study

The Childhood Trauma Research Network (CTRN) is seeking research participants for a two-year study to understand trauma in children and adolescents.

You may be able to participate if you:

- Are between the ages of 8-20.
- Have a history of traumatic life events.
- Are able to dedicate time to six virtual study assessments over two years.
- Speak English/Spanish.

You may contact us for more information:
