

About TX-YDSRN

Almost half a million Texas youth were affected by depression in 2024¹. The Texas Youth Depression & Suicide Research Network (TX-YDSRN) established a state-wide research network, to address youth depression and suicide.

1. Mental Health America (2024)

This study seeks to improve youth depression & suicide by:

- Improving tools for early detection
- Implementing evidence-based treatment
- Examining factors that improve or worsen symptoms
