RESEARCH CURRENTLY IN PROGRESS

Sun, Grace H, Shen, Chwan-Li, St. John, Julie, Punyanunt, Lee, Peng, Hyde, *Assessing NPs attitudes and use of CAM practices for Pain management*, (On-Going)
Pilot study (quantitative and qualitative) of NPs in the Lubbock/West Texas area and their attitudes and use of CAM in Pain Management. We hope this pilot study will help validate our questionnaire to expand the study to the state level. We also hope to utilize findings to help develop educational interventions/tools to help direct NPs attitudes/use of CAM for pain management. *Manuscript in writing.*

Movie

"A Change of Heart: An Interprofessional Mini-Series". (June 2015)
This is a 12 episode, knowledge-based, video series developed to educate both preceptors and students regarding their participation in experiential rotations in an Interprofessional setting. Each individual video episode is 5-10 minutes in length and builds upon the next. The series follows multiple health professional preceptors including nurses, pharmacists, physicians, speech-language-pathologists, occupational therapists, and physical therapists as they precept their students in both a hospital and extended care setting. Through a combination of inappropriate and quality Interprofessional interactions, attendees will learn key principles regarding orientation, feedback, teamwork, and dealing with difficult preceptors or students. At moments throughout each episode, two preceptor and two student experts provide humorous interactions and share insight on how they would deal with each learning situation. Each individual episode ends with two important preceptor and two student pearls.

Nurse Educator Video. (July 17, 2019)
>Since the implementation of the DNP degree, there has been inconsistency about the DNP scholarly project. Many issues related to the DNP project can be addressed using a logic model approach and incorporating current best practices. This video and article explain how a logic model can be used for the development or improvement of DNP project processes, incorporating best practices and evaluation methods to ensure quality and rigor.
