

7.6 Bloodborne Pathogens

(Reviewed 11/3/2023)

All students utilizing the School of Nursing (SON) Skills Labs must complete bloodborne pathogen (BBP) training offered by the UT Tyler Environmental Health & Safety (EH & S) Department.

Each semester the names of students enrolled in courses utilizing the skills labs will be submitted to EH & S, who will monitor compliance with the training.

UT Tyler's exposure control plan for BBP is located on the website below.
