Tyler, TX 75799

Dear Dr. Lee,

It is my pleasure to express my interest in the Clinical Assistant Professor position at the University of Texas (UT) at Tyler Ben and Maytee Fisch College of Pharmacy. With an ACPE-accredited Doctor of Pharmacy program, the UT Tyler Fisch College of Pharmacy demonstrates a strong dedication to the development of future pharmacist professionals by providing a collaborative curriculum via the Team-Based Learning (TBL) format. I have been fortunate to speak to an alumnus as well as a former faculty member – namely, Alanna Kologey, PharmD, and Elizabeth Yett, PharmD, BCACP, TTS – and both have raved about their experiences at UT Tyler Fisch College of Pharmacy.

My passion for pharmacy education originated during my time serving as a tutor at the University of Tennessee Health Science Center (UTHSC) College of Pharmacy. Following graduation, I pursued this passion by seeking out residency programs with a strong academic component, which led me to the PGY1/PGY2 Pharmacotherapy program at the University of Tennessee Medical Center (UTMC). During this time, I gathered a diverse array of experiences in inpatient and outpatient clinical settings, and I also had many opportunities to provide education to student pharmacists in both didactic and experiential settings. These invaluable experiences have provided me with a unique perspective, making me confident when teaching a wide variety of therapeutic topics to diverse audiences, including student pharmacists, practicing pharmacists, nurses, physicians, and more.

Following completion of my residency this past June, I have continued to seek out opportunities to educate within the pharmacy profession. Outside of my current role as the evening cardiology clinical pharmacist at UTMC, I provide ACPE-accredited continuing education content via the UTHSC Fall Therapeutics webinar. I also serve within the UTHSC College of Pharmacy as a teacher for Applied Therapeutics, an active learning course in which I facilitate group discussions on clinical patient cases. During these weekly sessions, I cherish the opportunity to guide students as they develop their clinical decision-making skills.

With a desire to serve as a faculty member with continued clinical practice, I am confident that this position would align with my career goals. As a clinical pharmacist at UTMC, I understand the demands and privilege of working at a Level 1 Trauma Center and Comprehensive Stroke Center, and I trust that these experiences would equip me with the tools necessary to excel as a clinical pharmacist at UT Health Tyler. Additionally, with my experience teaching in many different formats, I am confident in my ability to bring real-world examples from clinical practice to the classroom via TBL. In addition to providing education to student pharmacists, I also seek opportunities to educate other professions, and – after discussing with Dr. Yett the plethora of opportunities for interprofessional education within the UT Tyler system – I am assured that this position would allow me to continue educating a wide array of audiences and bridge the gap between pharmacy and other healthcare professions.

Based on the information I have gathered regarding this position, I believe I would make an excellent fit. I appreciate your time and thank you for considering my application.

With gratitude,
