Discover the **Graduate School** *at* **UT Tyler**

The Graduate School is a dynamic community of scholars and problem-solvers, spanning the fields of art, science, business, education, psychology, engineering and the health professions. With the only academic medical center and medical school in East Texas and campuses in Tyler, Longview, Palestine and Houston, we provide students with access to nationally recognized faculty members, state-of-the-art labs and hands-on learning opportunities.

SUCCESS IS WITHIN REACH

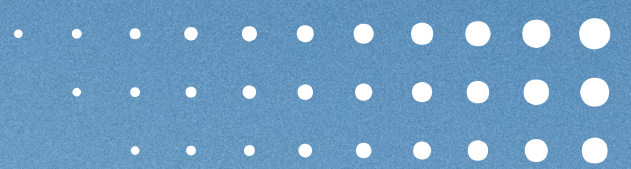

Your path to higher education is unique. That's why we design our graduate programs with working adults in mind, offering affordable evening, online and hybrid options you can tailor to your unique goals.

“The faculty have real-world experience and go above and beyond to help their students. Be sure to seek their guidance on internships or job opportunities!”

VICTOR VALLE
BBA FINANCE, 2015
MBA, 2017

After earning a bachelor's in finance and an MBA, Victor Valle planned to use his finance degree to further his banking career. But, the relationships he forged with professors led to an internship with the Tyler Economic Development Council.

This unexpected opportunity transformed his career trajectory, shaped him professionally and ultimately led him to the field of economic development. Currently, he serves as the economic development senior project manager with Oncor Electric Delivery and previously served as senior vice president of the Tyler Economic Development Council where his efforts contributed 5,000 new jobs and \$840 million in investments in Tyler.

His advice to current students — slow down, enjoy being a part of such a great institution and get to know your professors.

Discover **OUR PROGRAMS**

Equip yourself with the expertise for advanced leadership positions through rigorous coursework, scholarship and research opportunities and specialization in advanced skills. Whatever your goals may be, our extensive list of master's, doctoral and certificate programs can help you get there.

BEN & MAYTEE FISCH COLLEGE OF PHARMACY

Pharmacy PharmD

Our PharmD program is at the forefront of pharmacy education, teaching future pharmacists the solutions-oriented skills used daily in the healthcare field — preparing them to become a valuable asset to any healthcare team and deliver compassionate and effective patient care.

SOULES COLLEGE OF BUSINESS

Cybersecurity and Data Analytics MS

Every day, organizations generate enormous volumes of data, which is both their greatest asset and their greatest liability. They need people who can analyze it, find patterns and forecast what's coming, and someone who can defend it against breaches, malware and phishing.

Our program builds both. You'll apply machine learning and statistical methods to turn raw data into predictions and decisions, and design the cybersecurity protocols that keep that data and the systems around it secure.

Students graduate with expertise across data analytics and cybersecurity, two of the fastest-growing career fields in the U.S., and a rare advantage: the ability to do both.
