Southern Baptists of Texas Convention
Architect Consultant: Design, Construction, Development

Massachusetts Institute of Technology (MIT)
Facilities Management Executive

International Facilities Management Association
Certified Facilities Manager

TECHNICAL ANALYTICAL	Project Budget Analysis
-----------------------------	-------------------------

**MARKETING
SKILLS**

Establishing priority absolutes in evaluating the relationship of scope to current construction markets, and then managing the projects within the approved budget.

Project Strategic Planning

After project parameters and goals have been established, analyzing future growth and associated requirements and the impact on context and infrastructure. The result is a dynamic Strategic Plan that allows for change and flexibility for controlled expansion in virtually all contingencies and scenarios.

Executive Management

Establishing priority systems to define value and efficiency while maintaining corporate goals (lean and mean). This requires the vision and definition of future growth potential, and the ability to assemble and direct a team to create and produce accordingly.

November 2021

"The acoustics are the heart and soul of the church. When the architect gets it right, they can enhance the emotional, intellectual, and spiritual impact"

"The Church As Real Estate Developer"

by Buddy Siebenlist, AIA

Religious Product News

April 2009

"...if *extraordinary* is the operative word in this environment, the concept of the church as real estate developer may be more appropriate than it sounds. Consider the opportunities for churches in real estate development."

"Multi-Purpose, Fundamentally"

by Buddy Siebenlist, AIA

Religious Product News

October 2008

"In a single package (multi-purpose buildings) represent the fundamental whole of church building existence, expression, and outreach."

"Church Makeover"

by Tara Beecham

Your Church

July 2007

Interview regarding church building and renovation. "Siebenlist: We believe that church architecture is relevant only when it is done in truth. In other words, the most effective church design is one that truly represents the church body within. Each church is unique, and one of the most effective tools in outreach is a design that communicates the character and purpose of its members."

"Foundations: Mid-Cities Community Church"

by Frances Putman

Religious Product News

October 2005
