

PRACTICUM IV FOR THE AGACNP (NURS 7386)

Term: Fall (Flex 2) 2026

Professor: Dr. Teresa Griffin, DNP, APRN, AGACNP-BC, FNP-C, CNEcl, ACUE

Office: HSC B237 (UT North Campus)

Office Phone: 903-566-7320 (UT Tyler SON) or 903-877-7380 (UT North Campus will forward to my mobile)

Email: tgriffin@uttyler.edu

Office Hours: Virtual on Wednesday 9:00-12:00 AM CST and by appointment

Course Dates: October 19 – December 12, 2026 (SON Flex 2)

-

Co-Faculty:

Dr. Carlton Rojas, DNP, APRN, FNP, ACNP, CCAPP, CNEcl, EMT-P

crojas@uttyler.edu

Office Phone: 972-816-2556 (mobile)

Office Hours: Tuesdays 8:00 – 9:30 PM and Thursdays 9:00-10:30 AM CST and by appointment

Dr. John D. Gonzalez, DNP, APRN, ACNP-BC, ANP-C

johngonzalez@uttyler.edu

Office Phone: 903-566-7320 (UT Tyler SON)

Office Hours: Tuesdays 9:00 AM – 12:00 PM CST and by appointment

Dr. Brandi Holcomb, DNP, APRN, AGACNP-BC, CCAPP

bholcomb@uttyler.edu

Office Phone: 903-312-1121 (mobile)

Office Hours: Tuesdays 6:00 PM – 9:00 PM CST and by appointment

Course Times & Classroom: Hybrid online course

Best way to contact: Do not hesitate to reach out to your faculty for any needs.

First, send an inbox message through the associated Canvas course to your assigned faculty. Follow-up with secondary method if no response within two (2) business days through the following pathway: inbox->email->text->call.

If you do not get a response or resolution from your assigned faculty, then proceed through the following pathway: course lead faculty->program coordinator.

Course Overview

This is the fourth clinical course in which students implement the AGACNP role across healthcare settings. This course builds upon the experiences obtained in NURS 7383, NURS 7384, and NURS 7385. Students continue to serve as a member of the interprofessional team. Clinical experiences focus on the evaluation, diagnosis, and management of adult and geriatric patients experiencing acute, chronic, and critical illness. Students complete 125 hours of precepted clinical experience and are expected to develop and implement evidence-based, patient-centered care plans. Limited seminar time is incorporated in the class to prepare the student for role transition upon graduation.

Prerequisites

NURS 7385

Student Learning Outcomes

Upon successful completion of this course, the student will be able to:

1. Link the role of the AGACNP as an interprofessional team member in managing adults and older adults with acute, chronic, and critical illnesses.
2. Analyze clinical data to guide evidence-based evaluation, diagnosis, and management of chronic, acute, and critical conditions, promoting health, safety, and risk reduction.
3. Integrate findings of comprehensive and focused assessments to support evidence-based, person-centered care plans for adults with acute, chronic, and complex conditions.
4. Illustrate communication and education techniques to support shared decision-making, health promotion, and self-management, tailoring approaches to the individual's health literacy, cognitive status, and life stage.
5. Consider ethical decision-making, professional integrity, and awareness of health policy in the provision of person-centered care.
6. Analyze healthcare technologies, clinical decision support tools, and electronic health records to enhance decision-making, documentation, and coordination of care.

Required Resources

- **Question Bank:** Access to an online question bank through *Advanced Practice Education Associates (APEA)* is required during your first practicum course and will extend for three months following graduation from the AGACNP program. The QBank provides 800 questions focused on acute care conditions and illnesses encountered in adult-gerontology acute care settings and prepares the student for board certification exams. The questions and rationales build knowledge and create a deeper understanding of the acute care illnesses and conditions encountered from late adolescence through older adulthood. Question content aligns with the exam blueprints for AGACNP certification.

- Total Estimated costs of required course materials: \$450.00 one-time access fee for entire duration of the program. Access is purchased in NURS 7383.

Recommended Resources (Optional):

- Publication Manual of the American Psychological Association: The Official Guide to APA Style, 7th ed.; American Psychological Association; ISBN: 978-1433832161; eBook ISBN: 978-1433832154
- Other resources may be suggested throughout the semester.

Special Course Notes:

- **Proctoring Notice:** The exam question banks will utilize a proctoring service for all exams. This will be provided through APEA and is included in the student bundle fee for the exam banks.
- **Artificial Intelligence:** UT Tyler is committed to exploring and using artificial intelligence (AI) tools appropriate for the discipline and task undertaken. We encourage discussing AI tools' ethical, societal, philosophical, and disciplinary implications. All uses of AI should be acknowledged as this aligns with our commitment to honor and integrity, as noted in UT Tyler's Honor Code. Faculty and students must not use protected information, data, or copyrighted materials when using any AI tool. Additionally, users should be aware that AI tools rely on predictive models to generate content that may appear correct but is sometimes shown to be incomplete, inaccurate, taken without attribution from other sources, and/or biased. Consequently, an AI tool should not be considered a substitute for traditional approaches to research. You are ultimately responsible for the quality and content of the information you submit. Misusing AI tools that violate the guidelines specified for this course (see below) is considered a breach of academic integrity. The student will be subject to disciplinary actions as outlined in UT Tyler's Academic Integrity Policy.

For this course, **AI is permitted only for specific assignments or situations, and appropriate acknowledgment is required.** This course has specific assignments where artificial intelligence (AI) tools (such as ChatGPT or Copilot) are permitted and encouraged. When AI use is permissible, it will be clearly stated in the assignment directions, and all use of AI must be appropriately acknowledged and cited following the APA guidelines, including the specific version of the tool used. The submitted work should include the exact prompt you used to generate the content and the AI's complete response as an appendix. Because AI-generated content is not necessarily accurate or appropriate, you must assess the validity and applicability of any submitted AI output. You will not earn full credit if inaccurate, invalid, or inappropriate information is found in your work. APA Style Citation Information: <https://apastyle.apa.org/blog/how-to-cite-chatgpt>

Unless specified in the course assignment directions, the default is that AI is not allowed during any stage of an assignment. Using AI tools outside of these parameters violates UT Tyler's Honor Code, constitutes plagiarism, and will be treated as such. Students shall not use AI tools during examinations.

- **Alternate Locations:** If applicable to your course, Objective Structured Clinical Examinations (OSCEs), will meet in the Braithwaite Building School of Nursing at the main UT Tyler campus at 3900 University Blvd., Tyler, Texas, 75799.
- **External Resources:** The AGACNP program incorporates question banks from APEA (Advanced Practice Education Associates) for assessments of board examination readiness during the six practicum courses.

AGACNP diagnostic skill practice through virtual reality (VR) will be incorporated through *InciteVR*. During the last semesters of the program, Fundamental Critical Care Support (FCCS) certification will be obtained through the *Society of Critical Care Medicine*. Detailed instructions will be provided in class for each of these assignments.

Course Structure

This course is structured as an online hybrid learning environment with some asynchronous and synchronous content delivery. This course offers office-hour sessions via ZOOM by appointment that is designed to review course material and assignments and provide question-and-answer (Q&A) sessions. This does not require you to be in a specific location to participate; however, it is recommended to be in a quiet location with distractions minimized to enhance your learning experience.

The online nature of this course will push you to take an active role in the learning process. You will do this by engaging in and collaborating with other students and the instructor regularly through live sessions, assignments, and group activities. Please review the course content before attending online meetings to enhance the learning experience for all participants.

Tips for Success in this Course

1. **Participate.** I invite you to engage deeply, ask questions, and talk about the course content with your classmates. You can learn a great deal from discussing ideas and perspectives with your peers and professors. Participation can also help you articulate your thoughts and develop critical thinking skills.
2. **Manage your time.** I get it—students usually juggle a lot, and I know you have commitments beyond this class. Still, doing your best often means carving out enough dedicated time for coursework. Try scheduling specific blocks of time and ensure you have enough room to finish assignments, allowing extra space for any tech issues that might pop up. ***For each 3-hour didactic course, it is recommended to allot a minimum of 9-10 hours of content study time to successfully pass the course. For every 3-hour clinical course, it is recommended to allot 20 hours per week of clinical time along with content review.***
3. **Login regularly.** I recommend that you log in to Canvas several times a week to view announcements, discussion posts and replies to your posts.
4. **Do not fall behind.** This class moves at a quick pace, and each week builds on the previous class content. If you feel you are starting to fall behind, check in with the instructor as soon as possible so we can troubleshoot together. It will be hard to keep up with the course content if you fall behind in the pre-work or post-work.
5. **Use Canvas notification settings.** Pro tip! Canvas can ensure you receive timely notifications in your email or via text. Be sure to enable notifications to be sent instantly or daily. ([Canvas Notification Guide](#))
6. **Ask for help if needed.** If you are struggling with a course concept, reach out to me and your classmates for support.

Graded Course Requirements Information

Role Application Project (15%)

- The role of the AGACNP extends beyond clinical bedside skills to encompass many facets of healthcare delivery. Various activities will be assigned throughout the program to assist the student with development of the specific role and professional practice of the AGACNP and will serve several key purposes:
 1. **Practical Application:** These projects allow students to apply theoretical knowledge to real-world clinical or practice scenarios, bridging the gap between classroom learning and practical experience.
 2. **Professional Role Understanding:** These projects help students understand the responsibilities and expectations of their role as acute care NPs, preparing them for future careers.
 3. **Interdisciplinary Collaboration:** Role application projects often involve working with other healthcare professionals, fostering teamwork and collaboration skills.
 4. **Influence on Practice:** These projects enable students to understand and engage with policy-making processes, thereby equipping them to advocate for and implement healthcare policies that enhance patient outcomes and healthcare delivery.
 5. **Navigating the Healthcare System:** Role application projects equip students with the skills to assist patients in navigating complex healthcare systems, including support with insurance, billing, and accessing necessary services, with a focus on advocating for vulnerable populations who may face barriers to care.
- The assigned role application project will be weighted as 15% of the course grade.

Exams (15%)

- Q-bank exams will be dispersed throughout the course as noted on the course schedule and will serve several key purposes:
 1. **Knowledge Assessment:** These exams evaluate students' understanding of the material covered in each unit, ensuring they have a solid grasp of essential concepts and information.
 2. **Progress Monitoring:** Unit exams help both students and instructors track progress throughout the program, identifying areas where students may need additional support or review.
 3. **Preparation for Certification:** By regularly testing students' knowledge, unit exams help prepare them for the comprehensive certification exams they will need to pass to become licensed AGACNPs.
 4. **Critical Thinking:** These exams challenge students to apply their knowledge to clinical scenarios, enhancing their critical thinking and problem-solving skills.
 5. **Retention of Information:** Regular assessments encourage students to review and retain information, promoting long-term learning and mastery of the subject matter.
 6. **Feedback and Improvement:** Unit exams provide valuable feedback to students, highlighting their strengths and areas for improvement, which are essential for their academic and professional development.
- Please review all required content including module readings, PowerPoint presentations, and recorded office hours to be prepared for examinations.
- An average score of 80% or higher (grades are not rounded up) must be achieved on all module or unit exams to pass the course and progress through the program and are weighed at 15% of course grade.

For NURS 7386, the following exams will be accessed through APEA. Confirmation of the test and grade result will be uploaded to the assignment portal. An 80% or higher grade must be achieved to receive assignment credit. You may retake your exam as necessary to achieve a score of 80 or above.

APEA #16 – Professional Role & Responsibility (PROR) 28 questions

APEA #17 – Cardiovascular (CV) 27 questions

APEA #18 – Gastroenterology (GI) 40 questions

APEA #19 – Endocrine (ENDO) 40 questions

APEA #20 – General (GENR) 24 questions

Clinical Practicum (60%)

- Clinical practicums will allow the student to implement the AGACNP role across healthcare settings. Serving as a member of the interprofessional team, students will evaluate, diagnose, and manage adult and geriatric patients experiencing acute, chronic, and critical illness.
- Students will complete an AGACNP Clinical Readiness and Professional Expectations Attestation in Canvas prior to any clinical rotations for each course acknowledging understanding of course expectations prior to engaging in any clinical activities.
- Students will upload a tentative clinical schedule into Canvas and enter timesheet hours in progress into Exxat for faculty approval along with copies of all associated “good-to-go” emails from clinical coordinators prior to engaging in any clinical activities.
- Students complete 125 hours of precepted clinical experience per practicum course and are expected to develop and implement evidence-based, person-centered care plans.
- **Clinical Hours completed in Clinical Log** – All clinical schedules must be entered into Exxat to inform faculty of when students will be in clinical sites. This is the Time Sheet function in Exxat. Schedules should be entered at the onset of the course.
- **Clinical Practicum Attendance and Professionalism Policy**
Consistent attendance at clinical practicum is a core professional expectation for APRN students and is essential to meeting course outcomes, ensuring continuity of patient care, and maintaining effective collaboration with preceptors and faculty. Attendance reflects accountability, reliability, and professional role development consistent with AACN expectations for professional nursing practice.
- **Attendance Expectations**
 - At the onset of the course, students are required to enter their planned clinical schedule into the Exxat timesheet, reflecting the days they have committed to attending clinical with their preceptor.
 - Students are expected to attend all scheduled clinical days as entered and agreed upon with the preceptor.
 - Students may reschedule up to three (3) student initiated clinical days per academic term due to unforeseen circumstances (e.g., illness, personal emergency).
 - Clinical days missed at the request of the preceptor (e.g., clinic closure, preceptor illness, scheduling changes) do not count toward the three allowable rescheduled days.
 - All missed clinical time must be made up within the same academic term, when feasible, and coordinated with the preceptor.

- **Communication and Professional Conduct**

- Students must notify both the preceptor and faculty in advance of any absence whenever possible.
- Timely, clear, and professional communication regarding clinical attendance and schedule changes is required and is considered part of the student's professional role development.

- **No Call/No Show**

- A no call/no show (failure to notify the preceptor and faculty prior to a scheduled clinical day) constitutes a serious violation of professional expectations.
- A no call/no show may result in:
 - Loss of clinical hours for that day,
 - A professionalism concern and/or remediation plan,
 - Impact on course progression, and/or
 - Failure of the clinical course consistent with program policy.
- Excessive or Patterned Absences
 - Missing more than five (5) student initiated clinical days, or demonstrating a pattern of absences—even if within the allowable limit—may prompt a professionalism review.
 - Excessive absences may prevent the student from meeting course and program outcomes and may result in remediation or unsuccessful course completion.

Clinical Readiness Requirements

Before completing any clinical hours for this course, students must:

1. Upload a tentative practicum rotation/clinical schedule using the template provided in the module and receive faculty approval.
2. Upload all applicable "Good to Go" email(s) from the Clinical Coordinator for each approved site and preceptor listed on the clinical schedule.
3. Complete [Module 3 | AGACNP Clinical Readiness and Professional Expectations Attestation \(Week 1\)](#).
4. Enter tentative clinical dates into the Exxat Timesheet function and mark them as "**In Progress.**" Upon completion of the clinical day, students will change the status to "**Submit for Review**" to forward the timesheet to the preceptor for verification of hours.

Students may not begin clinical activities until all requirements above have been completed, reviewed, and approved.

Once faculty has reviewed and approved the required submissions, the Clinical Readiness Attestation has been completed, and the planned clinical dates have been entered into Exxat, students may begin their clinical rotation for the course.

Any clinical hours completed without fulfilling all requirements above and receiving the necessary approvals will not be counted toward course or program requirements.

Please allow **48-72 business hours** for faculty and staff to review and process clinical documentation, compliance verifications, schedule submissions, preceptor approvals, and related requirements. Students are responsible for planning accordingly.

Schedule Expectations

Clinical practice environments are dynamic, and minor schedule changes may occur. However, students are expected to maintain a well-planned, course-long schedule and demonstrate professional responsibility through timely and clear communication with faculty and preceptors regarding any changes. Consistent schedule management is an important component of professional role development.

At a minimum, a partial tentative schedule must be submitted by **Friday of Week 2** to support timely progression toward course completion.

Students experiencing difficulty securing a preceptor or clinical placement should notify both faculty and the Clinical Coordinator immediately. Failure to secure a clinical placement by the end of **Week 2** may significantly impact a student's ability to complete course requirements by the end of the semester.

- Clinical practicums in the AGACNP program serve several essential purposes:
 1. **Hands-on Experience:** They provide students with real-world clinical exposure to apply theoretical knowledge in acute and critical care settings.
 2. **Skill Development:** Practicums help AGACNP students develop advanced skills such as diagnostic reasoning, patient assessment, and procedural techniques.
 3. **Interdisciplinary Collaboration:** Students work alongside physicians, nurses, and other healthcare professionals to enhance teamwork and communication.
 4. **Patient Management:** Practicums allow students to manage acute and complex health conditions, including emergency and critical care cases, under supervision.
 5. **Decision-Making and Critical Thinking:** Students refine their ability to make quick, evidence-based decisions in high-pressure environments.
 6. **Professional Readiness:** They prepare students for independent practice by gradually increasing their responsibilities in patient care.
 7. **Certification and Licensure Requirements:** A minimum number (750) of total clinical hours are required for graduation and certification eligibility.
- Grading of the clinical practicum consists of multiple components that assess a student's clinical competency, professionalism, and academic performance. Practicum is weighted as 60% of the course grade. Below is a breakdown of how the percentage is calculated:

Clinical Performance (40%)

Clinical performance will be evaluated through three separate evaluations to offer a well-rounded view of the student's performance, promote growth through multiple perspectives, and strengthen the educational quality and accountability of the clinical training programs. The purpose of each evaluation is outlined below:

Faculty Evaluation of Student (40%) – Faculty will schedule a site visit to evaluate student in the clinical setting. Faculty evaluations will be scheduled and completed using the form located in *Exxat* by the assigned due date. The purpose of the faculty evaluation is to provide:

- *Academic oversight:* Ensures that the student is meeting the academic and clinical objectives set by the program.
- *Standardization:* Provides a consistent framework to assess students across different rotations and preceptors.

- *Summative assessment*: Often used as a formal component of the student's grade or performance report.
- *Big-picture perspective*: Faculty may integrate multiple sources of input (e.g. case reports, presentations, written work) into the evaluation.

Student Evaluation of Self (Complete/Incomplete) – Students will complete a self-reflection and upload the provided form into *Exxat* by the assigned due date. The purpose of the student self-evaluation is to:

- *Encourage reflection*: Helps students critically assess their own strengths, weaknesses, and growth.
- *Promote lifelong learning*: Develops habits of self-assessment and self-directed improvement, which are key traits of effective clinicians.
- *Identify gaps*: May reveal mismatches between student perception and external feedback from faculty and preceptor, which can guide further development.
- *Empowerment*: Gives students ownership over their learning journey and performance.

Preceptor Evaluation of Student (Complete/Incomplete) – Students should request their preceptor complete and upload an evaluation of their clinical performance into *Exxat* by the assigned due date. **The preceptor evaluation is not graded**; however, completion is encouraged to serve the following purposes:

- *Real-time clinical assessment*: Preceptors observe the student in actual clinical settings and can evaluate practical skills, professionalism, communication, and patient care.
- *Contextual feedback*: Offers insight into how the student functions in a specific clinical environment, including adaptability and team interactions.
- *Mentorship evaluation*: Assesses how well the student integrates feedback and improves over the course of the rotation.
- *Formative and summative*: Can be used to provide ongoing guidance as well as final assessments.

Clinical Logs & Documentation (Complete/Incomplete)

Clinical Hours completed in Clinical Log – For each clinical day, patient encounters must be logged into *Exxat* as Direct Patient Care Hours and the total of for each practicum course must reach 125 patient hours to receive credit for the course unless approved carryover hours are credited. The total direct patient care hours for the program are 750.

Documentation of each patient's encounter **must be completed and submitted to faculty for approval within 72 hours** of the clinical day. Failure to submit patient encounters within 72 hours will not count towards your course requirement and will result in a make-up day requirement unless extenuating circumstances apply and are approved by your faculty for late submission.

Clinical logs serve the following purpose:

- *Track clinical exposure*: Documents the types and numbers of patient encounters, procedures, and conditions the student is exposed to.
- *Ensure competency*: Helps confirm that students are meeting required learning objectives and gaining experience in essential clinical areas.
- *Accountability*: Verifies student attendance and active participation in clinical duties.
- *Data collection*: Assists faculty in identifying gaps in training and adjusting curriculum or rotations accordingly.

Student Evaluation of Preceptor – Student evaluation of preceptor should be completed and uploaded using the form provided in *Exxat* by the assigned due date. The student's evaluation of preceptor serves the following purposes:

- *Assess teaching effectiveness*: Provides feedback on the preceptor's ability to educate, mentor, and support student learning.
- *Identify strengths and weaknesses*: Highlights what preceptors are doing well and where improvement may be needed.
- *Quality assurance*: Ensures that students are receiving consistent, high-quality instruction and support across clinical sites.
- *Faculty development*: Informs training and support efforts for clinical educators.

Student Evaluation of Clinical Site – Student evaluation of the clinical site should be completed and uploaded using the form provided in *Exxat* by the assigned due date. The student's evaluation of the clinical site serves the following purposes:

- *Evaluate learning environment*: Assesses whether the site provides adequate resources, patient variety, supervision, and learning opportunities.
- *Monitor site quality*: Helps the program determine if the site continues to meet standards for clinical education.
- *Improve future placements*: Informs decisions about whether to continue using the site or how to improve the student experience there.
- *Capture student perspective*: Provides insights into student satisfaction, safety, and professional development opportunities at the site.

Case Report (20%)

Objective: You will collect and document a full clinical history and develop a comprehensive treatment plan addressing both medical and social needs.

Instructions:

1. Ensure Patient Confidentiality: De-identify all personal information using only patient initials. Avoid any specific demographic or location details that may compromise confidentiality.
2. Document a Comprehensive History and Physical (H&P) include the following sections:
 - Chief Complaint (CC) - Document in the patient's own words when possible.
 - History of Present Illness (HPI) - Provide a clear, chronological narrative of the patient's current problem.
 - Past Medical History (PMH) - Include chronic illnesses, past surgeries, hospitalizations, medications, and allergies.
 - Social History (SH) - *Focus on NMDOH factors such as:*
 - Housing situation
 - Employment and income
 - Education level
 - Access to healthcare (transportation, insurance, primary care availability)
 - Substance use, lifestyle factors
 - Family History (FH) - Document relevant hereditary conditions and familial support systems.
 - Review of Systems (ROS) - Conduct a full ROS across all major systems.

- Physical Examination (PE) - Document findings by system (e.g., General, HEENT, Cardiovascular, Respiratory, GI, Neuro, etc.).

3. Develop a Comprehensive Treatment Plan - Your plan should address both medical and social aspects of care and include the following components:

- Medical Interventions
 - Diagnosis and differentials
 - Medications and other treatments
 - Recommended tests or follow-up
 - Any specialist referrals
- NMDOH Interventions - Address each identified social challenge (e.g., housing referrals, food security programs, transportation assistance)
- Community Resources - List specific local resources or organizations that the patient could access (name and purpose)
- Interdisciplinary Collaboration - Identify how you will involve other professionals (e.g., social workers, nutritionist, mental health provider) and explain each collaborator's role in supporting the patient
- Patient Education - Provide culturally sensitive, language-appropriate education materials or strategies including education about condition management, available resources, and how to navigate care

Submission -Your final submission should include both the H&P and the comprehensive treatment plan and be submitted to the assignment portal as a Word document in APA 7th format by the due date. Please refer to grading rubric for submission criterion. The case report is weighted as 20% of the overall course grade.

Late Work and Make-Up Exams:

All assignments, quizzes, and examinations are due by 11:59 PM Central Standard Time (CST) on the assigned due date. A **5% deduction per calendar day** will be applied to late assignments for **up to three (3) days**, unless prior approval has been granted by course faculty. Assignments submitted more than three days after the due date will receive a grade of zero (0).

As this is a doctoral-level APRN post-master's certificate program, students are expected to demonstrate professional accountability and advanced time-management skills. Due dates are intentionally consistent across courses and provided in advance to allow students to plan work and clinical schedules accordingly. Therefore, employment obligations, shift changes, on-call responsibilities, or routine professional duties are not considered acceptable reasons for late submissions.

Extenuating circumstances (e.g., serious illness, family emergency) may be considered at the discretion of course faculty and may require documentation. Extensions are not guaranteed and must be requested prior to the assignment deadline whenever possible.

Repeating a Course:

Students repeating this course may not use previously submitted assignments nor utilize the same patients for an assignment. **Submitting the same or slightly modified assignments from previous semesters is considered self-plagiarism and is subject to academic discipline, including failing the assignment or the course.**

Attendance Policy:

Attendance/participation is expected. Make-up for exams, quizzes, assignments, and clinical time missed is at the faculty's discretion.

University Policies & Student Resources:

University policies and student resources are available on the University website and in Canvas under “Syllabus.”

- [University Policy](#)
- [Student Resources](#)

Grading Structure

Assignment	Percentage %
Role Application Project	15%
APEA Exams (80% average required)	15%
Student Self-Reflection of Growth in AGACNP Role	10%
Clinical Practicum: Clinical Performance-->40% --Student Evaluation of Self (complete/incomplete) --Preceptor Evaluation of Student (complete/incomplete) --Faculty Evaluation of Student (40%) Clinical Logs & Documentation→Complete/Incomplete --Clinical Readiness and Professional Expectations Attestation --Clinical Schedule Submission --125 Clinical Hours entered in Log --Student Evaluation of Preceptor & Clinical Site Case Report-->20%	60%
Total	100%

Grading Scale

- A - (90% or higher)
- B - (80 - 89%)
- C - (70 - 79%)
- D - (60 - 69%)
- F - (Below 60%)

Calendar of Topics, Readings, and Due Dates

Note: This is a tentative schedule, and subject to change as necessary – monitor the course page for current deadlines. In the unlikely event of a prolonged university closing, or an extended absence from the university, adjustments to the course schedule, deadlines, and assignments will be made based on the duration of the closing and the specific dates missed.

NURS 7386 Fall B Schedule

Week	Date	Assignments Due
1	M 10/19 F 10/23	Flex 2 Courses Begin • Complete AGACNP Clinical Readiness and Attestation • May begin clinical rotations after clinical readiness, clinical schedule, and good-to-go emails are completed. CENSUS DAY (Attendance)
2	M 10/26	APEA #16 Due • Upload clinical schedule and "good to go" emails to the assignment portal for approval by the end of Week 2. • Enter clinical schedule days into Exxat as "In Progress" Continue clinicals and complete entries in logbook within 72 hours.
3	M 11/02	APEA #17 due Continue clinicals and complete entries in logbook within 72 hours. Faculty to arrange site visit
4	M 11/09 F 11/13	APEA #18 due Case Report Due Continue clinicals and complete entries in logbook within 72 hours. Faculty to arrange site visit
5	M 11/16 Th 11/18 F 11/20 F 11/20	APEA #19 due Last day to withdraw with a "W" Role Application Project: NMDOH Real-World Advocacy due Student Self-Evaluation of Clinical Performance Continue clinicals and complete entries in logbook within 72 hours.
Break	11/23-27	Thanksgiving holidays for faculty and students
6	M 11/30 F 12/04 F 12/04	APEA #20 due Preceptor Evaluation of Student Student Self-Reflection of Growth in AGACNP Role due Continue clinicals and complete entries in logbook within 72 hours.
7	F 12/11 F 12/11 F 12/11 S 12/12	Faculty Clinical Site Visit to be completed Faculty Evaluation of Student Student Evaluation of Preceptors & Clinical Sites due Clinical Patient Hours Log Report due Last day of class for Fall B
	T 12/15	Final Grades Due
