

## 18-Hours Recommended for Health Sciences Dual-Credit Teachers

The following courses are recommended for those who want to teach Health Sciences courses at two-year colleges or dual-credit Health Sciences courses in high schools. The recommended courses consist of 18-hours (6 courses) all of which count toward the hours needed to complete a Master of Science in Health Sciences (36 hours) at UT Tyler.

- HECC 5303 RESEARCH DESIGN
- HECC 5317 BIOSTATISTICS
- ALHA 5347 EPIDEMIOLOGY
- ALHS 5365 THEORIES AND MODELS OF HEALTH BEHAVIOR
- ALHS 5335 GLOBAL HEALTH
- ALHS 5305 PROGRAM DESIGN AND EVALUATION

While it is not mandatory that students follow this recommended course of study to gain their 18 graduate Health Sciences hours, please note that non-degree seeking students may be prevented from enrolling in other courses due to space limitations. Non-degree seeking students who follow the course of study for the 18 hours will be allowed access to each of the recommended courses.

PLEASE NOTE: Hiring decisions are the purview of the institution where you would like to teach. For information on hiring requirements at a particular institution, contact that institution. [SACSCOC-accredited Institutions](#) are required to document and justify that each faculty member is qualified to teach assigned courses. When the qualifying credential aligns with the courses being taught, no justification is normally required as the credential speaks for itself, e.g. MA. in English teaching English. However, if the master's is in Business Administration and the faculty member is teaching Accounting, then a written justification is normally necessary. Again, before taking classes always check with the institution where you are interested in teaching - each institution can have different interpretations and policies.

Delivery Method: The recommended courses are offered at least once per year and can be completed 100% online
