CAMOUFLAGE FITNESS

with Benjamin Pirillo

Keynotes – Professional Development - Presentations

Benjamin Pirillo has been an elementary Physical Education teacher since 2001. He started his career teaching at Hughston Elementary in Plano ISD. During the school year of 2008 the honor was given to him by being the school's Teacher of The Year. He was awarded the 2015 TAPERD Elementary Teacher of the Year and the 2016 SHAPE America Southern District Elementary Teacher of The Year. While working in Plano ISD, he had been a part of developing their Coordinated School Health and Physical Education curriculums.

After teaching at Hughston Elementary for 20 years, he left the district to teach in Melissa ISD at Willow Wood Elementary. In 2022 he was inducted into the Elinor Crawford and William Thrall Hall of Excellence for the University of Northern Iowa. This honor is bestowed upon graduates of the university who have contributed to positively affect the fields of health or physical education.

Benjamin loves to share his ideas with colleagues around the world. He started presenting at the TAPERD annual conventions in 2010 and by 2013 was volunteering more with TAPERD. In 2013, he created a YouTube channel to share engaging activities he uses with his students. Each week during the school year he posts at least one physical education video. The physical education videos focus on various skills students learn and use in dynamic activities. His dance videos are the most popular, where anyone can follow along. In 2014 Benjamin created his own website to share more content for teachers to use in their classes. On the website teachers can download and use various materials like fitness cards, assessment forms, posters, cross curricular items, and much more. He is an author of various eBooks that are available in his Teachers Pay Teachers store.

Benjamin has been honored to present for different state organizations, national organizations, and school districts. His love and passion for physical education is evident during the presentations. He is a fun, energetic, and enthusiastic presenter. When presenting, he always carries the same flow of energy throughout the whole presentation. The teachers walk away with a variety of activities they can easily incorporate within their school's curriculum. His presentations focus on activities which help reinforce previously learned skills while providing some ways to integrate technology.

Workshop Segments Include
