

NURS 3603

I will create an extra comprehensive file on a patient either at Trinity Mother Frances or at the nursing home, and will present my findings to a group for review. Mrs. Sacrey has agreed to help me when necessary and Dr. Deal has also made herself available in case Mrs. Sacrey is unavailable at the time. My comprehensive file will be based upon the Grand Rounds project in my Health Assessment lab, but will include case files for comparison, along with different studies to go into further details about the pathology of the disease.
