

Community Partner

BETHESDA CLINIC

ELISA MORRISON

FNP Clinical Specialist

"I am very excited to be working with the InTune grant team. FNP students get a really well-rounded clinical experience at Bethesda Health Clinic, and have the opportunity to practice complex decision making as they provide health-care in low-income working populations."

Elisa Morrison

The InTune/HRSA grant is excited to **WELCOME** to our team, Ms. Elisa Morrison as the new FNP Clinical Specialist assigned to our community partner, Bethesda Health Clinic located in Tyler.

After graduate school, Elisa started her FNP experience with ETMC in Gilmer, Texas, and also returned to UT Tyler as an Adjunct Faculty/Clinical Instructor for five years. Elisa currently serves with the US Navy Reserve team and has provided service for the last twelve years.

The patient population at Bethesda is a culturally diverse medically underserved working adult population in East Texas. Comprehensive primary care is provided to some of the most vulnerable groups in the community, and Elisa finds the work challenging and fulfilling. Elisa was well equipped to accept the challenges of rural & medically underserved health care since she has been a valued part-time FNP at Bethesda Clinic since 2011.

Elisa has precepted many FNP students and finds that experience rewarding as well. She definitely has a heart for underserved populations, and she is thoroughly invested in and dedicated to training competent and caring FNPs, as well. Elisa speaks fluent Spanish, which is an added bonus!

"Bethesda Health Clinic is a Christ-centered ministry with a bold mission: to provide healthcare to hardworking low income adults who are uninsured or underinsured. Our state-of-the-art facility eases the burden on local ERs while serving a neglected segment of our population in a professional and dignified environment."

"Bethesda is very excited to partner with UT Tyler and particularly with the Nurse practitioner program to offer a clinic experience for the students. Elisa has been with Bethesda for years and an integral part of our team. This partnership will allow the students to experience a wide variety of medical issues and allow the clinic opportunities for the increasing number of patients to be seen in a timely manner. We see this as a great win-win situation where overall the hard working patients we serve will benefit the most."
