

4.10 Consideration for Readmission

(Updated 2/3/2020)

To be considered for readmission/re-enrollment, a student must be eligible to return, and it has been no more than three consecutive semesters since the last nursing course was successfully completed.

Students eligible to re-enroll in the nursing program must:

1. Contact the University Admissions office to activate the re-enrollment process at the university.
2. Submit a written petition to the BSN Program Director seeking permission to be readmitted.
3. Follow a required plan of action based on the level of courses completed.
4. Demonstrate proficiency in required competencies to enroll in point of entry course.

**Admission to clinical courses is contingent on space available and is not guaranteed.*
