- **What You Need to Know About Drug Interactions (Preceptor Key)**
- **What You Need to Know About Drug Interactions (Student Case)**

#### Covers practical and mechanistic issues with drug interactions. Sample fluconazole prescription for a patient taking simvastatin is used in a case to explain types of drug-drug, drug-food, and drug-disease interactions, and potential outcomes of these interactions in practice.

#### Billing for Rx Drugs (Preceptor Key)

**Covers** practical issues involved with billing prescription medications. Sample Benicar, Novolin R and Lantus prescriptions are used in cases to explain billing requirements of various third-party insurers, define important billing terms, and provide tips for inputting prescribed quantities, calculating days’ supply, etc.
