[If a faith is selected] Which of the following best describes the overall importance of religion in your life?

| Code |  | Total |
| :--- | :--- | :--- |
| 1 | Religion is not important | $8 \%$ |
| 2 | Religion provides some guidance | 24 |
| 3 | Religion provides quite a lot of guidance | 19 |
| 4 | Religion provides a great deal of guidance | 46 |
| 8 | Don't Know | 2 |
|  | Total $=$ | 859 |

What is your marital status?

| Code |  | Total |
| :--- | :--- | :---: |
| 1 | Married | $53 \%$ |
| 0 | Single (Never married) | 29 |
| 2 | Divorced | 8 |
| 4 | Separated | 5 |
| 5 | Widowed | 6 |
|  | Total $=$ | 1,120 |

Are you a parent or guardian of a child 18 years old or younger?

|  |  | Total |
| :--- | :--- | :---: |
| 0 | No | $67 \%$ |
| 1 | Yes | 33 |
|  | Total $=$ | 1,118 |

What is your gender?

|  |  | Total |
| :--- | :--- | :---: |
| 0 | Male | $48 \%$ |
| 1 | Female | 51 |
|  | Total $=$ | 1,126 |

## Methodology

The Dallas Morning News/UT Tyler Poll reflects a statewide random sample of 1,126 registered voters during the eight days between April 6 and April 13. The mixed mode sample includes 290 registered voters who were surveyed over the phone by the Center for Opinion Research with support from ReconMR and 836 registered voters that were randomly selected from Dynata's panel of registered voters that was stratified to match the demographics of Texas's registered voter population. The online and phone surveys were conducted in English and Spanish.

Post-stratification weights were calculated for the random telephone sample and web sample separately to be representative of the Texas registered voter population, before the two weighted samples were combined into one standardized sample (see Elliott 2009). To balance sample demographics with the estimated gender, age, race/ethnicity, education, and vote choice of registered voters in the state we use an iterated process known as raking. These parameters were derived from 2018 Current Population Survey to reflect Texas's electorate. Also, to account for the influence of urbanization on voter registration the sample is also weighted to reflect the population density of the state using the counts of registered voters in all 254 counties based on data from the Texas Secretary of State. Election data from the Texas Secretary of State is also used to reflect voting patterns in the state. The use of these weights in statistical analysis ensures that the characteristics of the sample closely reflect the characteristics of registered voters in Texas. A second step uses weights from the probability phone sample to standardize the weights for the nonprobability online sample to reduce sampling bias (see Elliott 2009).

In this poll, the margin of error for 1,126 registered voters in Texas is +/- 2.9\% (or 4.1\% including design effects) at a 95 percent confidence interval.
