Course Information:
PSYC 2354.002 Psychological Statistics
Monday, 5:30 - 8:15
Classroom: HPR 262

Professor Information:
William Goette, M.S.
Email address: wgoette@uttyler.edu

A student at UT-Tyler is not under any obligation to purchase a textbook from a university-affiliated bookstore. The same textbook may also be available from an independent retailer, including an online retailer.

Course Catalog Description
PSYC 2354: An introduction to descriptive and inferential statistical methods used in psychological research. Emphasis will be on hypothesis testing with t-tests, analysis of variance, correlation, and selected nonparametric techniques.

Student Learning Outcomes & Assessments
Upon successful completion of the course, the student will be able to …

1. Demonstrate an understanding of the differences between and uses of descriptive and inferential statistics.  (BS/BA 6.0)  
2. Demonstrate an understanding of the differences between parametric and nonparametric statistics (BS/BA 6.0)
   a. Define and distinguish between a population and a sample.
   b. Define and distinguish between statistics and parameters.
   c. Classify data with respect to the four levels of measurement.
3. Compute statistical tests manually (with a calculator) and interpret and explain results.  (BS/BA 6.0)
   a. Compute and explain measures of central tendency and find the mean, median and mode of a sample and a population
   b. Compute and explain variability: range, variance and standard deviation
   c. Calculate and interpret standard z scores and information gained through normal distribution tables.
   d. Calculate and interpret correlation coefficients using the Pearson and the Spearman.
   e. Explain regression and predict y-values using regression the equation.
   f. Calculate and interpret standard error of the estimate and proportion of variance accounted for.
   g. Discuss hypothesis testing and how to state the null and alternative hypotheses
   h. Interpret the level of significance of a hypothesis test (p-values)
   i. Identify type I and type II errors, and the probabilities associated with them.
   j. Discuss the power of an analysis and the factors that affect it.
   k. Perform one and two sampled t-tests, determine significance, and interpret the results.
   l. Explain an F-test, calculate and interpret a one-way ANOVA
   m. Calculate and interpret a two-way ANOVA
   n. Calculate and interpret non-parametric tests such as the Mann-Whitney U, the Wilcoxon rank test, and Chi Squares.
   o. Graph different types of data manually and describe the information contained in them.

5. Be able to identify the independent and dependent variables of experiments, determine the design and the correct statistical analyses with which to test appropriate hypotheses.  (BS/BA 6.0)
Evaluation and grading: Course grades will be determined based on the student’s performance on exams, homework, and attendance. Students should expect one homework assignment per chapter. You will have the opportunity to replace one exam grade during the week of finals. If you score higher than your original grade on this optional test, then I will replace it with your lowest exam grade. If you do not do better, the re-take grade will just be dropped.

The three major exams will be worth 25% each of the course grade (75% exam total), homework grades will be worth 15% of the overall grade, and attendance will be worth 10% of your overall grade. A course average of 90 or more will produce an A, 80-89 is a B, 70-79 is a C, 60-69 is a D, and anything below 60 is an F. Psychology majors must have a grade of C or better to meet degree requirements.

Course Policies and Information

Exams: You will have three exams in the class. There is not a cumulative final because the course content builds on itself. All three exams will be administered via Canvas, and you will have a week to complete on the exam (i.e., exams will open on a Monday morning at 12:00 AM and will close on a Sunday evening at 11:59 PM). Each exam will be in two parts. The first part will be a standard test format involving matching, multiple choice, true/false, etc. This part can be taken just one time. The second part will be a fill-in-the-blank where you will be given a problem and required to enter your answer in a response box. Since there can be numerous issues where you may not be entering in the answer just right or where you may just be making a simple mistake in your arithmetic, you will be able to attempt the second part of the test multiple times, receiving feedback about which answers you got correct and which answers you got incorrect each time. It is important that you answer every question every time that you take the test, even if you got the answer right on a previous attempt, because I will only score your last attempt. If you have attempted a question multiple times but are still not getting the right answer, then during the class time scheduled during the exam week I will be available in the classroom to review your written attempts to help you identify the mistake. It is important that you come to that meeting with a clean, organized attempt at answering each of the problems that you have struggled with so that I can follow the steps. It is also important that you attend the meeting only if you have already attempted to answer the problem several times, and I will check Canvas to ensure that this is the case.

Extra Credit: Participating in research or counseling will allow you to earn extra credit points in the class. For every 2 hours (or 2 session, if you do the counseling with the graduate students), you will earn 1 point added to your final grade.

Homework: Following lectures, a homework assignment will be made available on Canvas. The assignment will open at 8:11 PM the Monday of the lecture and it will close again at 5:29 PM the next Monday. You will receive 2 chances on each homework assignment, and you will be able to ask questions about the homework at the beginning of each lecture. It is important that you understand how to get the correct answers on the homework because the questions on the exam will be very similar.

Attendance and Preparedness: Attendance in this class matters! Students who do the best in this class are those who come to every class meeting and arrive on time and prepared. Being on time to class is important, as we will usually start off with a quiz over previous work. Please bring with you to every class: pencils with erasers, paper, and a calculator. Attendance will be taken at the end of
every class and will factor into your final grade. If you cannot attend the entirety of the class, then let me know and sign out of the class at the appropriate time. You will receive partial attendance credit for attending at least some of the class. Excused absences will not impact your grade, but you should let me know in advance when you will be missing a class whenever possible.

**Practice Work:** During class time we will usually have time to begin the practice problems for each chapter. Homework and exam content will be modeled on these practice problems but may also include the application of related concepts covered on the PowerPoint. As time permits, you should expect to complete substantial practice before leaving class. The practice time is *for your benefit*, so please take advantage of it.

*Note: I will adjust lectures as needed by the class, but there is limited opportunity for doing so. Being prepared for each class meeting is the best way to ensure that you do not get left behind!
University Policies:

Grade Replacement/Forgiveness
If you are repeating this course for a grade replacement, you must file an intent to receive grade forgiveness with the registrar by the 12th day of class. Failure to do so will result in both the original and repeated grade being used to calculate your overall grade point average. Undergraduates will receive grade forgiveness (grade replacement) for only three course repeats; graduates, for two course repeats during his/her career at UT Tyler.

Disability Statement
"If you have a disability, including a learning disability, for which you request disability support services/accommodation(s), please contact Ida MacDonald in the Disability Services office so that the appropriate arrangements may be made. In accordance with federal law, a student requesting disability services/accommodation(s) must provide appropriate documentation of his/her disability to the Disability Services counselor. In order to assure approved services the first week of class, diagnostic, prognostic, and prescriptive information should be received 30 days prior to the beginning of the semester services are requested. For more information, call or visit Disability Services located in the University Center, Room 3150. The telephone number is (903) 566-7079. Additional information may also be obtained at the following UT Tyler Web address: http://www.uttyler.edu/disabilityservices.

Student Absence due to Religious Observance
Students who anticipate being absent from class due to a religious observance are requested to inform the instructor of such absences by the second class meeting.

Student Absence for University-Sponsored Events and Activities
If you intend to be absent for a university-sponsored event or activity, you (or the event sponsor) must notify the instructor at least two weeks prior to the date of the planned absence. At that time the instructor will set a date and time when make-up assignments will be completed.

Social Security and FERPA Statement:
It is the policy of The University of Texas at Tyler to protect the confidential nature of social security numbers. The University has changed its computer programming so that all students have an identification number. The electronic transmission of grades (e.g., via e-mail) risks violation of the Family Educational Rights and Privacy Act; grades will not be transmitted electronically.

Student Standards of Academic Conduct
Disciplinary proceedings may be initiated against any student who engages in scholastic dishonesty, including, but not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts.
(i) “Cheating” includes, but is not limited to:
• copying from another student’s test paper;
• using during a test, materials not authorized by the person giving the test;
• failure to comply with instructions given by the person administering the test;
• possession during a test of materials which are not authorized by the person giving the test, such as class notes or specifically designed “crib notes”. The presence of textbooks constitutes a violation if they have been specifically prohibited by the person administering the test;
• using, buying, stealing, transporting, or soliciting in whole or part the contents of an unadministered test, test key, homework solution, or computer program;
• collaborating with or seeking aid from another student during a test or other assignment without authority;
• discussing the contents of an examination with another student who will take the examination;
• divulging the contents of an examination, for the purpose of preserving questions for use by another, when the instructor has designated that the examination is not to be removed from the room or not to be returned or to be kept by the student;
• substituting for another person, or permitting another person to substitute for oneself to take a course, a test, or any course-related assignment;
• paying or offering money or other valuable thing to, or coercing another person to obtain an unadministered test, test key, homework solution, or computer program, or information about an unadministered test, test key, homework solution or computer program;
• falsifying research data, laboratory reports, and/or other academic work;
• taking, keeping, misplacing, or damaging the property of U. T. Tyler, or of another, if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct; and,
• misrepresenting facts, including providing false grades or resumes, for the purpose of obtaining an academic or financial benefit or injuring another student academically or financially.

(ii) “Plagiarism” includes, but is not limited to, the appropriation, buying, receiving as a gift, or obtaining by any means another’s work and the submission of it as one’s own academic work offered for credit.

(iii) “Collusion” includes, but is not limited to, the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any section of the rules on scholastic dishonesty.

Vision
The College of Education and Psychology is nationally recognized and respected for its academic programs and opportunities. It is a center of academic excellence, scholarly inquiry, and public service. The College prepares leaders to meet the critical challenges of the 21st Century through productive contributions to local and global communities and toward individual and cultural equity.

Mission
The mission of the College of Education and Psychology is to provide a positive environment that fosters the acquisition of knowledge and skills. The mission is individually and collectively realized through a community of scholars that contributes to knowledge through scholarly inquiry; organizes knowledge for application, understanding and communication; and provides leadership and service. We affirm and promote global perspectives that value individual and cultural diversity to enhance learning, service, and scholarship.

Psychology B.S./B.A. Program Mission Statement:
The mission of the undergraduate program in Psychology is to provide students with a demonstrable knowledge and understanding of the science of behavior and the mind, including content in Memory and Thinking; Sensory and Behavioral Neuroscience; Developmental Psychology; Clinical and Abnormal Psychology; Social Psychology; Psychological Measurement and Methodology. We seek to prepare students for either postgraduate education or a wide variety of employment settings and careers.

Psychology B.S./B.A. Program Learning Outcomes may be found at:
