I. The On-Site Visit

A. Date of the visit
   April 14-16, 2019

B. Visiting Team Members
   Dr. Argie Nichols, Chair ATMAE Visiting Team
   University of Arkansas – Fort Smith
   5210 Grand Ave
   PO Box 3649
   Fort Smith, AR 72913
   argie.nichols@uafs.edu

   Mr. Dan Cassler
   University of Houston
   2520 Robinhood Unit 1012
   Houston, TX 77005
   dcassler@uh.edu

   Dr. Kenny Rigler, Jr.
   Fort Hays State University
   600 Park Street
   Hays, KS 67601
   klrighler@mail.fhsu.edu

C. Proposed On-site Visit Agenda

   Sunday, April 14, 2019
   Arrive in Tyler
   6:30 pm    Dinner with Department Chair
   8:30 pm    Visiting Team meeting

   Monday, April 15, 2019
   8:15 am   Introductions and Tour of Facilities
   9:30 am   Faculty interviews
   • Dr. Mark R. Miller, Professor and Chair
   • Dr. Dominick Fazarro, Associate Professor
   • Dr. Heshium Lawrence, Associate Professor
   • Dr. Mohammed Ali, Associate Professor
10:30 am  Brief meeting with:
- Dr. Roger Lirely, Interim Dean of the Soules College of Business

11:15 am  Meet with Assessment Personnel
- Meet with Halley Graham, Soules College of Business Assessment Coordinator
- Meet with Dr. Lou Ann Berman, Assistant VP of Assessment & Institutional Effectiveness

12:00 am  Lunch with Advisory Committee

1:15 pm  Meet with University Personnel: Dr. Kenny Rigler, Jr.
- Library –Rebecca McKay Johnson, Director
- Student Services – Ona Tolliver, VP for Student Success
- Enrollment Management – Dr. Rosemary Cooper, Executive Director of Career Success and Alumni Engagement
Meet with Administrators: Dr. Argie Nichols
- Dr. Kimberly Laird, VP for Budget and Finance and Chief Financial Officer
- Dr. Amir Mirmiran, Provost and VP for Academic Affairs; Chief Academic Officer
- Dr. Roger Lirely, Interim Dean, Soules College of Business

4:00 pm  Team Meeting in Conference Room

5:00 pm  Adjourn to Hotel

7:00 pm  Dinner

9:00pm  Team Meeting in Hotel - Review preliminary findings & assessments

**Tuesday, April 16, 2019**

8:00 am  Review materials

9:30 am  Meet with students

10:00 am  Team Meeting Work Session

12:00 am  Lunch (Working Lunch)

1:00 pm  Exit interview with
• Dr. Michael Tidwell, President
• Dr. Amir Mirmiran, Provost and VP for Academic Affairs; Chief Academic Officer
• Dr. Roger Lirely, Interim Dean of the Soules College of Business
• Dr. Mark Miller, Chair of the Department of Technology

2:00 pm Team Meeting in Conference Room

3:00 pm Depart Campus

D. Current Accreditation Status of Program(s)
The following program is currently accredited:
Bachelor of Science in Industrial Technology

II. General Information

A. The Institution

1. Names and Address

   The University of Texas at Tyler
   3900 University Blvd.
   Tyler, TX 75799

2. Number of the Students Enrolled

   a. As listed in Table 1 below, there were 10,206 students enrolled at The University of Texas at Tyler. Of that total, 7,333 were undergraduate students and 2,873 were graduate students.

5. Institutional Accrediting Organization and Date of University Accreditation

The University of Texas at Tyler is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS) (1866 Southern Lane, Decatur, Georgia 30033-4097: telephone number 404-679-4501) to award bachelor's and master's degrees. The most recent re-accreditation was effective in December of 2010. Southern Association of Colleges and Schools, Commission on Colleges (SACS-COC) – 2010, Reaffirmation written report 2016

Discipline Specific Accreditations

Accreditation Council for Pharmacy Education - Pre-candidate Status 2015
American Chemical Society - 2012
Association of Technology, Management and Applied Engineering (ATMAE) - 2012
Association to Advance Collegiate Schools of Business International (AACSB) - 2018
Commission on Collegiate Nursing Education (CCNE) - 2015
Council for Accreditation of Counseling & Related Educational Programs (CACREP) - 2013
Engineering Accrediting Commission of ABET - 2015
National Association of Schools of Music (NASM) - 2013
Texas Board of Nursing - 2018

6. History of Accreditation by the Association of Technology, Management, and Applied Engineering

The Department of Technology became its own separate department again in the fall semester of 2015. Prior to that date, it was combined with Human Resource Development (HRD) in 2005. At that time, the Department of HRD & Technology had four programs accredited by ATMAE in 2006. Following recommendations by the Administration, the Industrial Safety program was eliminated due to low enrollment, the HRD program is now recognized by the Society for Human Resource Management, and the BAAS program is no longer seeking accreditation and part of either department. In 2012 (the previous ATMAE accreditation visit), only the Bachelor of Science in Industrial Technology program was seeking ATMAE accreditation and is now under the separate Department of Technology. Furthermore, the graduate Industrial Management program is also seeking accreditation for the first time. The Surveying and Mapping emphasis in Industrial Technology is not seeking accreditation.

9. Institutional Mission and Goals

2009-2015
The University of Texas at Tyler Inspiring Excellence Strategic Plan
Vision Statement
The University of Texas at Tyler will be nationally recognized as a destination university for high-ability, flagship-capable students. UT Tyler will be the premiere public university in Texas offering challenging academic programs and an exciting, personal university experience with smaller classes, service opportunities, and a residential, park-like campus that encourages learning.

Mission Statement
The University of Texas at Tyler is a comprehensive institution of higher education offering undergraduate and graduate degree programs as an institution of the renowned University of Texas System. The University of Texas at Tyler’s vision is to be nationally recognized for its high quality education in the professions and in the humanities, arts and sciences, and for its distinctive core curriculum. Guided by an outstanding and supportive faculty, its graduates will understand and appreciate human diversity and the global nature of the new millennium. They will think critically, act with honesty and integrity, and demonstrate proficiency in leadership, communication skills, and the use of technology. The University is committed to providing a setting for free inquiry and expects excellence in the teaching, research, artistic performances and professional public service provided by its faculty, staff, and students. As a community of scholars, The University develops the individual’s critical thinking skills, appreciation of the arts, humanities and sciences, international understanding for participation in the global society, professional knowledge and skills to enhance economic productivity, and commitment to lifelong learning. Within an environment of academic freedom, students learn from faculty scholars who have nationally recognized expertise in the arts and sciences, and in such professions as engineering, public administration, education, business, health sciences, and technology. The faculty engages in research and creative activity, both to develop and maintain their own scholarly expertise and to extend human knowledge. The results of that research and other creative efforts are made available to students in the classroom and to the general public through publication, technology transfer, and public service activities. The institution also seeks to serve individuals who desire to enhance their professional development, broaden their perspectives, or enrich their lives.

Challenges for Students
University students will need to strengthen their practical knowledge and skills in the professions in order to be productive soon after graduation. Given economic realities and global competition, university graduates must have knowledge and skills relevant to the workplace, and must have critical thinking abilities that allow them to adapt to rapid change. University students will face a world vastly different from those of a decade ago. A strong economy and political stability cannot be presumed,
and graduates will have to develop solutions to unforeseen problems. They will need a broad understanding of other cultures, religions, and political systems, and will need to be able to communicate with people unlike themselves. University students will need to develop a sense of responsibility for their own actions, for others, and for their environment. They will need to be able to make decisions based on evidence, and to communicate and defend their positions to stakeholders. They will need to develop leadership skills as well as to learn to be good team members.

**Challenges for the University**

In the last decade, The University of Texas at Tyler has been transformed into a four-year, comprehensive, regional university with a full range of solid undergraduate and graduate degree programs. The challenge now is to distinguish the University among its peer universities so that it may experience continued growth and stability and add substantial value to the economic and civic future of East Texas, the entire state, and the nation.

**Points of Distinction**

*The Honors Program*

The University Honors program provides intellectually stimulating opportunities for academically talented and motivated freshman and transfer students at UT Tyler. The emphasis is on fully developing the capabilities of very talented students, not only enriching their coursework, but providing them significant opportunities to grow as leaders, citizens, and as individuals. They will build their speaking and writing skills, work with scholars to discover new knowledge through research in their chosen fields, meet and share ideas with foremost political, business, and civic leaders, and have study and travel abroad opportunities to interact with new worlds beyond the campus.

Honors students will receive personalized academic advising, interdisciplinary honors courses with top faculty, special programming such as Honors Visitors, opportunities for research, and a variety of international study and travel abroad programs. Upon completion of the programs and graduation, students will receive a special Honors designation on their transcripts.

*Global Awareness through Education (GATE)*

The University will provide students the opportunity for multidisciplinary exploration of global issues through the GATE program: Global Awareness through Education: Living and Learning Communities. We will increase opportunities for students to study abroad, for international students to enroll in University undergraduate and graduate programs, and for students to be exposed to global and cultural issues in their programs of study GATE will bring together a diverse group of students in a living and learning community. These students will be broadly engaged...
in globally enhanced learning opportunities and cross-cultural experiences. GATE’s objectives will be achieved through the integration of three curricular enhancements: 1) global learning communities, 2) on-campus programs focusing on globally enriched core courses, and 3) off-campus programs, including study abroad, international courses, and international internships.

**Information Literacy**
Faculty members and professional librarians at The University of Texas at Tyler believe that the ability to evaluate and incorporate information strategically will be critical in creating a competitive advantage for students. Graduates will be skilled in locating, evaluating, and effectively using and communicating information in various formats. They will be aware of the economic, legal, and social issues concerning the use of information and will be able to access and use information ethically and legally. Within this comprehensive information literacy effort, the University will strive to develop the ability of its students to use information technology effectively in their work and daily lives. UT Tyler’s information systems will be state-of-the-art and will serve as the central hub influencing, supporting, and integrating academic and administrative processes across the University.

**University of Texas System Support**
The University of Texas at Tyler will continue to take advantage of its position as a member of the renowned University of Texas System and as an institution supported by the State of Texas. UT Tyler, for the intermediate term, is classified a Masters Level I institution with selected doctoral programs. The University will continue to be a comprehensive, coeducational, high-quality institution with moderately selective admissions standards. The Strategic Plan that follows complements the UT System’s strategic plan, which includes five major categories: 1) Enhancing student success, 2) Increasing research, global competitiveness, and technology transfer, 3) Enriching society through arts and cultural contributions, 4) Improving productivity and efficiency, and 5) Assuring integrity, accountability, and public trust.

**The Planning Process**
Strategic planning to meet the needs of our students actually began more than a decade ago. Using ideas expressed by students and focus groups that included civic, business, and educational leaders from across East Texas and The University of Texas System, the Strategic Planning Team worked together to build a long-range plan for the University.

The plan has been evaluated over time, with the current process of strategic planning beginning during the 2006-2007 academic year with excellent work done by a committee appointed by the President to develop
a student retention plan. Part of the charge was to assess the University’s academic and campus life to determine areas of strength and opportunities to improve. The University continued its planning process by gathering additional information from campus constituencies through focus groups with students in the 2007-2008 academic year. Also in January 2007, the University brought in a creative ideation facilitator from Buffalo State University to conduct a planning retreat with administrators, faculty, staff, and students. In the fall of 2008, the University continued the planning process by holding a strategy session with faculty, students, and staff, and continued the discussions virtually. Participants were invited to develop goals, strategies, and tactics for the new Strategic Plan. After much discussion, collaboration, and refinement, UT Tyler’s new vision for the next six years emerged. The resulting plan recognizes the University’s excellence and traditions and is grounded on the successful implementation of the University’s 2000 New Millennium Vision. The New Millennium Vision outlined a direction that has proven nothing short of revolutionary in scope. Over the years, we adhered to guiding principles that, thus far, have withstood the test of time. Today, they remain the cornerstone of our new effort to revise and update our strategic plan for the next six years.

**Guiding Principles and Beliefs**

*University*
We will promote inquiry and academic freedom.
We will work together to be productive and achieve excellence.
We will serve the public interest.
We will promote stewardship of all resources.
We will display ethical behavior.

*People*
We will display civility in all relationships.
We will foster respect for all individuals and all racial and ethnic groups.
We will be honest in all interactions and value integrity highly.
We will be accountable for results and professional behavior.

*Process*
We will share governance and promote cooperation throughout the institution.
We will promote openness and trust in all relationships.
We will commit to quality and continuous improvement.
We will recognize personal and professional development and accomplishment.
Inspiring Excellence 2009-2015

The six major goals that came out of the strategic planning process that built on the New Millennium Vision, and adhered to the Guiding Principles, are:

1. UT Tyler will become nationally known for excellence in undergraduate and graduate programs
2. UT Tyler will promote excellence in scholarship, research, creative endeavor, and innovation
3. UT Tyler will serve the community of East Texas and beyond
4. UT Tyler will cultivate and inspire through the fine and performing arts.
5. UT Tyler will enhance the quality of campus life
6. UT Tyler will maintain outstanding stewardship of University resources

As we move forward, we will continue building on our framework in six key areas: Teaching and Learning, Research, Service, Arts and Culture, Campus Life, and Stewardship of Resources.

Goal One: TEACHING AND LEARNING

UT Tyler will enhance student success, becoming nationally known for academic excellence in undergraduate and graduate programs.

UT Tyler will enhance student success, emphasizing excellence in undergraduate and graduate programs; employing dynamic educators; a variety of innovative pedagogies consistent with Boyer's paradigm of “the scholarship of integration; the scholarship of application; and the scholarship of teaching” (Scholarship Reconsidered, 1990, p. 16); challenging course work; and unusual learning opportunities that promise success for a broader spectrum of learners. UT Tyler's core curriculum includes courses from a variety of disciplines that require students to enhance their critical thinking skills; understand ethical systems; acquire knowledge and its application to the exploration of social, economic, cultural, or scientific issues; and effectively communicate. To these ends we will employ the following strategies:

Curriculum

Create in every college new or redesigned programs of superior quality and relevance that foster intellectual inquiry and critical thinking and that prepare students to be innovative and successful citizens in a global society.

Create transformational learning opportunities such as student assisted research, study abroad, or service learning that actively engage students in the discovery, expansion, and application of knowledge within their disciplines, across disciplines, and with respect to global issues.
Develop students’ communication skills in both written and oral forms through instruction and practice in activities such as publication, research presentations, colloquia, and debates.

Instill commitment to global citizenship by developing curricula that enhance students’ understanding of the worldwide community of people and cultures.

Extend opportunities for technological and scientific knowledge and fluency and increase students’ participation in disciplines related to Science, Technology, Engineering, and Mathematics (STEM).

Develop an honors program for high-ability students that offers challenging cross-disciplinary course work, leadership training, and unique opportunities for personal growth.

Add high-demand new programs such as environmental studies, health administration, media studies, and graphic design.

Implement a system of formal periodic reviews of each degree program to assure that it fulfills the needs and engages the interests of our students.

Strive to be both efficient and effective in delivering academic programs.

**Support**
Use academic advising creatively to help students form and follow their own educational and professional goals.

- Support student learning by encouraging utilization of existing systems such as the Writing Center, Robert R. Muntz Library, The Mathematics Learning Center, Supplemental Instruction, and Student Learning Communities.

- Proactively attend to student success through early monitoring and positive intervention for students struggling academically.

- Use relevant technologies in academic activities when and wherever possible, ranging from research and problem-solving to communication.

- Offer opportunities for students to graduate with enhanced credentials, including travel, study abroad, and internships related to their field.

- Develop more scholarships and fellowships and explore other forms of compensation for TAs and RAs.
Form partnerships with graduate degree-granting institutions in order to offer easy acceptance and transition to doctoral programs.

**Faculty**
Attract and support dynamic and inspiring teaching faculty.

- Attract and retain faculty with distinguished research or creative profiles, or with potential to become distinguished and productive scholars.
- Encourage and reward faculty who achieve balance in teaching and research or creative activities.
- Develop a campus-wide learning effectiveness center that offers information and guidance for faculty members on topics such as learning assessment and technological resources.
- Improve compensation of faculty whenever possible by raising salaries, using merit and equity funds, and increasing the number of endowed chairs.
- Provide more opportunities for professional development, including semester leaves and travel funds.

**Recruiting**
Implement recruiting and retention programs to significantly increase diversity in the student population—including students from outside the U.S.

- Recruit more high-ability freshmen, sophomores, and transfer students.
- Recruit and retain more quality graduate students.
- Recruit and retain a more diverse faculty.
- Proactively recruit outstanding teachers and scholars in targeted fields.

**Goal Two: RESEARCH**
**UT Tyler promotes excellence in scholarship, research, creative endeavor, and innovation.**

*UT Tyler promotes an enterprising, faculty-driven research environment that produces new knowledge, enhances teaching and learning, and addresses local and societal challenges.*
Leadership
Promote research, scholarship, and creative endeavors in every academic discipline.

- Generate research funding for breakthrough advancements or outcomes that can positively impact those around us.
- Contribute to human and intellectual diversity by advancing research projects addressing global issues.
- Design and execute research projects that develop local collaborative partnerships or that have the potential to contribute to local economic development.
- Create and support graduate programs with effective research initiatives.
- Create a formal undergraduate research initiative.
- Demonstrate the highest standards of ethics and integrity in all research enterprises.
- Establish distinctive research centers and institutes, especially those that collaborate with local entities. Plans include a Center for Research Excellence in Community Health, a Center for Reading and Learning, and a Center for New Media and Digital Arts.
- Increase the number of endowed chairs and international scholars.

Support
Aggressively seek grant support for faculty research projects and graduate programs.

- Seek research partnerships with other universities, companies, and nonprofit organizations in Texas, the nation, and worldwide.
- Create a superior research infrastructure as a model for effectiveness, efficiency, and responsiveness.
- Develop a top-tier library for research and education with high quality information professionals, a global collection, and featuring the latest innovations in technology.
- Increase the number of conferences and publications with national and international reach that are hosted and supported by UT Tyler.
- Provide opportunities for off-site faculty research.
Nurture emerging talent through increased use and support of graduate assistants.

Launch aggressive marketing, advertising, and promotional campaigns to highlight UT Tyler’s accomplishments in research, scholarship, and creativity.

**Goal Three: SERVICE**

**Serve the community of East Texas and beyond.**

*UT Tyler will work to enhance opportunities for our students to learn and develop their leadership skills through service to the community and make sure East Texas benefits from our educational, research, and creative activities. Plans targeted in this effort include:*

**Leadership Training and Service Learning For Students**

Create internships and service learning projects that provide students opportunities to learn and grow personally.

- Encourage opportunities for students to work with alumni and other local leaders in business, government, education, philanthropy, and non-profit organizations.

Provide education and training in leadership to students, faculty, and staff by bringing in leaders from a variety of backgrounds through mentoring programs, the Distinguished Lecture Series, colloquia, seminars, and teleconferences.

- Sponsor campus-wide discussions of ethics, responsibility to others, and civic engagement.

- Establish student and faculty speaker’s bureaus.

**Community Projects**

Serve the community and promote economic development through research and creative activities that are community-based, project-oriented, and problem solving.

- Seek opportunities to form new service relationships throughout the area, partnering with educational organizations, not-for-profit groups, and corporations.

- Establish research centers that serve regional educational, health, and economic needs, such as a Center for Reading and Learning, Center for
Interdisciplinary Health Studies, and Center for New Media and Digital Arts.

Help to build a community of life-long learners in East Texas by establishing a university-level continuing education program.

Offer summer camps to area junior high and high school students in the STEM disciplines (science, technology, engineering, and mathematics) to encourage students to consider careers in those fields.

Encourage faculty to develop community-based and project-oriented research and educational services that can be extended to East Texas cities, counties, school districts, or other public bodies.

Maintain and further expand UT Tyler’s role as the cultural center for East Texas and the primary forum for exchange of ideas by continuing to offer and expand its world-class lecture series and performing arts series.

Developing our Regional Campuses
Enhance the effectiveness of regional campuses by improving their integration into main campus activities.

Construct a new building at the Palestine campus to better serve that area.

Extend the reach of our communications about UT Tyler’s economic, academic, artistic, cultural, and athletic programs and opportunities to the communities in East Texas near our satellite campuses.

Partnering with Local Educational Entities
Develop strong ties with primary and secondary schools in the region, promoting common educational interests through initiatives such as the P-Council, Minds-Matter, and graduate certificate programs for teachers.

Host academic conferences on school performance, inviting speakers from organizations such as the Education Trust in Washington, D.C.

Develop enhanced working relationships between UT Tyler and other higher education institutions in the East Texas area.

Goal Four: ARTS AND CULTURE
Promote the Arts and Culture on Campus and in the Community.
Recognizing the importance of a culturally rich society, The University of Texas at Tyler is committed to cultivating and inspiring students through the fine and performing arts and contributing to the cultural life of East
Texas. *Specifically, the University will support the arts and culture by implementing programming initiatives and enhancing facilities.*

**Programming**

Raise the profile of student performances and exhibitions.

- Create inventive programs to increase campus and community engagement and attendance at student performances and exhibitions.
- Incorporate the arts into the University’s ceremonies and events when appropriate.
- Develop appreciation of the arts globally and the role of art in other cultures.

Challenge established perceptions of the fine and performing arts.

Establish a Center for Excellence in Fine and Performing Arts that complements

**UT Tyler’s educational mission.**

Increase the number and breadth of performance groups and increase financial support of existing performance groups.

Establish an endowment for the R. Don Cowan Fine and Performing Arts Center to support its mission of providing programming to the region.

**Facilities**

Expand the R. Don Cowan Fine and Performing Arts Center to includes a 300- to 400-seat auditorium, an adequate stage, and rehearsal space.

Consider unique arts space requirements when planning all capital improvements.

**Goal Five: CAMPUS LIFE**

**Enhance Quality of Campus Life.**

*Recognizing that our students, faculty, and staff are the life of the institution, UT Tyler is committed to creating a vibrant campus life for them that addresses the needs of the whole person. To enhance the sense of community and deepen engagement in campus life at UT Tyler, we will provide or enhance amenities, services, security, communication, and leisure opportunities for all members of our university family.*
**Communication**
Host town hall-style meetings with students, faculty, and administration to collect input and exchange ideas on key issues.

Improve the use of campus media such as the campus newspaper, Blackboard, blogs, and e-mail to announce policies and events. Provide a more friendly and accessible e-mail system to students and employees.

Promote opportunities for faculty and students to engage outside the classroom.

Provide wireless connectivity from any location on campus.

Establish a campus Internet radio station.

**Campus Activities**
Raise awareness of and access to student performances and athletic events.

Develop a greater sense of community among graduate students with a graduate student support center that addresses their unique needs.

Offer popular games and a variety of student-selected entertainment activities in the University Center.

Increase weekend and leisure activities, paying particular attention to constituents of a broad range of cultures and with a variety of interests.

Create campus-wide activities that can become traditions and that will promote camaraderie among students and enhance students’ identification with their *alma mater*.

**Facilities and Services**
Provide expanded health and wellness facilities and initiatives for all members of the UT Tyler community, utilizing and helping to expand the knowledge and skills of faculty and students in pertinent colleges and disciplines such as Kinesiology and Nursing.

Offer convenient, affordable daycare utilizing and helping to expand the knowledge and skills of faculty and students in pertinent colleges and disciplines such as Education and Nursing.

Provide postal, banking, and copying services at a convenient location and with expanded hours.
Provide a variety of meal options for students, staff, and faculty, including a Faculty Club.

Construct an alumni center with space to house career services and interview facilities and space for the necessary campus entertaining of special supporters of the University.

Increase signage, lighting, and the number of campus security personnel.

Monitor the campus warning system to ensure that the best practices are employed.

**Outreach**

Provide opportunities for our campus neighbors to participate in on-campus activities, including an annual open house for neighbors.

Promote retail development near the campus

Promote stronger connections between alumni and the University.

**Goal Six: STEWARDSHIP**

*Maintain outstanding stewardship of university resources.*

*UT Tyler is committed to responsible use of its financial and natural resources. We will ensure proper management and allocation of funding, preserve our natural and built environment, and work to protect our campus for generations to come. Strategies to these ends include:*

**Budgeting**

Ensure efficiency and transparency in all financial affairs by employing zero-based budgeting, convening annual budget hearings, and using System, State, Federal, and University auditors.

Conscientiously monitor contractual, legislated, and other agreements and obligations.

**Information Management**

Acquire hardware and software necessary to accomplish the University’s mission, including full installation and operation of PeopleSoft and upgrading of Blackboard.

**Administrative Functions**

Create a communication plan and policies to foster working relationships among administrative and academic units.
Monitor and regularly update faculty and staff training.

Encourage partnerships among units to share services, expensive equipment, and other resources.

**Seek Opportunities to be Entrepreneurial**
Encourage and optimize research collaborations between faculty and community business leaders that will result in development of profit centers.

Educate researchers about commercialization opportunities.

Encourage development of continuing education programs, and other entrepreneurial ways of delivering education to the region.

**The Campus**
Retain and enhance the park-like quality of the University’s campus through management of our existing spaces and purchase of adjacent properties as opportunities arise.

Develop and monitor a schedule to maintain campus buildings.

Encourage foot and bike traffic on campus by developing footpaths and bike paths and design parking to protect green space.

**Be Green**
Endeavor to “be green” in all our operations and use of energy, including the initiation of a campus-wide recycling program and provision of convenient ways for the community to conserve.

Encourage understanding of environmental issues, methods of conservation, and green technologies among students, staff, faculty, and throughout the East Texas community.

**Draft 2015-2025 Strategic Plan**
The next strategic plan was only a draft and it was entitled *The University of Texas at Tyler Strategic Plan 2015-2025*. It was in the process of being approved when the university president, Dr. Rod Mabry, announced his retirement. During that time the new president, Dr. Michael Tidwell, noted that the university would be working together on a new strategic plan and the timeline is as follows:
2016 From the Office of the President

The University of Texas at Tyler Strategic Plan

What is Strategic Planning?

Strategic planning is the process of developing a vision and plan for the future of UT Tyler. Since January 2017, following the arrival of the University's fourth president, Dr. Michael Tidwell, the University has been going through the process of creating a plan to take the university forward through the next five years.

Timeline

Spring 2017
University leaders have been gathering input from the University community. More than 30 conversations were held around the campus with faculty, staff, students, and community members. The conversations centered around the following 11 topics:

- Career and Placement Services for Students
- University Centers of Excellence
- Enhancing Community Partnerships
- Supporting Regional Economic Development
- Faculty and Staff Training and Development
- Internationalization
- Marketing and Branding
- New Academic Programs
- Student Extracurricular Experience
- Student Qualifications and Recruitment
- University Mission

Summer 2017
The University Leadership Team will review all the input from the Strategic Planning meetings and develop a DRAFT of the plan. University faculty and staff will be polled through the summer months for additional input, as needed.

Fall 2017
The draft of the strategic plan will be presented to the University Community for further input.

Spring 2018
The UT Tyler Strategic Plan is presented to the UT System Board of Regents for approval. Following Board approval, the plan goes into affect.
New Strategic Plan for 2018-2022

VISION STATEMENT
Our aspiration is to be the primary educational and economic driver of East Texas.

MISSION STATEMENT
UT Tyler is committed to student success by providing a uniquely balanced student experience in an environment of innovative teaching and research shaped to serve and advance the educational, economic, technological, and public interests of East Texas and beyond.

Initiatives for Success
The initiatives that make up the action items of this strategic plan were culled from an open submission process, where all faculty and staff were encouraged to generate innovative ideas to advance the newly articulated vision and mission of UT Tyler. The initiatives have been sorted into the four pillars of success, and further sorted by areas of impact under each pillar. Brief summaries of each initiative follow in the next four sections. We believe the passion that the people of The University of Texas at Tyler will bring to these initiatives will yield successes for our students, our communities and all of East Texas.

Pillar I: Student Success
The initiatives of Pillar I focus on supporting educational and career goals with high impact, data-driven solutions.

Strategic Goal:
Catalyze student retention, graduation and career progression.

Impact Area: A Campus Community Focused on Student Success
We will reaffirm our commitment to growing a student-centered campus culture.

Initiative 1. Provide Student Service Training.
Opportunities for student service training will be available to all faculty and staff of The University of Texas at Tyler to support our core initiative to be a student-centered campus wholly focused on student success.

Impact Area: Supporting Academic Success from Recruitment to Graduation
We will launch data-driven programming to help improve our recruitment, persistence and graduation efforts.

Initiative 1: Establish the OnCourse Program for FTFT Freshmen.
UT Tyler will launch a suite of course-level supports to improve the first-year grade point averages and retention of first-time, full-time freshmen, and ultimately increase their graduation rates. This will include a series of on-demand digital course-related supports in first-year classes along with professional development for faculty.

Initiative 2: Encourage Adoption of Open Educational Resources.
The cost of textbooks can be a prohibitive factor for students. The university will create a faculty incentive grant program to support the adoption of OER, which include freely accessible textbooks, workbooks and other course materials.

**Initiative 3: Pilot On-demand Degree Programs.**
This initiative will be piloted with the RN-BSN program, which provides a baccalaureate degree to registered nurses who hold associate degrees. On-demand programs will offer a flexible alternative for working students pursuing a second degree or graduate degree from UT Tyler. This program differs from the accelerated seven-week programs in that it has much more flexibility to accommodate the working/professional student.

**Initiative 4: Redefine and Broaden the Recruitment Funnel.**
UT Tyler seeks to improve the academic preparedness of its students to increase retention, persistence and student success. We are implementing changes to the freshman holistic admission review criteria; redefining and expanding our communication plan; and hosting regional events to recruit students ranked in the top 10 percent of their class.

**Impact Area: Innovative, Student-Centered Teaching**
Our faculty will be properly equipped to deliver learner-centered teaching.

**Initiative 1: Provide Professional Development for Faculty Emphasizing Learner-centered Teaching.**
The UT Tyler Center for Excellence in Teaching and Learning will provide faculty with resources and opportunities including comprehensive workshops, conferences and seminars on best practices for student-centered teaching.

**Impact Area: Funding Success**
We will expand grant- and scholarship-based financial aid.

**Initiative 1: Align Financial Aid Programs to Enrollment Management Strategies.**
UT Tyler seeks to recruit and retain high ability students with financial aid incentives. Those include leveraging institutional, state and federal grants in conjunction with scholarship redesign. Undergraduate new student scholarship criteria, award amounts and processes will be implemented to align with our desired student academic profile.

**Impact Area: Position Every Student for Career Success**
Career success begins with intensive coaching and career services for students.

**Initiative 1: Establish Career Placement Services Within Each College.**
UT Tyler career services will be expanded with the creation of an Office of Career Placement Services in each college. Each office will provide students with career path information, career building opportunities and placement services relevant to fields of study within the college.

**Initiative 2: Establish Mentoring Programs.**
In partnership with UT Tyler Alumni Relations and University Advancement, the College of Engineering will form a pool of professionals in engineering industries to mentor students and expose them to best professional practices in the workplace. The College of Education and Psychology will establish a mentor center to support student retention and ultimately position students to launch successful careers.
Graduate assistants trained to provide academic, social and emotional support will staff the center.

Initiative 3: Initiate Honors 360.
The UT Tyler Honors Program will implement a holistic approach to engaging honors students, including advising, peer mentoring, career counseling, experiential learning and academics. Combining these strategies will impact graduation and retention rates to position students for success.

Initiative 4: Create Student Success 360.
Implemented through UT Tyler’s Student Success Division, Student Success 360 will be designed to strengthen each student’s ability to engage through a unified communication platform. It also will serve to augment the student’s sense of belonging and promote academic success, personal development and financial literacy.

Pillar II: Student Engagement
The initiatives of Pillar II are meant to ensure each UT Tyler student has access to a rich, individualized educational experience

Strategic Goal:
To stimulate the growth of traditions and programming that engages students in unique and compelling ways.

Impact Area: Encouraging Student Involvement in Research & Discovery
We will promote the UT Tyler student experience by incentivizing engagement in faculty-led research.

Initiative 1: Implement Incentive Programs to Support Student Involvement in Research.
Incentives are being developed in several colleges to support student engagement in faculty-led research, and the expansion and strengthening of internal grants.

Impact Area: Connecting Students with Successful Alumni
Creating opportunities for students to connect with alumni from their discipline/field will improve student engagement.

Initiative 1: Design and Deliver the Alumni Career Success Conference.
UT Tyler will hold an annual one-day event in which alumni will be invited to campus to share their stories and advice to business students. The event will foster career-focused engagement of students and engagement of alumni with the university. Additionally, colleges will work to develop innovative activities to connect their alumni with current students.

Impact Area: Connecting Students to Campus
We will stimulate the growth of student clubs, participation in the arts and general student development.

Initiative 1: Formalize a Student Organization Activity and Engagement Contest.
The College of Engineering will create a yearlong tournament of student organization activities, which will be scored on a rubric based on participation, quality and impact. The contest will be designed to increase faculty-to-student and student-to-university connectivity while enhancing opportunities for career and professional interactions.
Initiative 2: Provide Opportunities for Students to Attend Annual Arts Education Performances.
The Cowan Fine and Performing Arts Center will provide opportunities for UT Tyler students to attend Arts in Education Series performances. Student attendance will be integrated into university course curriculum.

Initiative 3: Create Distinguished Lecture Series Engagement with Honors Students and Faculty.
Through the Cowan Center, students in the UT Tyler Honors Program will have opportunities to attend Distinguished Lecture Series events followed by a post-lecture discussion with faculty members. Students will report back to their professors as part of their course curriculum.

Initiative 4: Graduate Student Workshops.
The university will establish a Graduate Student Professional Development Center, which will sponsor a Workshop Series with Live Zoom and on-demand recorded workshops on topics relevant to graduate students. Programming will include networking, social and special events; panel discussions with industry professionals and alumni; and international student development programs.

Initiative 5: Pursue the Advancement of Athletics from NCAA DIII to NCAA DII.
The university is moving forward as a candidate for Division II membership. The successful transition to DII will elevate student enthusiasm for athletics with more exciting, competitive events.

Impact Area: Improving Campus Accommodations for Students
We will expand campus facilities in ways that promote success and engagement.

Initiative 1: Launch a Campus Master Plan.
The university will form a new master plan of facility improvements to enhance student life and engagement as well as the overall student experience on campus.

Initiative 2: Create “Third Spaces” for Student Engagement Around Campus.
UT Tyler will enhance existing and create new third spaces — social areas designed for organic engagement, innovation and discovery.

Pillar III: Research and Scholarship
The initiatives of Pillar III will foster discovery through scientific, technological, intellectual and creative expression.

Strategic Goal:
To endorse discovery that expands knowledge and transforms East Texas.

Impact Area: Expanding the Field of Knowledge
We will incentivize research that expands knowledge in ways that connect the campus to the region.

Initiative 1: Launch an Early Career Tenure-track Faculty Research Support Fund.
The Soules College of Business will make grants available to support the research of tenure-track faculty and expand the field of knowledge in business and technology. Progress will be measured in the increase of journal articles published.

Initiative 2: Develop a Health/Wellness Interdisciplinary Research Collaborative.
The College of Nursing and Health Sciences, College of Education and Psychology and Fisch College of Pharmacy are working with the Faculty Senate to expand
interdisciplinary research at UT Tyler. A range of complex health and wellness-related problems exist in the greater East Texas area, requiring this type of interdisciplinary approach to produce positive outcomes.

*Initiative 3: Foster Research Programs Targeting Health and Wellness in East Texas.*

A UT Tyler center for health and wellness will be developed to improve the quality of life in East Texas. This effort, led by the College of Nursing and Health Sciences, is a collaboration with the Fisch College of Pharmacy and the College of Education and Psychology. The primary center will be located near the Tyler campus, with satellite centers developed in high-need areas of East Texas.

The university will fund publication fees for faculty, students and staff who publish in quality Open Access Journals. This will ensure the scholarship of our university is openly accessible.

**Impact Area: Expanding Student Research Activities**

We will increase the use of student research as a tool for engaged learning, critical thinking and the creation of knowledge.

*Initiative 1: Provide Workshops to Guide Students through the Research Cycle.*

Honors Program faculty and staff will host an annual series of workshops covering various aspects of the research cycle. Open to all students, the workshops will promote a culture of strong student research at UT Tyler.

*Initiative 2: Create Graduate Assistantships Across All Programs.*

The Division of Academic Affairs is making semester teaching assistantship stipends available to thesis-track students in each college. Nominated by faculty, students awarded the stipend will be committed to completing a thesis. Faculty will be committed to supporting the graduate assistant’s thesis work.

*Initiative 3. Implement Grad School 180.*

The university will launch a Three-Minute Thesis type event for dissertations, master’s theses and graduate projects to promote knowledge creation and enhance student success and engagement. Participants will present their research to a live audience and online. The event will include a Graduate Student Excellence in Visual Arts Award.

**Pillar IV: Community Engagement**

Pillar IV initiatives will encourage local and regional collaborations and partnerships with governmental entities, businesses and nonprofit organizations to improve the quality of life in our communities.

Pillar IV initiatives will encourage local and regional collaborations and partnerships with governmental entities, businesses and nonprofit organizations to improve the quality of life in our communities.

**Strategic Goal:**

To successfully deploy the university’s intellectual capital to address regional needs.

**Impact Area: Improving East Texas’ Economic Diversity**
We will connect the region to the university’s intellectual capital to improve economic
development.

*Initiative 1: Strengthen and Expand Partnerships Between Academic Units and
Regional Organizations.*

This initiative includes enhancing the Soules College of Business partnership with
the Tyler Innovation Pipeline (TIP), which is operated under the auspices of the city
of Tyler. The college will provide its expertise by serving as co-director of TIP, with
UT Tyler technology students operating the program’s Maker Space.

*Initiative 2: Launch the East Texas Policy Summit.*

The university will bring together the top leaders in business, government, education
and the nonprofit sector for substantive conversations about leveraging regional
resources to advance economic development throughout East Texas. The East
Texas Policy Summit will be an annual event.

*Initiative 3: Diversify procurement of products and services in all areas of campus.*

The university will maximize opportunities for Historically Underutilized Businesses
companies to provide services, materials, supplies and equipment to serve the
needs of the campus.

**Impact Area: Educational and Cultural Engagement**

We will launch lifelong learning and continuing education opportunities for the
region.

*Initiative 1: Create a Hearts for the Arts Program.*

The UT Tyler Cowan Center has been a major contributor to the arts and cultural
fiber of the region. Hearts for the Arts will be an outreach program for those who
have not had the opportunity to experience the arts. Donors will be matched with
recipients for a select number of shows annually.

*Initiative 2: Support Free Course Voucher for UT Tyler Alumni.*

To encourage lifetime learning in the region, the university will send a UT Tyler-
branded graduation gift to all of its graduates, along with a free course voucher that
can be redeemed by the alumnus or shared with a friend.

*Initiative 3: Strengthen the Project Lead the Way Partnership to Promote STEM
Engagement.*

The College of Engineering will partner with PTLW at the high-school level to
promote dual credit opportunities available to pre-college students. Pre-engineering
students will have opportunities to receive college credit while increasing their STEM
readiness.

*Initiative 4: Establish an Adopt a School District Program.*

The College of Education and Psychology’s East Texas Center for School Based
Research and Instruction will provide high quality professional development
opportunities for school districts to increase K-12 student achievement. School
districts throughout Northeast Texas will be invited to be members of the center and
receive its services.

*Initiative 5: Launch Comprehensive Overnight Summer Camps.*

The university will engage the youth of East Texas in educational and recreational
camps in several areas of campus, including athletics, academic units, the Honors
Program and the Cowan Fine and Performing Arts Center.
Any successful plan builds new initiatives on a foundation of operational support. The elements of these operational foundations support success, and we expect to continue to enhance these tools as part of this five-year plan. One could consider this a fifth pillar of the plan, supporting the other initiatives behind the scenes, as we work toward institutional success.

**Strategic Goal:**
To operate using effective, efficient and creative strategies.

**Impact Area: Design and Launch New Centers of Excellence**
The University of Texas at Tyler faculty and staff will work together to design and launch new Centers of Excellence. A successful center of excellence will interconnect the four pillars of the strategic plan in a unique and innovative manner, cutting across multiple academic and support units on campus. This will bring together different constituencies of the university including members of the community to help elevate the brand of the university at a national level.

**Impact Area: Support College and Departmental Faculty and Staff Development**
Recognizing that faculty and staff play an important role in student success and student engagement both in and out of the classroom, the university will invest resources in their professional development. UT Tyler will form communities of practice (learning communities) as campus experts and stakeholders come together with a shared interest in one focal area. These areas will tie to the four pillars of the strategic plan, ultimately developing the culture of teamwork across campus with high-impact practices.

**Impact Area: Create New Marketing and Advancement Strategies**
Recognizing the significance that marketing and advancement play in meeting our institutional goals, both units will be realigned and reorganized with a new focus on brand management and alumni engagement, respectively. Where appropriate, centralization should occur to realize operational efficiency, quality improvements and better adherence to industry best practices.

**Impact Area: Initiate Sustainable Financial Management Strategies**
The University of Texas at Tyler is committed to a sustainable financial model in support of the strategic plan. Steps taken to ensure this support include:
- Realignment of departments and divisions to ensure effective operations and organizational communication;
- Adopting a philosophy of having highly developed and motivated employees for a workforce of quality personnel rather than quantity;
- Continuous analysis to ensure the best use of faculty resources through course scheduling and class size guidelines;
- Revised budgeting practices that make the best use of all available financial resources;
- A commitment to continuous improvement efforts toward increased efficiency, a paperless environment, automated processes and reduced costs;
- Efforts to work with the UT System on initiatives to leverage the size of the University of Texas System to obtain better pricing for commonly purchased commodities and services.
Impact Area: Create and Sustain IT Infrastructure to Support Strategic Educational Initiatives
The University of Texas at Tyler will work to continuously improve its IT infrastructure to find efficiencies and help improve the business processes and educational initiatives of the university. Additionally, IT will continually assess new initiatives, many of which will be brought online as a part of this strategic plan, to assure they are supported with the appropriate IT infrastructures in the most efficient and effective manner possible.

10. Relationship of Institution to Superior Governing Body
The University of Texas at Tyler is part of the prestigious University of Texas System that includes 14 institutions located throughout the state. Chancellor James B. Milliken is the chief executive officer of the UT System and reports to the Board of Regents. He has direct line responsibility for all aspects of the UT System’s operations. The Board of Regents, the governing body for The University of Texas System, is composed of nine members who are appointed by the Governor and confirmed by the Senate. Terms for Regents are scheduled for six years each and staggered so that three members’ terms will usually expire on February 1 of odd-numbered years. In addition, the Governor appoints a Student Regent for a one-year term.

Throughout the more than 100-year history of the UT System, the Board has been composed of dedicated and distinguished Texans who have been strong advocates of excellence in academic programs, scientific inquiry, and responsible public service. Founded in 1971, UT Tyler today enrolls nearly 10,000 students and consists of seven colleges.
B. Administrative Unit

Standards for Accreditation

Standard 1 - Preparation of Self-Study and campus visit. The Self-Study Report shall follow the guidelines of the Accreditation Handbook version in place at the time of the accreditation application. The report shall be completed by a representative portion of the institutions administrative staff and teaching faculty directly related to the program(s) to be reviewed. Students should be involved in the accreditation preparation process. Representative student transcripts for each program and/or option shall be included in the self-study and made available for the visiting team. Representative examples of student’s management and/or technical graded work shall be available for each course in the Self-study and/or campus documentation room. Examples of textbooks and instructional materials for each management and/or technical course shall be provided for the visiting team.

The self-study report for the Association of Technology, Management, and Applied Engineering accreditation has been an ongoing process since the 2000-2001 academic year. This document is the result of broad participation by The University of Texas at Tyler’s administration, faculty, staff, Advisory Committee, students, and graduates.

The Department of Technology has used the completion of the self-study report as a means to achieve several goals. They include:

- To prepare a self-study report assessing the current practices and procedures used in the Industrial Technology program compared to the standards of the Association of Technology, Management, and Applied Engineering.
- To use the self-study report to identify and assess opportunities for future development and planning.
- To prepare a document which can be used as a format for continued collection and analysis of data regarding the program.
- To prepare a document which can be used to acquaint others with the Industrial Technology and Industrial Management programs.

The process for preparing the self-study report was conducted under the direction of Dr. Mark Miller and involved all the faculty and staff from the Department of Technology.

In addition to the participation of the faculty, staff, and students within the department, the Advisory Committee has provided direction, information, and feedback, which has been beneficial in this self-study report. External information from our graduates and their employers has been useful in the preparation of this document, particularly the information contained in the Graduation and Alumni Surveys. Also of assistance were the following offices on campus which provided needed assistance and data used in this report:

- President's Office
- Provost's Office
- Business Affairs Office
- Dean's Office
- Office of Assessment & Institutional Effectiveness
- Office of Institutional Analysis
This self-study report accurately reflects the Technology program at The University of Texas at Tyler as of February 2019. Examples of student work, textbooks, other instructional materials, etc. will be on display in the department’s conference room for the ATMAE Accreditation Visiting Team to review at their leisure. The Department of Technology faculty and its Advisory Committee are confident that the program meets all professional standards set forth by the Association of Technology, Management, and Applied Engineering.

**Standard 2 - Program Definition:** A program is a set of courses leading to a degree. A program may have more than one option, specialization or concentration, but specific course requirements for each option shall be clearly specified, and as appropriate all program/options shall meet ATMAE standards. In situations where an option is not appropriate for ATMAE accreditation based upon the approved definition of technology, management, and applied engineering, the request for accreditation should clearly state which option, concentration, or specialization is seeking accreditation and which ones are excluded. The case for exclusion should be made with the application for accreditation. If an option, concentration or specialization is excluded and the program becomes accredited, the program must identify specifically which concentrations, options and specializations are and are not accredited in all their publications and promotional materials that mention accreditation. Only institutions legally authorized under applicable state law to provide degree programs beyond the secondary level and that are recognized by the appropriate regional and/or national accrediting agency are considered for accreditation. Evidence must exist that the programs are understood and accepted by the university/college community, and the business/industry community.

**Legal Authorization to Provide Degree Programs**

The University of Texas at Tyler was created by the Texas Legislature in 1971 and became a component of The University of Texas System in 1979, as a result of action by the 66th Texas Legislature. Originally established as an upper-level university, UT Tyler’s mission was expanded in 1997 when the 75th Texas Legislature passed House Bill 1795 authorizing it to offer classes for a restricted number of freshman and sophomore students. The University began the unrestricted admission of freshman in 2002.

The Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) is the regional accrediting body for The University of Texas at Tyler. UT Tyler successfully submitted its 5th year report in the Spring semester of 2016 for SACSCOC as part of its reaffirmation requirements.
Program Inputs:

Standard 3 - Program Title, Mission, and Program Outcomes: Each program/option shall have appropriate titles consistent with the approved ATMAE definition of Technology, Management, and Applied Engineering.

3.1 - The program/option title, definition and mission shall be compatible with the ATMAE definition of Technology, Management, and Applied Engineering. The program/option shall lead to a degree at the associate, bachelor, or master's level.

The Department of Technology has adopted the ATMAE definition of Industrial Technology which was taken from the Classification of Instructional Programs (CIP 2010), code 15.0612. This definition is listed on the U.S. Department of Education Institute of Education Sciences website. The Department's definition is as follows:

Industrial Technology is the field concerned with the application of basic engineering principles and technical skills in support of industrial engineers and managers. The program includes instruction in human factors, organizational behavior, industrial processes, industrial planning procedures, computer applications, and report and presentation preparation.

A mission statement for the Industrial Technology program was derived from the College of Business’ mission statement which aligned with that of the university:

Program Mission Statement: The Industrial Technology program at The University of Texas at Tyler provides its students with a comprehensive educational experience comprised of a vast array of technical skills and business knowledge deemed necessary for successful professional careers. Our high quality, accredited program offers courses online and face-to-face, thereby enabling students the flexibility to earn a degree that fits their schedule. Students from the program will learn from faculty scholars who have nationally recognized expertise in various technologies and engage in research and creative activity.

Until August 20, 1998, the University of Texas at Tyler was an upper division institution. As such, it offered only junior, senior, and graduate level courses. From 1998 until the summer of 2002, restrictions were placed on the number of freshmen admitted to the University. In the fall of 2002, the university began to enroll unrestricted numbers of freshman and sophomore students.

The Bachelor of Science in Industrial Technology has traditionally accepted transfer students from a variety of institutions of higher learning. Many of them have come from the region’s six two-year postsecondary schools. Transfer course work is reviewed periodically by departmental faculty, department chair, college dean, and the vice provost and dean of the Graduate School. Forms to verify this process are kept on file in the department, in the college’s Undergraduate Advising Office, in the Vice Provost’s Office, and the Registrar’s Office.
The Industrial Technology program is founded upon a four-year undergraduate degree requirement comprised of eight semesters of coursework leading the student to an earned baccalaureate degree. The degree satisfies the university core requirements, major field of study requirements, course competency requirements and ATMAE degree foundation requirements.

3.2 - General program outcomes shall be established for each program/option that provides a framework for the development of specific measurable program learning outcomes.

The University of Texas at Tyler has determined that to be an educated person, a student needs certain intellectual skills in order to participate effectively in society and in the workplace. The faculty of the Department of Technology has identified seven general outcomes (further defined into program core competencies) that fulfill the university’s definition of an educated person and simultaneously contribute to the core values of the Soules College of Business. These general program outcomes:

1. Instill confidence with computer software, database, and internet search skills,
2. Cultivate effective oral and written communication skills
3. Promote team-based skills including leadership and conflict resolution abilities,
4. Stimulate critical thinking,
5. Encourage ethics in decision making and behavior,
6. Foster personal accountability for achievement,
7. Provide competence in basic technology skills and principles.

Standard 4 - Program Goals: Each program shall have short and long-range goals, plans for achieving these goals, and document progress of the goals.

The Industrial Technology program goals have been developed to be supportive of the goals and objectives of the University-wide mission statement and the goals and objectives of the College. Both the University and College mission statements changed in 2009 and again in 2018 to align them with changes in the community, SACSCOC reaffirmation standards, and the vision of new administrative personnel trying to improve the University and College. The University faculty, staff, and other support personnel were queried by the University administration to developed goals that were deemed most appropriate to the mission of the University. Departmental long and short-range objectives were developed to implement the mission and goals of the University and College.
Because the mission and goal statements of the University span several years, the program’s goals were broken down into long range and short range goals. The long range goals are derived from those of the University and College and the short range goals break the long range goals down into one or two year deliverables that can be assessed, reevaluated, and revised accordingly. In this way, a feedback loop can be implemented to continuously improve the program.

\[(lro) = \text{Long Range Outcomes} \quad (sro) = \text{Short Range Outcomes}\]

The Industrial Technology program goals are aligned with the relevant goals outlined by the university and college. The University listed six main goals in order to carry out its vision and mission. The program’s goals are aligned with five of the six goals because the University’s Goal 4 deals with arts and culture, specifically listing improvements in the fine arts centers around campus. The current program goals are listed as follows:

**University Goal One: TEACHING AND LEARNING**

*UT Tyler will enhance student success, becoming nationally known for academic excellence in undergraduate and graduate programs.*

- The program will be known to have the same reputation for quality as the best programs in the country (lro).
  - The program will maintain ATMAE accreditation (sro).
  - The program will continue to produce graduates that can pass national certification exams (sro).
  - The program will have state-of-the-art laboratories (sro).

**University Goal Two: RESEARCH**

*UT Tyler promotes excellence in scholarship, research, creative endeavor, and innovation.*

- The program will consist of faculty with excellent scholarly and research records (lro).
  - The program will consist of faculty who publish as required by the Soules College of Business Tenure and Promotion Policy (sro).
  - The program will have at least one research proposal submitted over a three year period (sro).
  - The program will consist of faculty who present at the national level annually (sro).
  - The program will consist of faculty who are known for innovative endeavors (sro).

**University Goal Three: SERVICE**

*Serve the community of East Texas and beyond.*

- The program will provide opportunities for students and faculty to build long term relations with the community of East Texas and beyond (lro).
The program will maintain and expand its Advisory Board to provide input to the program so it can produce graduates that are adequately prepared for the workforce in the surrounding areas and beyond (sro).

- The program will provide internship opportunities for majors in order to better prepare them for real life careers (sro).

- The program will provide opportunities for students to participate in volunteer projects to help the community of East Texas and beyond (sro).

**University Goal Four: ARTS AND CULTURE**
**Promote the Arts and Culture on Campus and in the Community.**

- N/A

**University Goal Five: CAMPUS LIFE**
**Enhance Quality of Campus Life.**

- The program will provide opportunities for students to build long term relations, and camaraderie with peers and faculty to enhance their college experience (lro).
  - The program will create and/or offer a variety of student organizations and honor societies for students to participate in (sro).
  - The program will provide opportunities for students to partake in external field trips to various local, regional, and national events related to the discipline (sro).

**University Goal Six: STEWARDSHIP**
**Maintain outstanding stewardship of university resources. Seek Opportunities to be Entrepreneurial** - Encourage and optimize research collaborations between faculty and community business leaders that will result in development of profit centers.

- The faculty of the program will develop a College wide center, institute, or collaboration with companies of the region to assist them with their training needs (lro).
  - The faculty will provide training sessions to companies throughout the year that will generate revenue for the college and the university (sro).

**2018-2023 University Strategic Plan**

The new university strategic plan is centered around four pillars to ensure student success. The short and long term goals for the program were developed to align with these four pillars. Furthermore, the expected short term and long term goals for colleges and departments are actually written in the strategic plan, therefore, those will be reviewed below.
Pillar I: Student Success
The initiatives of Pillar I focus on supporting educational and career goals with high impact, data-driven solutions.

Strategic Goal:
Catalyze student retention, graduation and career progression.

Impact Area: A Campus Community Focused on Student Success
- The faculty of the program will improve their teaching by some means of training (lro).
  - Faculty of the program will be encouraged to attend at least one sponsored event by the UT Tyler Center for Excellence in teaching annually (sro).

Pillar II: Student Engagement
The initiatives of Pillar II are meant to ensure each UT Tyler student has access to a rich, individualized educational experience

Strategic Goal:
To stimulate the growth of traditions and programming that engages students in unique and compelling ways.

Initiative 1: Design and Deliver the Alumni Career Success Conference.
UT Tyler will hold an annual one-day event in which alumni will be invited to campus to share their stories and advice to business students. The event will foster career-focused engagement of students and engagement of alumni with the university. Additionally, colleges will work to develop innovative activities to connect their alumni with current students.

- Faculty of the program will engage and encourage students to network with alumni from UT Tyler (lro).
  - Faculty of the program will assist with university held programs to promote career success annually (sro).
  - Students of the program will participate in university held programs to promote career success (sro).

Pillar III: Research and Scholarship
The initiatives of Pillar III will foster discovery through scientific, technological, intellectual and creative expression.

Strategic Goal:
To endorse discovery that expands knowledge and transforms East Texas.

Impact Area: Expanding the Field of Knowledge
We will incentivize research that expands knowledge in ways that connect the campus to the region.

Initiative 1: Launch an Early Career Tenure-track Faculty Research Support Fund.
The Soules College of Business will make grants available to support the research of tenure-track faculty and expand the field of knowledge in business and technology. Progress will be measured in the increase of journal articles published.

- Tenure-track faculty will be encouraged to conduct research as required in the College’s Guidelines for Tenure and Promotion (lro).
  - Tenure-track faculty will be expected to submit research proposals annually for college sponsored research grants (sro).

**Pillar IV: Community Engagement**

Pillar IV initiatives will encourage local and regional collaborations and partnerships with governmental entities, businesses and nonprofit organizations to improve the quality of life in our communities.

Pillar IV initiatives will encourage local and regional collaborations and partnerships with governmental entities, businesses and nonprofit organizations to improve the quality of life in our communities.

**Strategic Goal:**
To successfully deploy the university’s intellectual capital to address regional needs.

**Impact Area: Improving East Texas’ Economic Diversity**

We will connect the region to the university’s intellectual capital to improve economic development.

*Initiative 1: Strengthen and Expand Partnerships Between Academic Units and Regional Organizations.*

This initiative includes enhancing the Soules College of Business partnership with the Tyler Innovation Pipeline (TIP), which is operated under the auspices of the city of Tyler. The college will provide its expertise by serving as co-director of TIP, with UT Tyler technology students operating the program’s Maker Space.

- Faculty and students of the program will promote academic partnerships throughout the region (lro).
  - Faculty of the program will assist with the setup of equipment for the TIP (sro).
  - Students of the program will assist patrons of the TIP in making innovative projects by assisting them with the operation of the equipment and software (sro).

*Initiative 5: Launch Comprehensive Overnight Summer Camps.*

The university will engage the youth of East Texas in educational and recreational camps in several areas of campus, including athletics, academic.

- The Department of Technology will provide events for East Texas youth to promote the Industrial Technology program (lro).
Faculty of the program will develop a curriculum for summer camps that will recruit new students to the Industrial Technology program (sro).

Faculty of the program will offer summer camps either annually or biennially (sro).

**Plans for achieving goals:** All goals are developed by Technology faculty at the beginning of the academic school year. Once the goals are reviewed, faculty are assigned specific goals to achieve by the end of the year. Objectives are developed to break down goals into quantifiable units that can be measured and obtained. Goals that are not met are put on the agenda for next year’s faculty meeting prior to the beginning of the start of the semester. Faculty brainstorm strategies for achieving unmet goals or revise the goals so that they are achievable with the resources at hand. Outcomes for these goals are listed in Appendix D under the section Program Goals Status Form.

**Standard 5 - Program Learning Outcomes Identification & Validation:** Measurable program learning outcomes shall be identified, assessed and validated for each program/option. These outcomes must align with the program goals established for the program/option and validation shall be accomplished through a combination of external experts, an industrial advisory committee and, after the program is in operation, follow up studies of direct and indirect measures for each outcome.

The program learning outcomes for the Industrial Technology program were determined from guidance from the university’s Office of Assessment and Institutional Effectiveness, a thorough review of the curriculum from similar ATMAE accredited Industrial Technology programs, input from the program’s Industrial Advisory Board as well as input from the faculty and students. These general program outcomes include characteristics that distinguish the program from other programs at the university. These unique traits are reviewed annually and continuous improvement measures are implemented to properly prepare students for gainful employment.

**Program Learning Outcomes**

Industrial Technology students at the time of graduation will be able to:

1. identify the proper materials and manufacturing processes used to fabricate a specific part;
2. understand and use technical software, data sources, and automation such as CAD, CAM, CNC, PLC’s, and robotics;
3. demonstrate a thorough knowledge of current management and supervisory practices;
4. prepare well-organized and mechanically correct documents in order to plan production;
5. apply and follow recommended safety standards, and;
6. understand facility layout and the management of supply chains.

Standard 6 - Program Structure & Course Sequencing: Each program/option shall meet minimum foundation semester hour requirements. Programs/options may exceed maximum foundation semester hour requirements specified in each area, as long as minimums are met. A specific list of courses and credit hours that are being counted toward each category shall be included in the Self-Study Report (please use the attached Table C). Institutions utilizing quarter hours shall convert the course work to semester hours (hours based on Federal Regulations).

The Industrial Technology meets the minimum number of credit hour requirements for AMTAE accreditation and it also does not exceed the maximum number of credit hours allowed for each category as illustrate in Table C.

NOTE: Programs in manufacturing at the Associate, Baccalaureate and Masters levels should review and consider for adoption as a quality improvement tool, the SME 4 Pillars of Manufacturing as may be appropriate for their respective Programs. ATMAE Accreditation has formally adopted this concept for use as a model quality improvement tool and encourages manufacturing programs to utilize components that apply to their programs. The Pillars are applicable to both technical manufacturing and to manufacturing management curricula.

6.1 Program Minimum Curricula Foundation

B. Bachelor’s Degree: Programs/options shall be a minimum of 120 semester hours and shall meet the following minimum/maximum foundation semester hour requirements:
General Education (must include oral and written communications)....18-36
Mathematics ..........................................................6-18
Physical Sciences* ..................................................6-18
Management and/or Technical .......................................42-60
Electives ......................................................................0-18

*LIFE Sciences may be appropriate for selected programs of study.

Note: Students must successfully complete a minimum of 15 semester hours of junior or senior level major courses at the institution seeking accreditation.

6.2 - Appropriate laboratory activities shall be included in the program/option and a reasonable balance shall be maintained between the practical application of “how” and the conceptual application of “why.” Master's degree programs and/or options may not
have formal laboratory activities, but must maintain a balance between the practical application of “how” and the conceptual application of “why.”

As part of the Institutional Planning Process, the Department has set an objective of requiring at least 50% of all scheduled courses taught to require student use of information technology equipment and software. This objective has been achieved and the percentage is increasing annually. In addition, all faculty are now required to maintain an online Canvas LMS site for each of their courses in which they post grades, course documents, and assignments throughout the semester. Moreover, students are required to turn in assignments electronically through Canvas and myUTTyler. As a result, a proper balance between theory and practical applications has been achieved.

One of the strengths of the Industrial Technology program is the infusion of laboratory activities and practical application along with cognitive knowledge. In most of the Technology courses, there are specific activities used to balance the application and theory portions of the class. The relative proportions of each differ as appropriate to the course objectives. A statement is included in each syllabi following the course description which specifies the Lecture/ Lab balance. The following format is used: (60% Lecture/40% Lab).

The technical courses all require laboratory activities using industrial processes, equipment and materials to develop a greater understanding of the concepts presented in class. In the professional courses, practical applications more often take the form of analyses, calculations, decision making, and simulation. All syllabi are also available electronically on the UT Tyler website at: http://www.uttyler.edu/cbt/ugadvising/ugcoursedescriptions.php or are included in the binder for each program for review during the site visit. In all technical offerings, at least one-half of the contact time is spent utilizing “hands-on” teaching methods. This may include external resources such as industrial site visits, facility inspections, and/or the manufacture of student projects.

6.3 - There shall be evidence of appropriate sequencing of courses in each program/option to ensure that applications of mathematics, science, written and oral communications are covered in technical and management courses.

The University of Texas at Tyler courses are sequenced by 1000 level courses for freshmen, 2000-level courses for sophomores, 3000 level courses for juniors and 4000-level courses for seniors. Advisement and course prerequisites assure the students proper course sequencing for the program (refer to Table 6) which contributes to a higher success rate. In addition, the courses requiring prerequisites necessitate a student to be proficient in Microsoft Word, Excel, Access, and Project.

Six semester credit hours (SCH) in mathematics and six SCH in the laboratory sciences are required by the university’s core curriculum. Algebra and Statistics
are preferred for the program because they are prerequisites for other courses, such as Total Quality Management and Operations Management.

Written and oral communication skills are a core competency of the Department of Technology and the College of Business. Oral presentations are required in many courses in the department and are evidenced in course syllabi. Written communications requirements are also satisfied through the required courses ENGL 1301 and ENGL 1302 while SPCH 1315 is recommended for the Humanities portion of the general education coursework which addresses critical thinking skills.

**Table 6: Industrial Technology Program Prerequisites**

<td>TECH 2323 &amp; MATH 1342</td>
</tr>
</tbody>
</table>

**NOTE:** TECH 2323 Introduction to Computer Applications or equivalent course covers the Microsoft Office applications.

6.4 - Furthermore, sequencing should ensure that advanced level courses build upon concepts covered in beginning level courses.

The course TECH 4343 Advanced Manufacturing Processes assumes students have a fundamental knowledge of manufacturing which can be obtained in TECH 3311 Manufacturing Processes. Further, only graduating seniors are allowed to take the required course TECH 4372 Capstone Experience in which students list all the courses and assignments they completed to illustrate mastery of the competencies pertaining to the program.

**Standard 7 - Student Admission & Retention Standards:** There shall be evidence showing that the quality of technology, management, and applied engineering students is comparable to the quality of students enrolled in other majors at the institution. Additionally, the standards for admission and retention of technology, management, and applied engineering students shall compare favorably with institutional standards. (Sources of admission information may include test scores and grade rankings. Sources of retention information shall include general grade point averages of technology,
management, and applied engineering students compared to programs in other institutional programs.)

Prospective technology majors may enter the program by one of three ways: as an entering freshman, as a transfer student from another upper level or lower level institution, or from within UT Tyler. Any prospective student may complete the common application for the State of Texas located at: http://www.uttyler.edu/admissions/apply.php. Prospective freshman must meet a minimum of 20 acceptable high school units and must submit an official high school transcript to UT Tyler.

Eligibility for admission as a freshman is determined on the basis of three predictors of academic success: high school preparation, rank in high school class, and SAT (ACT) score. Additional consideration for admission will be based on an evaluation of additional criteria as described below.

High School Preparation: To be eligible for admission to the university as a freshman an applicant must be a high school graduate or equivalent. A high school record that demonstrates achievement in the most challenging academic course work available is the best single predictor of academic success. Beginning freshmen must submit an official high school transcript before classes begin in order to verify graduation and completion of required courses.

Minimum high school units required for admissions include:

1. Language Arts: Required: Four units of English.
2. Science: Required: Three units of science to include at least one unit of Chemistry or Physics.
4. Mathematics: Required: Three units at the level of Algebra I or higher, e.g., algebra, geometry, elementary analysis, probability and statistics, solid geometry, calculus with analytical geometry. Informal geometry and pre-algebra will not fulfill this requirement. Strongly recommended: Students planning to enter scientific, engineering and similar technical fields are advised to take at least four units of math in preparation for entering the first university calculus course in their first semester at the university.
5. Social Studies: Required: Three units.
6. Electives: Required: Additional courses in the areas above and/or in fine arts and/or computer science to satisfy high school graduation requirements.
High School Rank in Class and SAT (ACT) Score

1. An applicant who graduates from an accredited high school in one of the two years preceding the academic year for which the applicant is apply for admission and who has a grade point average in the top 10% of the applicant's high school graduating class will be admitted automatically (subject to applicable enrollment limit). SAT (ACT) scores must be submitted.

<table>
<thead>
<tr>
<th>An applicant who does not qualify for admission under #1 above but meets the following criteria also qualifies for regular admission: High School Rank</th>
<th>Minimum Total ACT</th>
<th>Minimum Total SAT (Math &amp; Critical Reading)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Top 25%</td>
<td>20</td>
<td>1020</td>

<td>21</td>
<td>1060</td>
</tr>
<tr>
<td>3rd 25%</td>
<td>22</td>
<td>1100</td>
</tr>
<tr>
<td>4th 25%</td>
<td>23</td>
<td>1130+</td>
</tr>
</tbody>
</table>

Home schooled students: Requirements for home schooled students entering as freshmen are as follows:

1. SAT or ACT test scores
2. HS transcript or GED scores

Additional Criteria: In addition to the current university requirements for admission, applicants must also have either: successfully completed the curriculum requirements for the foundation with endorsement or distinguished level of achievement high school program or its equivalent; or satisfied ACT's College Readiness Benchmarks on the ACT assessment application to the applicant, or earned on the SAT assessment a score of at least 1500 out of 2400 or the equivalent.

The above requirement may be satisfied if the applicants official high school transcript or diploma states that the applicant completed the portion of the foundation with endorsement or distinguished level of achievement curriculum or its equivalent that was available to the applicant, but was unable to complete the remainder of the curriculum solely because courses necessary to complete the remainder were unavailable to the applicant at the appropriate times in the applicant's high school career as a result of course scheduling, lack of enrollment capacity, or another cause not within the applicant's control.

An applicant may be given additional consideration based upon an evaluation of the individuals' involvement and level of responsibility in extracurricular activities; involvement in responsible non-academic affairs while attending high school,
including employment and family responsibilities; status as a first-generation college student; English not first language; and socioeconomic background.

**Application**

Submit a completed undergraduate application for admission.

**Application Fee**

A non-refundable $60 application fee is required for U.S. citizens and permanent residents. A non-refundable $75 international application fee is required for all non-U.S. citizens. Applications will not be processed without the application fee.

**Scholarships**

All freshman applicants who are admitted prior to March 1 will be reviewed for scholarship eligibility. To receive any UT Tyler admissions scholarship that is awarded, applicants must pay the $100 freshman confirmation fee by the May 1 deadline.

**High School Transcript**

An official high school transcript with high school graduation verification is required for final admission.

**College Transcripts**

Official transcripts are required from each college or university attended. Photocopies and faxed transcripts will not be considered for final admission. Course work from one college posted on the transcript of another college will not be considered for final admission.

**Texas Success Initiative (TSI)**

Unless a student is exempt, the Texas Success Initiative requires all undergraduate students entering a public college or university in Texas to be assessed for readiness to enroll in freshman-level academic coursework. For information about testing requirements, visit the Texas Success Initiative page.

**College Credit by Examination**

Credit by examination may be established through testing programs such as the Advanced Placement Program (AP), the College Level Examination Program, (CLEP) and International Baccalaureate (IB). Guidelines for credit by examination are listed below. CLEP, AP, and IB credit received from a prior college or university will transfer as credit was awarded.

- **UT Tyler Credit by Examination Information**
• **State of Texas Uniform Admissions Policy**

**Transfer Credit:** Credit earned at other accredited colleges or universities may be transferred by students presenting official transcripts describing such credit. Courses are acceptable for transfer at the level at which these courses were classified by the institution granting the credit. Only courses in which a student has earned a grade of "C" or better will be acceptable for transfer. The only exception will be if a student transfers to UT Tyler core complete from another college or university, and the transferring institution recognized a "D" as satisfying its Core Curriculum requirements.

**College Credit by Examination:** Credit by examination may be established through testing programs such as the Advanced Placement Program (AP), the College Level Examination Program, (CLEP) and International Baccalaureate (IB). Guidelines for credit by examination are listed below. CLEP, AP, and IB credit received from a prior college or university will transfer as credit was awarded.

An academic retention process is set in motion when an undergraduate student is deficient in GPA less than 2.00 and is placed on academic suspension for one semester and is required to pass through documented advisement procedures allowing the student to enroll for no more than 12 semester hours. An undergraduate student who does not meet the terms of probation will be suspended for at least one semester and must receive re-admission approval through the respective academic dean. More information on probation and suspension is found at: [http://www.uttyler.edu/cbt/ugadvising/academicprobation.php](http://www.uttyler.edu/cbt/ugadvising/academicprobation.php).

Retention of students is also influenced by the confidential student counseling and testing services provided to students enrolled at the university. Individual counseling, enrichment courses, group counseling and referrals are conducted by a licensed professional counselor. Students may also request disability services through contacting the Student Counseling Center 30 days prior to the beginning of each semester. UT Tyler Testing services are provided to students to include the administration of many standardized examination instruments. Such instruments may include ACT, SAT, CLEP, and ExCET exams. Students can find additional information about student counseling and university testing services on the following web site: [http://www.uttyler.edu/studentservices](http://www.uttyler.edu/studentservices). University Student Counseling and Testing office hours are 8:00 AM to 5:00 PM or by appointment. There are no additional charges for student counseling services.

According to the past three biennium cycles (2013, 2015 & 2017), there have been over 1,000 freshman enrolled at UT Tyler. In these three past biennium cycles, the average ACT score has been 23 and the average SAT score has continually risen to 1065.
The average GPA for Industrial Technology majors compares to Computer Information Systems majors, Management majors, Finance majors, Psychology BA majors and other majors as listed in Table 8. Comparable grading practices are indicated at UT Tyler by comparable GPAs among programs as illustrated in the second column of Table 8. In addition, since most Industrial Technology majors are transfer majors, their transfer GPA (basic studies) is comparable to the other majors listed in Table 8 such as undecided majors.

*Source: Office of Information Analysis*

In Table 9 it can be noted that the graduation and retention rates are steadily increasing except for a slight decrease in 2017. Retention and graduation rates for the university in general have been in the 60% range. Overall, the Industrial Technology program is doing an above average job of retaining and graduating its majors.
Table 9: Department of Technology - Retention by Major Industrial Technology = TEITBS

Note: TEITBS is an acronym for TE=Technology Department, IT=Industrial Technology major, BS=Bachelor of Science.

Source: Office of Information Analysis

Standard 8 - Transfer Course Work: The institution shall have policies in place to ensure that coursework transferred to the program is evaluated and approved by program faculty.

The University of Texas at Tyler accepts appropriate transfer credit from accredited institutions providing the grade for the course is C or better. Articulation agreements are in place with area community colleges, which lead directly into the degree plan offered for the Industrial Technology program.

All course work is evaluated the Technology Department’s curriculum representative and then checked by the Department Chair. A copy of the transfer course’s syllabus is attached to a form that then goes to the dean of the College for approval. It is then sent to the Vice Provost and Graduate Dean for review. If approved, it goes to the Registrar’s Office and they then enter it into the computer system as a recognized transfer course. All the approved courses are listed in notebooks along with the syllabi and other information required in the Technology Department Chair’s office.

Only coursework from regionally accredited institutions of higher education are allowed to be accepted as transfer work. All major course work identified by the Office of Admissions is subsequently reviewed by the student’s major advisor. Experiential education credits are not allowed for this option.

Standard 9 - Student Enrollment: Program enrollment shall be tracked and verified. There shall be evidence of an adequate number of program majors to sustain the program, and to operate it efficiently and effectively, as defined by your state or institution standards.
The enrollment for the department has increased every year since the last ATMAE accreditation site visit except for the past two years. This coincides with when our new president hired a new person to direct marketing. There have been new initiatives to increase the number of top achieving high school students from the area by increasing the number of full-ride scholarships. By doing this, the number of funds for transfer scholarships has been diminished. Most of the Industrial Technology majors are transfer students. Furthermore, as the unemployment rate has decreased over the past two years under the newly elected President of the United States, many students with technical backgrounds have found employment without the need for a baccalaureate degree.

At any rate, the number of Industrial Technology majors is just over 100 students. The number of graduate Industrial Management majors is just over 50. The Department of Technology currently has five full-time faculty with doctorates and four adjunct professors with master's degrees teaching the coursework. The adjuncts can only teach undergraduate coursework as noted by SACSCOC regional accreditation standards. Some adjuncts have been able to teach graduate courses due to their certifications and industrial experience. However, all have been thoroughly vetted by the Vice Provost and Dean of the Graduate School.

The state requirement as noted by the Higher Education Coordinating Board (THECB) is 25 students in 5 years for undergraduate programs, 15 students in 5 years for master's programs and 10 students every 5 years for doctoral programs. The number of students and graduates for the program for the past several years is listed in tables 10 and 11.

### Table 10: Industrial Technology Program Enrollment from 2013-2018

<table>
<thead>
<tr>
<th>Semester</th>

</tr>
</tbody>
</table>
As illustrated in the Table 11 below, 177 Industrial Technology students have graduated in a five year period from 2014-2018 which in itself is seven times the state requirement of 25 graduates over a five year period. Therefore, the program is healthy and viable.

Table 11: Number of Industrial Technology Program Graduates from 2014-2018

Source: Office of Information Analysis, OBIEE Reporting

**Standard 10 - Administrative Support & Faculty Qualifications:** There must be evidence of appropriate support from the institution for the technology, management, and applied engineering program/option.

10.1 - Appropriately qualified administrators are assigned to the program/options.

The Department of Technology is administered by a Department Chairperson. As described in the University Handbook of Operating Procedures, the Department Chairperson is responsible for the overall development, promotion,
and operation of the department. In consultation with departmental faculty, chairpersons coordinate, supervise, and develop plans for hiring, instruction, curricula, research, office use, equipment, and budget. Chairpersons supervise, counsel, and evaluate their departmental faculty members and office staff, and make recommendations to the appropriate dean. Chairpersons serve at the discretion of the President.

The administrative functions of the Chairperson deal with the day-to-day management and coordination needs of the Department served. The administrative functions include:

- financial-management
- faculty load assignment
- schedule preparation/approval
- faculty/staff evaluation
- policy formulation
- committee and professional responsibility
- funding
- communications
- facility allocation
- staffing
- reporting/delegation

Planning/development/evaluation functions cover both College and program needs within the units.

In addition to the Department Chair, a coordinator is appointed to provide leadership for each program. This person directs recruiting and advising for their program in addition to recommending changes in curriculum, facilities and staffing.

The coordinator for the Industrial Technology program was Dr. Mark Miller until the academic year 2015-2016 when the Department of Technology split from the Department of HRD and Technology.

The new Department of Technology was allowed to have its own separate Department Head and budget. In this way, proper funding could be directed to purchase equipment and materials to enhance the quality of the degree for students. This decision was a great show of support by the administration and has allowed the department’s enrollment, facilities, equipment, etc. to increase and improve in concert with the technology used by industry. Dr. Mark Miller, the current chair of the department has all of his degrees in industrial education or technology and has been a department chair at two institutions for a total of 10 years and a coordinator at UT Tyler for another 10. He has taught industrial technology and engineering technology courses at various institutions since 1982.
10.2 - An adequate number of appropriately qualified full time faculty members are available and assigned to teach courses in the technology, management, and applied engineering program/option.

The Department of Technology has 5 full time faculty and 4 adjuncts for a total of 146 students. There are a total of 282 students for the Department of Human Resource Development which has 7 full time faculty and 6 adjuncts. If 5 FTE faculty plus 4 PT faculty or 9 faculty are divided into 146 students then the student to faculty ratio would be 16.22 for the Department of Technology. A 21.63 student to faculty ratio would be obtained if you divided the total number of faculty, 13, for the Department of Human Resource Development by the total number of students (282). Therefore, it can be determined that there is an adequate number of faculty for the Department of Technology. However, there are currently four adjuncts working for the department, which could be replaced by a lecturer who could also help recruit and advise students.

10.3 - Full time faculty qualifications shall include emphasis upon the extent, currency and pertinence of: (a) academic preparation; (b) industrial professional experience (such as technical supervision and management); (c) practical/industrial business experience using applied technology; (d) membership and participation in appropriate technology, management, and applied engineering professional organizations; and (e) scholarly activities. The following minimum qualifications for full time faculty are required (except in unusual circumstances which must be individually justified):

B. Bachelor's Degree: The minimum academic qualifications for tenure track, or full time faculty members shall be an earned graduate degree in a discipline closely related to the instructional assignment. A minimum of fifty percent of the tenure track, or full-time, faculty members assigned to teach in the program of study content area(s) shall have an earned doctorate or other appropriately earned terminal degree as defined by the institution. Exceptions may be granted to this standard if the institution has a program in place that will bring the faculty demographics into compliance within a reasonable period of time.

The Department of Technology has an excellent faculty. There are five full-time members. Four of the existing faculty are tenured and one is on tenure track. Our recently hired tenure-track assistant professor did not pass her third year review so a national search is now being conducted to fill that position. All of the faculty are active in the profession and strongly committed to the students and the university. The faculty positions are primarily for teaching undergraduate and graduate classes; however, responsibilities also include advising, administration, recruiting, and research. Table 12 illustrates a faculty member’s highest degree, rank, teaching experience, industrial experience, and length of ATMAE membership. Other professional memberships and scholarly achievements are listed in curriculum vitae of the faculty listed in Appendix E.
The full-time tenured track faculty who teach courses for the Industrial Technology program are as follows:
Dr. Mark R. Miller, Professor and Chair
Dr. Dominick E. Fazarro, Associate Professor
Dr. Heshium R. Lawrence, Associate Professor
Dr. Mohammed Ali, Associate Professor
Dr. Shirl Donaldson, Assistant Professor

Table 12: Academic Preparation of Full-Time Faculty Teaching I.T. Courses

The part-time adjunct faculty that assist with courses in which industrial technology majors take is Mr. Daniel Lee and Mr. Kelly Kaemmerling. They both hold Industrial Technology and Industrial Management degrees from the department. Furthermore, two more adjunct faculty who earned a master’s degree from the department are Mr. John Connolly II and Mr. Randell Farley. They are all committed to giving back to the department.

10.4 - Policies and procedures for faculty selection, appointment, reappointment and tenure shall be clearly specified and shall be conducive to the maintenance of high quality instruction. This should include policies and procedures for the selection and reappointment of part-time/adjunct faculty.

The Chair of the Department initiates a proposed new appointment after consultation with the faculty. Requests to advertise and fill vacancies are approved by the Dean and the Vice-President of Academic Affairs. Criteria for the position and a position description are established by the Department of Technology faculty and submitted for approval by the Dean, Vice-President of Academic Affairs, and Equal Opportunity Officer. The Department Chair advertises the position in the Chronicle of Higher Education, professional journals, and other appropriate networks. Applicants are screened by the Department Chair and an ad hoc committee made up of Department of Technology faculty. Finalists are invited for on-campus interviews. New appointments are recommended on the basis of education; experience; competence in teaching, research and professional practice; recognition in the field; and, in some cases, prior experience at other institutions.
Initial appointments may be made to any of the academic ranks to include, instructor, lecturer, assistant professor, associate professor, or professor depending on experience. Appointments to tenured positions are made only after consultation and special approval of the dean of the college and the provost.

An appointment is initiated by the College Dean who specifies the conditions of appointment in a letter of intent indicating the academic rank, salary for the first year, the ending date of the probationary period if one is established, and the date by which a notification of intent not to renew is to be given if the appointment is renewable. This is confirmed by the Provost and Vice President of Academic Affairs.

The qualifications for tenure track faculty members for the Department of Technology include a doctorate in technology, industrial education, or a closely related technical field. Also required is evidence of scholarly activity including research and publication. Evidence of superior teaching ability is required of all faculty. Experience in working with various student populations and securing external funding is desired. Industrial experience related to the curriculum content is strongly desired for all faculty of the Department of Technology.

Assurance of academic freedom is essential to a high level of academic excellence. Each faculty member is free to carry out teaching, extension, and research responsibilities in a setting of commitment to scholarship and intellectual objectivity. A sound tenure policy with strong administrative support for academic freedom affords an environment in which scholarship is given an opportunity to flourish.

The system of academic tenure at The University of Texas at Tyler emphasizes (1) recruitment of the most highly qualified candidates available, (2) creation of an opportunity for scholarly performance in teaching, research, and service, (3) continuing evaluation of performance on the basis of areas of responsibility specified in the employment agreement, and (4) the awarding of tenure upon a satisfactory showing of scholarly performance in the appropriate functional areas.

Both affirmative action and tenure function as compatible concepts at The University of Texas at Tyler. Both seek to ensure the hiring and retention of those who are most qualified. In the appointment process, affirmative action operates to ensure that the most qualified available person is identified and is offered the opportunity to join the faculty. After the initial appointment, the affirmative action program ensures that irrelevant considerations, such as race, religion, and sex, play no role in tenure, promotion, and salary decisions.

Tenure policies and reappointment are governed in accordance with University procedures. Tenure is granted through demonstrated research and publication,
outstanding teaching performance, and noteworthy professional service. After
the awarding of tenure, the faculty appointment is continuous.

The UT Tyler Handbook of Operating Procedures (HOP) which contains tenure
and promotion guidelines is available for review at:
http://www.uttyler.edu/ohr/hop/. Refer to Appendix C for the College of Business
and Technology Tenure and Promotion policies.

Faculty are encouraged to attend appropriate technical seminars, workshops,
and professional conferences. The department is able to assist faculty in
updating their technical knowledge and skills by providing professional
development funds. The department has acquired a number of grants over the
past several years that has assisted in this endeavor. Some faculty take the
opportunity to consult, and work in the private sector during the summer and off
time. These activities are encouraged realizing that such experience is invaluable
to the goals of the department.

The faculty members are encouraged to belong and be active participants in the
various professional and technical societies and organizations.

Curriculum Vitae for all faculty are found in Appendix E.

10.5 - Faculty teaching, advising, and service loads shall be reasonable and
comparable to the faculty in other professional program areas.

All the faculty in the College of Business have the same teaching, advising,
and service loads. Tenured faculty teach three courses each semester with
one release time for research/publications. Lecturers are required to teach
four courses with no or very limited research expectations. Adjunct professors
are paid per each course that they teach. All or at least most advising is
conducted by the College of Business Undergraduate and Graduate advising
departments.

10.6 - Appropriate criteria shall be in place to assure part time or non-tenure track
faculty are highly qualified to deliver and evaluate student performance in courses
assigned.

Dr. Geiger, the Vice Provost and Dean of the Graduate School, has
developed a form for SACSCOC accreditation in which each department has
to list the credentials and justification for each faculty member to teach every
course they are assigned. If there is not the proper justification, then the faculty
member will not be allowed to teach the course and the course will not be offered
unless a properly credentialed faculty member becomes available.
The link to the digital Rightsignature form is:
https://www.uttyler.edu/academicaffairs/files/Faculty_Qualifications_rightsSignature.pdf
Standard 11 – Facilities, Equipment & Technical Support: Facilities and equipment shall be adequate to support program/options goals.

11.1 - Appropriate technical support necessary to assure safety and for maintenance is available.

Presently, the chair of the department with the assistance of work study students and graduate assistants prepares and maintains all the equipment in the laboratories. He is also in charge of purchasing all the materials for laboratory activities as well as their preparation. In most cases, he must pick up the supplies at local stores as well. This has been a tremendous burden on top of all the chair duties involved with the Technology Department as well as being interim chair of the Department of Human Resource Development. A letter to the Provost that requested the assistance for a technician was submitted in the Fall 2018 semester. His response was that if the tenure-track faculty member was replaced with a lecturer, then the university could pay the lecturer the additional salary from the tenure-track position to also perform the duties of the technician. The College of Engineering is advertising for a full time technician at a salary of $4,500+ a month.

11.2 - Current computer equipment and software programs to cover functions and applications in each program area is available.

The College of Business maintains a computer lab in room COB 251 specifically for students in Technology and those who are taking courses that require the use of SAP software. This lab is available whenever there is not a class scheduled in it. In fact, since the lab houses 60 computers, most faculty allow students from other classes to work in the back of their class as long as they are quiet. The lab is available as long as the building is open. All of these computers are brand new and have the speed and processing power of gaming computers.

The Department of Technology also has 30 older computers that were taken from the move to the new building and are now housed in room COB 160 (Computer Integrated Manufacturing Laboratory). They are mainly used to make corrections to programs so students do not have to go upstairs again to edit their programs that run on the CNC machines or robots in COB 160. However, these computers do have quad processors and are still quite fast.

**Computer Lab Configurations**

**Key software Installed**
Operating System: Microsoft Windows 10
Office Tools: Microsoft Office 2018, SAP Front End
Simulation Tools: Intelitek RoboCell for Scorbot ER-4U robot, SCORBASE, CellSetup, spectraCAD Engraver, spectraCAM Milling, spectraCAM Turning, CNC Motion for intelitek CNC, and CNC Base fro proLIGHT 3000 Turning.

The university has an “itsupport” staff that takes care of the installation and maintenance of the computers. Faculty just fill out a support ticket and one of their technicians typically makes contact and resolves the problem within one to two business days.

11.3 - Facility and equipment needs shall be included in the long-range goals and budget plans for the program.

Although it has taken several years, the Department of Technology has finally moved into a new building with almost three times the lab space from the previous building. Furthermore, these labs are designed for the equipment and have overhead garage doors, proper ventilation, and room to expand. The new building also has a special lab just for welding that the previous building did not. The department also shares a 60 seat computer lab that students have access to all day until the building closes late at night. Across from that lab is an open computer lab which has printing capabilities as well.

Over the years, the Department has always been able to purchase at least $3,000 or more of new equipment to enhance the students learning experience. However in 2015, when the Department of HRD and Technology was split into two separate departments, the Department of Technology was able to spend anywhere from $30,000 to $80,000 in new equipment and supplies which equates to an increase in funding by ten fold.

Funding for equipment and materials is done when instructors ask for funds and the department’s faculty prioritize them and then purchase the equipment, etc. accordingly. All courses have some laboratory equipment available to simulate what they would expect when working in an industrial environment. The intent is to purchase smaller table top equipment so there are enough funds to furnish all the labs with some type of laboratory equipment. It should be noted that fourteen years ago, the program was only offered as an upper level completion degree for technical transfer students and there was not a single piece of equipment. The program has come along way over these years. The following is a table of all the equipment and material expenditures from the years 2012-2019. Essentially, everything that was purchased after the department’s last reaccreditation site visit is listed in the table below.

</table>
Furthermore in Appendix G, department expenditures for new capital equipment and some minor supplies is listed by the previous accreditation period as opposed to this accreditation period to show the increased support for the program.

**Standard 12 - Program/Option Operation: Evidence shall be presented showing the adequacy of instruction including:**

12.1 - Scheduling of instruction

The scheduling procedure for classes permits input from both the student and faculty. This cooperative effort allows some ownership of their scheduled day and results in a high degree of cooperation. The procedure allows for a variety of scheduled course offerings which do not restrict accessibility for the student due to overlapping classes and provides course offerings. Also, this scheduling procedure enables ample time for the student to complete the general study requirements and to meet their educational goals.

The scheduling of courses is coordinated by the department chair with the aid of the faculty. Industrial Technology courses are scheduled by the department chair. Courses are all placed on a master schedule. The times are coordinated with other course offerings within and outside the department to minimize conflict. Course frequency is determined by the student need. The master course schedule only shows the minimum course offerings, additional sections will be added at the discretion of the department chair. The master schedule (referred to as the rolling schedule) is posted on the departmental web page to assist students with the semester they should take certain courses and to plan accordingly so they will graduate in a timely manner.

All Technology courses are offered for three semester hours of credit. Outside related readings and assignments are expected to consume six-eight hours of student time per week per course.

Advisement is used to balance student course loads.

Freshmen are encouraged to take up to 15 credits while sophomores, juniors, and seniors are advised to take class loads commensurate with ability, time constraints, and grade point averages. The University Policy is as follows:
The normal load for a spring or fall semester is 15 semester hours. The normal load for a summer term is 6 semester hours.

The student must contact his adviser to exceed the normal allowable credits and the adviser must notify the college dean’s office for approval.

12.2 - Quality of instruction

The quality of the instruction at The University of Texas at Tyler is monitored in several ways. First of all, new faculty are mentored by tenured faculty and the department chair to make sure they are developing appropriate learning outcomes and experiences for the students of the program. Complaints emailed, voiced by telephone or in person are discussed with the student by the department chair. The department chair then discusses these complaints with the instructor in question and provides the faculty member with alternatives and solutions so these problems do not occur in the future. End of course student evaluations of the instructor are also reviewed and if there are any serious issues, then the department chair will intercede and meet with the instructor to offer solutions. If the same complaints continue for tenure track faculty, then they will not pass their third review and their contract will not be reviewed. As for adjunct faculty, they will not be allowed to continue to teach courses for the department. Tenured faculty will have to improve instruction as well because they must have a favorable post-tenure review or be put on probation. Student evaluations of faculty are posted on the university’s website at: https://apps.utttyler.edu/courseevals/HomePage.aspx.

The quality of instruction is also monitored by peer reviews of faculty. Faculty are required every several years to be reviewed by another faculty member who fills out a prescribed form. A meeting is conducted after the peer review to provide a faculty member with feedback on their teaching. Most faculty welcome the feedback and improve their instruction accordingly. The reviews are submitted to the dean’s office and kept in the faculty member’s personnel file. A copy of the peer review form is listed in Appendix I.

The university also has The Center for Excellence in Teaching and Learning which provides workshops, speakers, and other types of assistance throughout the year to assist faculty with their teaching. Faculty are recommended to attend these events as much as possible. They are typically held as a Lunch & Learn or offered on Zoom so faculty can watch them in their office.

12.3 - Observance of safety standards

All students are required to be present for a PowerPoint presentation on safety and then pass a quiz on safety before being allowed to work in a laboratory. In addition, the university safety director has attached her safety PowerPoint presentation to each course’s Canvas site in which the student must watch and
then pass a quiz on it as well. Students are also required to wear safety glasses at all times in the labs. Any student who does not follow the proper safety rules is asked to sit down or leave class for the day if the behavior continues. Students who continue to not follow the rules are expelled from the laboratories and will fail that portion of the course. Students must also fill out and sign a Laboratory Safety form where they agree to follow the safety rules in the laboratory. This form is available in Appendix J.

12.4 - Availability of resource materials

The mission of the Muntz Library is to support and enhance the University's instructional, research, and service activities by providing high quality information services for students, faculty, and staff as well as the University's community at large.

The Robert R. Muntz Library houses an array of materials to support the various degree programs offered by the University of Texas at Tyler. In addition to nearly 157,000 hardbound volumes and 495 journal subscriptions, the Library provides access to over 252,000 ebooks and 196 electronic databases. Holdings include numerous materials, online and in print, as well as videos, DVDs, CDs, and other audiovisual materials. Specific Library resources supporting Industrial Technology include online databases such as Wiley Online Library, Science Direct, SpringerLink, Academic Search Complete, Business Source Complete, Lexis Nexis Academic Universe, IEEE Explore, Digital Dissertations, ASME Digital Library, and the BNA Safety Library (accessible through the BNA Human Resources Library). Various print and online journal resources are available on topics such as occupational health and safety, manufacturing engineering, chemical health and safety, industrial safety, environmental safety, mechanical engineering, and other relevant subject areas.

The Library staff consists of ten professional librarians (including the Director of the Library) and thirteen classified staff. All librarians report directly to the Director of the Library. The librarians share the responsibility of providing reference services and are available to assist students directly and online via chat or web-conferencing services. Each librarian is assigned liaison responsibilities for specific Colleges at UT Tyler, and the librarian assigned to the College of Business and Technology is also responsible for providing research instruction services and meeting collection development needs. The Library supports additional small collections at the Palestine and Longview campuses. Faculty, staff, and students at these sites can access the catalog and electronic resources via the campus network and can request delivery of materials from the Tyler library if needed. Full Interlibrary loan services are available to faculty, staff, and students at the Palestine and Longview campuses.

In order to enhance the information resources available to patrons, the Library participates in several resource sharing and cooperative agreements with other
institutions. The Library’s Interlibrary Services department provides qualified patrons with access to academic and public library collections worldwide. The Library’s participation in cooperative or consortial agreements such as AMIGOS and TexShare enhances access to and delivery of materials from other Texas libraries via interlibrary loan agreements and courier service. UTT students, faculty, and staff can personally check out items from any participating library with a TexShare card. The University of Texas at Tyler’s participation in consortial database purchases via The University of Texas System Digital Libraries program (UTSDL) allows for more affordable access to a wide variety of electronic resources that would not be possible for UT Tyler to purchase on an individual basis.

In addition to the availability of the Muntz Library materials, reference materials and periodicals are maintained in the Department of Technology commons area and in the Department resource room/Conference room. Faculty maintain individual libraries in their offices relative to the courses they teach as well.

The Department Chair appoints a faculty member to be the liaison to the university library. This person annually polls the Department faculty for their library needs and allocates available funds for materials.

12.5 - Teaching and measurement of competencies (specific measurable competencies shall be identified for each course along with the assessment measures used to determine student mastery of the competencies)

Completion of the Bachelor of Science in Industrial Technology degree implies the expected development of competencies in the major areas of technology and management. The Advisory Committee that serves the Department of Technology at The University of Texas at Tyler has affirmed these competencies. These competencies not only serve the Department of Technology but are also part of the core competencies identified by the College of Business.

The individual instructor establishes course goals for each course. Those course goals are measured through the course requirements established for the course, instructor observation of students during class, written exams, and the evaluation of completed written, oral, and laboratory performance assignments.

The program’s advisory committee meets annually as part of the outcomes/student competencies validation process. Minutes from the program’s advisory committee meetings are available for inspection to verify such action. Related questions to program competencies are also included in the technology alumni survey that is conducted every 2-3 years. Exchanges of job skill information during on-campus recruiting and interviewing by technology companies also aids the technology program chair/coordinator in prioritizing competencies. The program’s general program outcomes are further broken
down into more detail and are specified as general core competencies. These are then mapped to each course to make sure they are being addressed by some type of assessment method.

**GENERAL CORE COMPETENCY GROUPINGS FOR THE INDUSTRIAL TECHNOLOGY CURRICULUM**

1. Computer-Based Skills  
   a. Word processing  
   b. Spreadsheet  
   c. Presentation software  
   d. Database manipulation  
   e. Internet search skills  
2. Communication Skills  
   a. Written  
      i. Report organization  
      ii. Referencing  
   b. Oral  
3. Interpersonal Skills  
   a. Team-based abilities – intra-group & inter-group cooperation  
   b. Leadership  
   c. Conflict resolution  
4. Problem Solving (Critical Thinking)  
   a. Conceptual thinking  
   b. Gathering & analyzing data  
   c. Quantitative/statistical skills  
   d. Creativity & innovation  
5. Ethical Issues in Decision Making & Behavior  
6. Personal Accountability for Achievement  
7. Competence in Basic Tech. Principles  
   a. Competence in major field & grounding in other major Tech. core areas  
   b. Exposure to & appreciation for industrial experiences such as, but not limited to, industrial tours, work-study options & cooperative Ed., senior seminars.

**Competency Assessment Method Key**

1. Journal Reviews  
   An individual student required assignment as specified (measurement) by course syllabus for the purpose of exposure to current technical related subject literature.

2. Term Paper/Project  
   An individual student required assignment as specified (measurement) by course syllabus for the purpose of an in depth problem solving activity related to course technical subject matter.
3. **In-Class Presentation**
An individual student or group required assignment as specified (measurement) by course syllabus for the purpose of the development of subject matter content for the delivery and communication experience to a peer group through the use of various media devices and/or techniques.

4. **Class Participation**
An individual student's verbal voluntary participation as specified (measurement) by course syllabus for the purpose showing interest, subject inquiry, and evidence of learning.

5. **Software Application**
An individual student's ability to demonstrate use of subject matter software applications as specified (measurement) by course syllabus for the purpose of solving subject matter problems, data acquisition, and conceptual applications.

6. **Student Work**
An individual student or group documents as specified (measurement and assignment specifications) by course syllabus for the purpose of the instructional validation for subject matter learning activities.

7. **Class Test and/or International ATMAE Certified Manufacturing Specialist Exam**
An instructional assessment of a student's capacity to learn subject matter content and make respective applications as specified (measurement) by course syllabus.

8. **Field Trip, Internship, or Manufactured Project Activity**
An individual student's exposure to real world experiences either through observation or hands-on experience.

9. **Not Addressed in This Class**
Technology core competency is not addressed, measured, evaluated nor assessed in this class.

</table>
Competency Validation Process

In order to ensure validated competencies would be identified for the program-specific courses a Program Advisory Committee was assembled. Validated competencies for computer-mediated and traditional course developers, instructors, managers, etc., were identified through a review of the literature.

The competencies were put into a survey instrument format and distributed to all Advisory Committee members. Each member rated the degree to which each competency related to the program. The results of the survey were compiled. Competencies that did not rate above a minimum level were discarded.

In a final phase, the competencies rated for an undergraduate program were mapped into existing courses. In many cases the competencies were currently addressed. Competencies not being taught were inserted into courses within the degree plan. Competencies are reviewed by advisory committee members on an annual basis and courses are revised and/or new courses are added and omitted to keep the program current to the needs of employers. In addition, competencies listed in the ATMAE Certified Manufacturing Exam are used as a guide since these competencies are derived from a list of competencies common to all of the ATMAE accredited institutions with Industrial Technology or similar programs.

12.6 - Supervision of instruction

The University of Texas at Tyler has established guidelines for supervision and evaluation of each department. In the Department of Technology, a student evaluation of the faculty member's performance is assessed for each course taught. This practice is an integral part of the departmental operation. The student evaluation instrument permits discrete assessments of classroom and laboratory performance. Past faculty evaluations by students are allowed to be accessed from the main university home page at: https://apps.uttyler.edu/courseevals/homepage.aspx

A second source of faculty assessment for improving instruction is the annual evaluation by the department chair. A prescribed set of criteria is used to measure the faculty members' teaching performance. Each faculty member then has an open dialogue regarding his/her performance and ways to improve instruction with the chair. A copy of the Faculty Evaluation Form can be found in Appendix D.

Faculty members are expected to provide the highest degree of quality instruction for their assigned courses. Faculty are responsible for all testing, teaching, lab supervision, project evaluation, and the like. Student assistants are used for both laboratory preparation and peer assistance and are expected to work toward the same standard as a permanent faculty member. Only student workers or graduate assistants who have previously taken the course or have
been properly trained by a faculty member are allowed to assist students in a course.

12.7 - Placement services available to graduates

The university offers the following career placement services to include career counseling, career advising, computerized job search aids, job search assistance, Patriot Jobs (on-line database), Wetfeet Online Career Library, and career fairs. Job listings placed through the Office of Career Success and Alumni Engagement in UC 2150 and are available to students through the following links: https://www.uttleyer.edu/careersuccess/career-resource-links.php. The Office of Career Success and Alumni Engagement at UT Tyler periodically schedules special events such as “Resume and Cover Letter Writing”, schedules on-campus business & industry employment interviews, “Etiquette Dinner”, and Career Fairs. There website is: https://www.uttleyer.edu/careersuccess/.

The Office of Career Success and Alumni Engagement no longer conducts a graduation survey. This information is gathered through the Graduation Exit Survey conducted by the Office of Assessment & Institutional Effectiveness. The results can be found here: https://www.uttleyer.edu/aie/graduation.php. If you need more assistance with the results, please contact Sue Gossett from the Office of Assessment and Institutional Effectiveness.

In addition to the university placement services, faculty send an announcement through their class Canvas site to all the students in their class regarding any job postings that they have received from industry contacts. Students are also encouraged to obtain internships which in most cases lead to employment or better job opportunities.

12.8 - Management and/or technical course syllabi must clearly describe appropriate course objectives and student competencies.

The University of Texas at Tyler requires that the instructor of each course provide students with an updated syllabus at the beginning of each course and submitted to the department’s administrative assistant at least a week before classes begin.

Faculty are required to provide updated copies of the syllabi used for each course taught each semester that are kept on file in the Department of Technology’s main office and upon request a copy is forwarded to the dean’s office. A sample syllabus can be found in Appendix A. In addition, all syllabi are now easily assessable online at: https://www.uttleyer.edu/cbt/technology/syllabi.php. University requirements for a syllabus are located online at: https://www.uttleyer.edu/academicaffairs/files/syllabuspolicy.pdf
Course Syllabi, which clearly describe appropriate course objectives, content, references utilized, student competencies, student activities, evaluation criteria, and a range of examples of students’ graded work shall be available for inspection.

The most current course syllabi in the approved format are on file and are listed in Appendix A. Examples of student work are available for review during the site visit.

12.9 Each student learning competency shall be mapped to the program learning outcomes established for the program.

Table 17 illustrates how each of specific technology and management student learning competencies are mapped to the general program outcomes as defined by the Department of Technology. These competencies are further mapped to courses and there means of assessment as presented in Standard 12.5 and shown in Tables 15 and 16. Specific Core Competencies

</tbody>
</table>
12.10 - Courses delivered by distance. Appropriate criteria are in place to assure the adequacy of distance and/or non-traditional instruction.

All faculty teaching online courses must go through training which is monitored by the Vice Provost and Dean of the Graduate School. In addition, the faculty member must be trained on how to use the LMS Canvas adequately. Faculty cannot access Canvas or their online class unless this training has been completed. Furthermore, faculty who are not doing a good job teaching online are contacted by their department chair and asked to improve. If no improvement is shown, then faculty are no longer allowed to teach online.

Standard 13 - Graduate Satisfaction with Program/Option: Graduate evaluations of the program/option shall be made on a regular basis (two to five years). These evaluations shall include attitudes related to the program learning outcomes identified for the program/option. Summary data shall be available for the graduate evaluations of the program/option.

Graduate Satisfaction surveys were conducted by the department from the year 2000 until 2013. At that time, the departments were notified by the university that there were far too many surveys for graduating students to fill out and that attributed to a low response rate for the information they were trying to collect. The survey instrument responses in Appendix D, will illustrate that the response rate increased from 22% to 43% in just three years and has increased every year thereafter. The surveying of graduating seniors is shepherded by the Office of Assessment and Institutional Effectiveness and the annual surveys reviewed were from the years 2013-2017. The survey instrument asks a multitude of questions and is interested in not only if students were satisfied with their program, but if they were satisfied with a host of other supplemental services that the university provides. Although the survey does not ask specifically how the students felt about each program outcome, it does ask the following pertinent information that was used to improve the Industrial Technology program:

1. Please provide information about your employer.
2. Have you successfully obtained a job in your discipline?
3. In your opinion, how well has UT Tyler prepared you to work in your career field?
4. Please provide the following information if you plan to continue your education: University name, city, state, intended degree.
5. How you felt about your advising?
6. Rate how well UT Tyler helped you to develop the abilities: communication skills, mathematical concepts, understanding how values, beliefs, and culture affect human experiences, work effectively as a team, global awareness, locate and organize information, etc.
7. If you could start over again, would you attend UT Tyler?
8. What will be your principal activity with the first year of graduation?
9. What was your primary reason to attend UT Tyler: desired program, national recognition of degree, quality of faculty, size, location, cost, diversity, other.

10. Comment section for praise, constructive criticism or even to recommend improvements.

Some of the best information from all the surveys was given in the comments section. The major concerns that were addressed were: lack of available computers, speed and age of the computers, the size of the laboratories, lack of equipment, insufficient lab activities, inability to understand a faculty member, lack of effort by a faculty member, unavailability of classes in the major, and appropriateness of some assignments. All have been addressed in Table B Outcomes Measures Used to Improve Program.

Standard 14 - Employment of Graduates: Placement, job titles, and salaries of graduates shall be tracked on a regular basis (two to five years) including the degree to which jobs held by graduates are consistent with program learning outcomes. Summary data shall be available for the employment of graduates.

In the beginning of the Spring 2017, a graduate survey was sent out to alumni of the Industrial Technology program who had graduated in the years 2015 and 2016. This included Spring, Summer, and Fall semesters. A total of 26 majors graduated in 2015 and another 32 in 2016. It should be noted that the last survey that was sent out by the department queried the graduates from the year 2012. After the initial email, two more follow up emails were sent to gather data from the alumni from the program. A total of 14 surveys were filled out of the 58 students who were contacted. The response rate to the survey was 24% which was probably as good as can be expected with the limitation of only being privy to the graduates UT Tyler Patriots email. Provisions for collecting a student's personal email account was not anticipated, however, the following year such data became available using OBIEE software. At any rate the salary and job titles of the graduates is listed in the tables that follow.

Another survey was sent out the following year in the summer of 2018. This survey only focused on Spring 2018 graduates to see if there would be a better response rate if the survey was sent out while students were still familiar with the program and had not moved several times making them more difficult to track. This method provided better results with seven graduates responding out of the 11 that had graduated for a 64% response rate. The graduates were contacted three times as had been done the previous time with the 2015-2016 graduates. It was interesting to see that the average salary for the graduates was about the same at approximately $60,000. Salaries ranged from the $30,000 to the $120,000 range.
Table 18: Salary Ranges for Graduates of 2018 & 2015-2016

<table>
<thead>
<tr>
<th>Salary Ranges</th>
<th>Frequency N = 6</th>
<th>Frequency N = 12</th>
</tr>

</tr>
<tr>
<td>Other ($120,000)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Average Salary: $60,000, $61,202

The last time starting salaries were reviewed was from 2009-2010 graduates; the average was approximately $45,000 as illustrated in Table 19. It was nice to see that the average starting salaries had increased by $15,000. This may be an indicator that Industrial Technology graduates are in demand, especially with the new administration advocating that manufacturing jobs need to come back to America to make it great again.

Table 19: Salary Ranges for Graduates of 2007-2008 & 2009-2010

<tr>
<td>$90,001-$100,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Average Salary: $43,571.48, $45,000.00

There was a variety of job titles for the graduates; however, most of the graduates reported that their employment/occupation was related to their technology degree. Seven of them replied yes, another 11 noted that it was somewhat related and only one said it did not apply to their degree. It can be deduced that the majority of the graduates obtained employment related to their education provided by the Industrial Technology program.

It was also noted in the survey that only three students of the combined 21 graduates who replied to the surveys were still seeking employment. Therefore, there was an 86% placement rate for graduates of the Industrial Technology
program (12 of 14 for the 2015-16 year graduates & 6 of 7 for the 2018 Spring semester graduates).

Table 20: Job Titles of Graduates

<tr>
<td>City Ambient Air Monitor</td>
<td>Insurance Adjuster</td>
</tr>
<tr>
<td>Technician</td>
<td></td>
</tr>
</tbody>
</table>

Overall, the graduates were satisfied with the degree they had earned and the quality of teaching in the Technology department had been adequate. The data from the surveys are located in Appendix D.

If you review the job titles in the table above, it can be noted that of the 12 graduates who listed their job title, all of them are related to their education as listed in the previous table. Even an insurance adjuster uses his/her business minor education and technology skills in assessing the damage to a vehicle.

Standard 15 - Job Advancement of Graduates: The advancement of graduates within organizations shall be tracked on a regular basis (two to five years) including promotions to positions of increasing responsibility. Summary data shall be available for the job advancement of graduates.

Determining job advancement for graduates was virtually impossible. Absolutely none of the graduates returned the emails sent by the Department of Technology. Do to this problem, it was determined that the best course of action would be to review graduates on Linked-in because all of them are required to become a member during their final course (TECH 4372 Technology Capstone) taken from the department. Fortunately, almost all of the graduates have been updating their Linked-in accounts.

The Industrial Technology graduates from the Fall 2016 semester were chosen so there would have been enough time for some type of promotion. It was interesting to see how all of the graduates were either promoted or left for better paying positions at other companies. This information is listed below. Only first full names and last name initials will be used to protect the graduates' identity.

1. Christian B.: Industrial Engr. at Capacity Trucks in Longview, TX to Drilling Fluids Engr. at Buckeye, Inc. in Midland, TX
2. David B.: Operations Manager, Motorsports Mafia in Tyler, TX to Builder/Retail Support at Trane AC/Ingersol Rand in Tyler, TX
3. David C.: Sales Rep. at PM Stanley Motorcars, Carrollton, TX to Operations Supervisor at Central States Mfg., Inc. in Cedar Hill, TX
4. Ivan D.: Operations Supervisor at Lowes Distribution Center in Mt. Vernon, TX to Director of QA at Diamond C Trailers Mfg. at Mt. Pleasant, TX
5. Nicholas K.: Merchandiser at Total Wine & More in Houston, TX to Industrial Engineer at The M&R Companies in Schaumburg, IL
6. Kristen L.: Administrative Assistant at Rodriguez Roofing, Inc. in Houston, TX to Warehouse Associate at Barron’s Printing in Houston, TX
7. Rachel M.: Proj. Mgr. at Design Center Signs in Tyler, TX promoted to Senior Project Manager at the same company
8. Dustin M.: HVAC Technician at Lindale ISD in TX to General Maintenance Manager at Walmart in Tyler, TX
9. Christopher O.: Operations Manager Intern at Target in Lindale, TX to Operations Manager and then Productions Controller at the same company
10. Dean Y.: Floorhand at Helmeric & Payne in Houston, TX to Applications Engineer at Legacy Measurement Solutions in Chandler, TX

**Standard 16 - Employer Satisfaction with Job Performance:** Employer satisfaction with the job performance of graduates shall be tracked on a regular basis (two to five years) including employer attitudes related to the importance of the specific program learning outcomes for the program. Summary data shall be available showing employer satisfaction with the job performance of graduates.

Only a third of the graduates gave the name of their immediate supervisor from the survey they completed. From that list, only three employers replied to the survey regarding the satisfaction they had with the graduates of the Industrial Technology program. The graduates immediate supervisors were contacted a second time, however, no further replies from the employers were received. With that said, all of the supervisors were pleased with the graduates and did not list any deficiencies or areas in which the graduate’s education could be improved. The survey is listed in Appendix D.

**Standard 17 - Advisory Committee Approval of Overall Program:** A functioning industrial advisory committee shall exist for each program/option. If more than one program of study or program option is available, then appropriately qualified industrial representatives shall be added to the committee or more than one committee shall be maintained.

The Advisory Committee for the Industrial Technology program provides advice, guidance, and support for its continuing development so it can prepare well-educated graduates from The University of Texas at Tyler.

Fifty percent of the committee is composed of representatives of business and industry while the balance is composed of representatives from government, non-profit enterprises, and graduates. In the Fall of 2016, most of the advisory committee members were replaced since many of them had served two
consecutive three year terms. This was done in order to receive fresh and new ideas to improve the program. In addition, the committee had been expanded to include most of the program directors from area community colleges that have 2+2 articulation agreements with the program. Furthermore, additional industrial representatives were added who either hired our graduates from our MS in Industrial Management program or had graduated from it. The members of the committee are listed below and the By-laws are listed in Appendix H for further clarification.

17.1 - Policies for the advisory committee shall exist that include: (a) criteria for member selection; (b) procedures for selecting members; (c) length of member appointment; (d) committee responsibilities; (e) frequency of meetings (at least one per year); and (f) methods of conducting business.

(a) The Advisory Committee is responsible for providing advice, guidance and support of programs of The Department of Technology. The initial Advisory Committee will consist of nine (9) members. Committee members will constitute a cross-section of the employment community, with special emphasis on private sector employees and employers. Membership will contain the following composition:
   - A minimum of 50% of the committee membership shall be employees in business and industry.
   - The rest of the committee membership shall be employees who represent higher education, nonprofit organizations and student(s).

(b) A Nominating Committee of three members of the Advisory Committee and the Chair of The Department of Technology will be established to maintain adequate committee membership. The composition for the Advisory Committee will always be maintained as presented in these by-Laws.

(c) The Advisory Committee members shall serve a term of not more than three years. The Committee will draw for two-year or three-year terms in order to provide continuity of leadership for the program. Members can choose to serve another term if requested.

(d) The Committee shall assist in promoting the professional image and good relations of The Department of Technology. The specific purposes of the Committee may include the following responsibilities:
   - assure that The Department of Technology addresses the current and future needs of business and industry
   - recommend and review curriculum and program changes which will enable the department to be responsive to business and industry
   - assist in identifying resource needs to support the program mission
   - encourage and develop positive relationships between business and industry and the department, and
   - aid in identifying and securing needed resources
(e) **Meetings:** The committee will meet at least one (1) time per year. Written notices of upcoming meetings will be mailed to members at least ten (10) working days before a meeting. The Chair of The Department of Technology will call The Department of Technology Advisory Committee meetings.

(f) **Methods of Conducting Business:**
- Elect a Chair and a Vice-chair of the Advisory Committee. The Chairperson or Vice-Chairperson of the Advisory Committee will conduct the meetings.
- A majority of the members of the Advisory Committee present will constitute a quorum for the transaction of business at any meeting. Each member will be entitled to one vote on each matter considered by the Committee.
- Advisory Committee members will not use a proxy system. Only those in attendance will vote on issues presented. Members may not appoint someone to take their place on the Committee in their absence for the purpose of voting.
- Agenda items may be proposed to the Chairperson of the Advisory Committee or by any member of the committee at least five (5) working days prior to the mailing of the agenda.
- Ensure Advisory Committee make-up as established by these by-laws
- Action items to be considered will be defined and sent to the Advisory Committee members prior to the meeting, whenever possible.
- Advisory committee meetings are open to all stakeholders; however, only the members and Chair will participate in the conducting of business, unless a stakeholder is recognized by the Committee Chair, for input into the discussion.
- Any member of the Committee will abstain from voting on an issue which directly benefits his organization in favor of another organization. Issues that benefit interested stakeholders equally do not require that a member abstain from voting on the issue.

17.2 - A roster of advisory committee members and minutes of advisory committee meetings shall be made available to the visiting team.

Annual meeting Advisory Committee meeting minutes are listed in Appendix H.

TEL: 805-458-4987  
John.connolly@solarturbines.com
17.3 - Evidence shall exist showing the advisory committee participates in program outcome and program learning outcomes validation and the evaluation of overall program success.

Every three years the Department of Technology provides advisory committee members from the community a survey to rank the importance of the specific Industrial Technology program outcomes. The average rating for each outcome is shared with the committee and changes are made accordingly as reflected in the minutes.

Standard 18 - Outcome Measures Used to Improve Program: Evidence shall be presented showing how both direct and indirect outcome measures have been used to improve the overall program/option*. Evidence that program stakeholders participate in this process must be demonstrated. Outcome measures (standards 14-16) and advisory Board input (standard 17) must be used to improve the program. Measures must include a combination of the following:

- Graduate Satisfaction with Program/Option
- Employment of Graduates
- Job Advancement of Graduates
- Employer Satisfaction with Job Performance of Graduates
- Graduate Success in Advanced Programs
- Student Success in Passing Certification Exams
- Course-based Direct Measures
• Other criteria established by the institution’s Regional Accreditation activities.
• Evidence must exist showing how the Advisory Committee Approval of Program have been used to improve the overall program/option based on data collected and analyzed.

(NOTE: (please use the attached table B in addressing this standard).

The faculty from the Industrial Technology program employ a variety of techniques to obtain feedback on student progress and achievement as evidenced by the Program Continuous Improvement Model (see Appendix G). The model utilized includes learner outcome assessments, analysis and synthesis of assessment information, curriculum approval process and the program and/or course revision process.

Techniques may be formal or informal which provides useful information for program evaluation and development.

Input:
The Department of Technology Course/Program Continuous Improvement Model (see Appendix G) is based on the results of the four instruments listed below. These inputs are all used to formulate program revisions.

1. UT Tyler’s Student Course Evaluation (see Appendix D)
2. The University Graduation Survey (see Appendix D)
3. The Department Alumni Survey (see Appendix D)
4. ATMAE Certified Manufacturing Specialist Exam (see Appendix D)
5. Feedback from Industrial Advisory Committee members at annual meetings (refer to Appendix H).
6. Various outside sources (Journals, research, review of literature)

**UT Tyler’s Student Course Evaluation**
**Description:**
The purpose of UT Tyler’s Student Course Evaluation is to gather student perceptions of the attainment of course objectives, appropriateness of course content, and instructor effectiveness. Students rate a variety of items on a one-to-five scale. An open-ended section is available for comments and/or recommendations.

**The University Graduation Survey**
**Description:**
The purpose of the Graduation Survey is to:
1. Assess student perceptions of the how effectively the program prepared them for employment.
2. Assess the degree of relevance and effectiveness of general competencies.
3. Assess the degree of relevance and effectiveness of degree-specific competencies.
The Department Alumni Survey

Description:
The purpose of the Alumni Survey is to assess graduate placement rates, and determine the need for appropriate program revisions.

Process:
Information is processed through the Department’s Course/Program Assessment model. The process is tracked in the form of Advisory Committee minutes and other appropriate documents.

Outputs:
Outputs from this process are validated changes in courses and programs based on student and Advisory Committee requirements.

Feedback from Advisory Committee

Description:
The Advisory Committee is comprised of representatives from industry and community colleges that are either hire the program’s graduates or prepare them for the first two years of their education.

Process: Industrial Advisory Committee review the content of the program and provide input as to what content in the curriculum should be revised or any other suggestions to improve the program and place graduates.

Outputs: Outputs from this process are validated changes in courses and the program based on Advisory Committee suggestions.

ATMAE Certified Manufacturing Specialist Exam

Description:
The purpose of the ATMAE Certified Manufacturing Specialist Exam is to evaluate how well students have mastered the competencies of the curriculum. The ATMAE certification exam is a national exam that closely parallels the curriculum of the program and also provides feedback on how well the students' mastery of the curriculum compares with students from similar programs throughout the nation.

Process:
Students take the ATMAE certification exam during their last year, once they have completed all of the required course work from the program. Although the exam is not required by all graduates of the program, an incentive is given to students to entice most of the program’s majors to take the exam. Majors of the program are allowed to average a 100 for their final exam grade in at least one of their Industrial Technology courses if they pass the ATMAE certification exam. Faculty feel that if a student can pass a national exam then that supersedes a
final exam grade from a faculty developed exam. In addition, because of this incentive, students adequately prepare for the exam and take the exam seriously. Better results have been obtained by the students now that they are required to pay for the exam and pass it to improve their grade in a course.

**Outputs:**
Students will leave the program with a better understanding of the competencies for the curriculum since they have to review all of their course work in order to pass the national exam. After all the data from the exam results has been disseminated, evaluated, and reported to the Advisory Committee, the program coordinator completes a Program Recommendation Action Form to show what action was taken in program/course improvement.

All assessment methods and continuous improvement results are located in Appendix D.

**NOTE:** In addition to ATMAE accreditation guidelines, the Industrial Technology program maintains SACS regional accreditation and follows guidelines used for AACSB accreditation. Documentation for SACS accreditation is listed in Appendix D using TracDat software.

### TABLE B: Outcomes Measures Used to Improve Program

**Standard 19 - Program Responsibility to Provide Information to the Public:** The program must make available to the public via website, information on student performance and achievement as may be determined appropriate by the institution and/or the program. Information on student performance and achievement may also be provided in hard-copy forms as may be determined appropriate by the institution and/or the program. Sources of potential information include, but are not limited to: student graduation rates from the program; average starting salaries; mean grade point averages; promotions achieved; time to secure first position; average years to complete the degree; and student awards/scholarships received. Institutions are required to provide the hyperlink of where this information located.

The Departmental website has web pages and links to the latest accreditation self-study report, titles of graduates, average salaries of graduates, placement rate of graduates, syllabi of courses, average GPAs, and more. The link to the main department web page is: [https://www.uttyler.edu/cbt/technology/tech/](https://www.uttyler.edu/cbt/technology/tech/)
Figure 2: The University of Texas at Tyler - Campus Map
Appendix A: Course Sample Syllabus

NOTE: All syllabi will be ready for review in the conference room during the site visit.

Dr. Mark R. Miller
mmiller@uttyler.edu
Office: COB 225.04
Time: Monday evenings from 6-8:45 pm
Office Hours: Mondays and Wednesdays 10 am – noon and by appointment
(70% lecture – 30% lab)

Course Description
Applications of metal materials processing with an emphasis on lean manufacturing tools for reducing waste and streamlining production.

Lecture Notes
A copy of the lecture notes is required and can be downloaded online via Blackboard.

Textbook (Required):

Course Objectives
At the end of this course, participants will be able to:
1. Explore the fundamental concepts of lean manufacturing.
2. Develop safe working habits.
3. Become familiar with processing equipment for metallic materials.
4. Develop skills working with metal processing equipment.
5. Investigate metallic materials, specifications, tools, and hardware.

Student Learning Outcomes
1. Demonstrate how to use machine tool technology by successfully manufacturing a class project to specified dimensions.
2. Demonstrate a comprehensive knowledge of lean manufacturing principles by earning passing scores on quizzes and exams.
3. Demonstrate an understanding of sheet metal fabrication by successfully completing a project to required specifications.
4. Demonstrate a fundamental knowledge of the metalworking production industry by earning passing scores on exams and quizzes.
Core Competencies
1. Computer-Based Skills – the student will complete written assignments using the word processor.
2. Communication Skills – the student will exhibit a mastery of both written and oral skills in completion and presentation of the assigned group projects.
3. Interpersonal Skills – the student will interact in class discussion regarding the production industry and lean concepts.
4. Problem Solving (Critical Thinking) – the student will use conceptual thinking to analyze and make determinations regarding the use of industrial processing equipment.
5. Ethical Issues in Decision Making and Behavior - the student will gain an appreciation of the ethics of technology through examination of various processes.
6. Personal Accountability for Achievement – the student will complete the projects at the time designated by the instructor.
7. Competence in Technology Principles
   a. Competence in major field and grounding in other major technology major core areas – the student will gain knowledge and skills related to production technology.
   b. Exposure to and appreciation for industrial experiences such as industrial tours, work-study options and cooperative education, senior seminars – The student will be able to attend field trips to various industries in the area.

Tentative Course Requirements:

</tr>
</tbody>
</table>

Grade Scale Breakdown:
A=90 - 100%
B=80 - 89%
C=70 - 79%
D=60 - 69%
F=BELOW 60%

Note: 89.9999999999999999 is still a B.

Course Policies:
Content for examinations will be taken from lectures, demonstrations, reading assignments, laboratory exercises and any audio-visual materials used, i.e. films, tapes, slides, etc.

Make up examinations are the student’s responsibility. No excuses will be accepted after the exam is given. The instructor must be notified prior to the scheduled exam. If not, the student forfeits his/her right to take the exam. Quizzes will not be made up unless a prior acceptable excuse for an absence has been received by the instructor.
Attendance:
Attendance is mandatory and will be taken at every scheduled class and laboratory period. No make-ups unless:
   1. Organized university trip.
   2. Illness or death in immediate family (mother, father, brother and/or sister).
   3. Illness of student.
Each one of these will require either a doctor’s statement or a signed statement from the individual in charge of the trip.

A student will lose a letter grade in the course each time s/he is absent or late 3 times. Any student entering the classroom 1 second after the scheduled starting time will be considered late unless accompanied with a valid excuse.

Late Work:
All work not turned in on time will have an automatic reduction in value to 50% of its full value. Work that is not turned in by the next class will NOT be accepted. Exceptions to this will be as per University Policy concerning absences from class. If you know an assignment will be late for a valid reason, inform your instructor in advance to avoid unnecessary penalty.

Format for Reports:
Each laboratory report will be placed in a folder, arranged in such that the reader can easily examine the contents. Any materials that are hard to read or require special handling to get at will not be graded. The cover must contain the following:
   1. Assignment Title in BOLD letters and the number of the chapter.
   2. Prepared by: Your Name Here
   3. Submitted to Dr. Mark Miller in partial fulfillment of the course
   4. Course Name, TECH 4323 Lean Production
   5. The Date
Your grade will reflect the quality of the presentation.

Cell Phones:
Cell phones are to be seen and not heard. Make sure you turn off your cell phone during class or turn it to the vibrator mode. A ringing cell phone is a distraction and is inappropriate for the classroom. Allowing your cell phone to ring and then answering it is very rude. It is not fair to your fellow classmates who have paid for this course. Please be considerate and make sure your cell phone is turned off during any of your classes. Students will be asked to leave for the day if this behavior continues.

Discrimination:
The policy of this department is to make your college experience as pleasant as possible. However, if at any time you feel that you are being discriminated against, belittled, or not treated appropriately, please notify the instructor either anonymously or in-person immediately after class. It is not the intention of any
of the faculty in this department to make your college experience an unpleasant one. Remember, the first step in the process is to inform the instructor so s/he can be made aware of the problem and take corrective action. If the problem continues to persist, please inform the chair of the department. The dean can then be notified if the problem continues to exist after a few days. A grievance can then be filed in the Office of Student Services if there has still been no change in the instructor's behavior. **It should be noted that filing a grievance is a serious act and should NOT be done so just because you received a bad grade on an exam or in the course. Communication is an effective tool to solve problems and is rarely used enough. Most people are not deliberately trying to upset you, they are just not aware of your vantage point.**

**Talking:**

While the instructor is talking, it is understood that no one should be talking. Students talking in class prevent other students from hearing the instructor and learning the material that is required to pass the course. If you are caught talking then you will **earn a zero on your daily quiz** grade. On the second offense, **you will be asked to leave.** This behavior is rude and disruptive and most students who talk in class typically earn lower grades. It should be noted, that students who have been granted permission to talk by the instructor should not be interrupted as well.

**Offensive Language:**

Any type of offensive language will not be tolerated in the classroom or laboratory. How you speak to your friends outside the classroom is your business, however, when you are in the classroom you must follow the University of Texas rules of conduct. **You will be asked to leave if your language or conduct is offensive.**

**Required Activities Scheduled Outside of Regularly-Scheduled Class time (fees, tickets, procedures and/or forms required):**

Read textbook, review notes, and complete assignments.

**Department Website:**  [http://www.uttyler.edu/cbt/hrd/tech/](http://www.uttyler.edu/cbt/hrd/tech/)

**Commencement:**  Saturday, December 15 at 1:00 pm, be there by 12:30 at the latest.

**Holidays:**  November 19-24 Thanksgiving Holiday

**UT Tyler Honor Code**

Every member of the UT Tyler community joins together to embrace: Honor and integrity that will not allow me to lie, cheat, or steal, nor to accept the actions of those who do.

**Students Rights and Responsibilities**
To know and understand the policies that affect your rights and responsibilities as a student at UT Tyler, please follow this link: [http://www.uttyler.edu/wellness/rightsresponsibilities.php](http://www.uttyler.edu/wellness/rightsresponsibilities.php)

**Campus Carry**

We respect the right and privacy of students 21 and over who are duly licensed to carry concealed weapons in this class. License holders are expected to behave responsibly and keep a handgun secure and concealed. More information is available at [http://www.uttyler.edu/about/campus-carry/index.php](http://www.uttyler.edu/about/campus-carry/index.php)

**UT Tyler a Tobacco-Free University**

All forms of tobacco will not be permitted on the UT Tyler main campus, branch campuses, and any property owned by UT Tyler. This applies to all members of the University community, including students, faculty, staff, University affiliates, contractors, and visitors. Forms of tobacco not permitted include cigarettes, cigars, pipes, water pipes (hookah), bidis, kreteks, electronic cigarettes, smokeless tobacco, snuff, chewing tobacco, and all other tobacco products. There are several cessation programs available to students looking to quit smoking, including counseling, quitlines, and group support. For more information on cessation programs please visit [www.uttyler.edu/tobacco-free](http://www.uttyler.edu/tobacco-free).

**Grade Replacement/Forgiveness and Census Date Policies**

Students repeating a course for grade forgiveness (grade replacement) must file a Grade Replacement Contract with the Enrollment Services Center (ADM 230) on or before the Census Date of the semester in which the course will be repeated. (For Fall, the Census Date is Sept. 12.) Grade Replacement Contracts are available in the Enrollment Services Center or at [http://www.uttyler.edu/registrar](http://www.uttyler.edu/registrar). Each semester’s Census Date can be found on the Contract itself, on the Academic Calendar, or in the information pamphlets published each semester by the Office of the Registrar. Failure to file a Grade Replacement Contract will result in both the original and repeated grade being used to calculate your overall grade point average. Undergraduates are eligible to exercise grade replacement for only three course repeats during their career at UT Tyler; graduates are eligible for two grade replacements. Full policy details are printed on each Grade Replacement Contract.

The Census Date (Sept. 12th) is the deadline for many forms and enrollment actions of which students need to be aware. These include:

- Submitting Grade Replacement Contracts, Transient Forms, requests to withhold directory information, approvals for taking courses as Audit, Pass/Fail or Credit/No Credit.
- Receiving 100% refunds for partial withdrawals. (There is no refund for these after the Census Date)
- Schedule adjustments (section changes, adding a new class, dropping without a “W” grade)
- Being reinstated or re-enrolled in classes after being dropped for non-payment
- Completing the process for tuition exemptions or waivers through Financial Aid
State-Mandated Course Drop Policy
Texas law prohibits a student who began college for the first time in Fall 2007 or thereafter from dropping more than six courses during their entire undergraduate career. This includes courses dropped at another 2-year or 4-year Texas public college or university. For purposes of this rule, a dropped course is any course that is dropped after the census date (See Academic Calendar for the specific date). Exceptions to the 6-drop rule may be found in the catalog. Petitions for exemptions must be submitted to the Enrollment Services Center and must be accompanied by documentation of the extenuating circumstance. Please contact the Enrollment Services Center if you have any questions.

Disability/Accessibility Services
In accordance with Section 504 of the Rehabilitation Act, Americans with Disabilities Act (ADA) and the ADA Amendments Act (ADAAA) the University offers accommodations to students with learning, physical and/or psychological disabilities. If you have a disability, including non-visible a disability diagnosis such as a chronic disease, learning disorder, head injury or ADHD, or you have a history of modifications or accommodations in a previous educational environment you are encouraged to contact the Student Accessibility and Resources office and schedule an interview with an Accessibility Case Manager. If you are unsure if the above criteria applies to you, but have questions or concerns please contact the SAR office. For more information or to set up an appointment please visit the SAR webpage (http://www.uttyler.edu/disabilityservices/) or the SAR office located in the University Center, Room 3150 or call 903.566.7079. You may also send an email to saroffice@uttyler.edu.

Student Absence due to Religious Observance
Students who anticipate being absent from class due to a religious observance are requested to inform the instructor of such absences by the second class meeting of the semester. Revised 09/16

Student Absence for University-Sponsored Events and Activities
If you intend to be absent for a university-sponsored event or activity, you (or the event sponsor) must notify the instructor at least two weeks prior to the date of the planned absence. At that time the instructor will set a date and time when make-up assignments will be completed.

Social Security and FERPA Statement
It is the policy of The University of Texas at Tyler to protect the confidential nature of social security numbers. The University has changed its computer programming so that all students have an identification number. The electronic transmission of grades (e.g., via e-mail) risks violation of the Family Educational Rights and Privacy Act; grades will not be transmitted electronically.

Emergency Exits and Evacuation
Everyone is required to exit the building when a fire alarm goes off. Follow your instructor’s directions regarding the appropriate exit. If you require assistance during an evacuation, inform your instructor in the first week of class. Do not re-enter the building unless given permission by University Police, Fire department, or Fire Prevention Services.
**Student Standards of Academic Conduct**

Disciplinary proceedings may be initiated against any student who engages in scholastic dishonesty, including, but not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts.

i. “Cheating” includes, but is not limited to:
   - copying from another student’s test paper;
   - using, during a test, materials not authorized by the person giving the test;
   - failure to comply with instructions given by the person administering the test;
   - possession during a test of materials which are not authorized by the person giving the test, such as class notes or specifically designed “crib notes”. The presence of textbooks constitutes a violation if they have been specifically prohibited by the person administering the test;
   - using, buying, stealing, transporting, or soliciting in whole or part the contents of an unadministered test, test key, homework solution, or computer program;
   - collaborating with or seeking aid from another student during a test or other assignment without authority;
   - discussing the contents of an examination with another student who will take the examination;
   - divulging the contents of an examination, for the purpose of preserving questions for use by another, when the instructors has designated that the examination is not to be removed from the examination room or not to be returned or to be kept by the student;
   - substituting for another person, or permitting another person to substitute for oneself to take a course, a test, or any course-related assignment;
   - paying or offering money or other valuable thing to, or coercing another person to obtain an unadministered test, test key, homework solution, or computer program or information about an unadministered test, test key, home solution or computer program;
   - falsifying research data, laboratory reports, and/or other academic work offered for credit;
   - taking, keeping, misplacing, or damaging the property of The University of Texas at Tyler, or of another, if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct; and
   - misrepresenting facts, including providing false grades or resumes, for the purpose of obtaining an academic or financial benefit or injuring another student academically or financially.

ii. “Plagiarism” includes, but is not limited to, the appropriation, buying, receiving as a gift, or obtaining by any means another’s work and the submission of it as one’s own academic work offered for credit.

iii. “Collusion” includes, but is not limited to, the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any section of the rules on scholastic dishonesty.
iv. All written work that is submitted will be subject to review by SafeAssignTM, available on Blackboard.

UT Tyler Resources for Students
- UT Tyler Writing Center (903.565.5995), writingcenter@uttyler.edu
- UT Tyler Tutoring Center (903.565.5964), tutoring@uttyler.edu
- The Mathematics Learning Center, RBN 4021, this is the open access computer lab for math students, with tutors on duty to assist students who are enrolled in early-career courses.

**Lecture/Laboratory Materials:**
Students will be required to provide the following:
1. 3 - Scantrons (Exam type) #882-ES
2. Textbook, notebook, and paper to take notes
*3. Lecture notes packet (available online on the Blackboard website)
4. Pen and pencil
5. ASTM or OSHA approved safety glasses & Hearing protection

**Tentative Schedule**

**August**
Administrative concerns, about the course, assignments
Introduction to engineering metrology
Lathe
Mill

**September**
Hole making and threading
Tooling and cutting theory
Straight and contour cutting
Lab activities

**October**
Micrometers and verniers
Refining metals
Classification of metals
**Midterm Exam**
Lab activities

**November**
Nonferrous metals
Sheet metal
Fasteners
Abrasives

**December**
Heat treating
Lean philosophies
Lab activities
Review for final
**Final Exam** will be from **6-8:00 p.m. Monday, December 10\(^{th}\).**

**November 5,** Last day to withdraw from one or more courses
**November 1,** online registration for **Spring 2019** begins, see your advisor in October so you are not begging for me to let you in a course later when they are all full.
Appendix B: Course Sequencing

*Degree plans are available online or with the Soules College of Business Undergraduate Advising Center.
# Bachelor of Science Degree in Industrial Technology

**Technology Core – 38 Hours**

- **TECH 1303** Engineering Graphics
- **TECH 1320** Industrial Materials
- **TECH 2311** Electrical and Fluid Systems
- **TECH 2319** Programmable Logic Controllers
- **COSC 1307** Intro to Info. Syst. or Equivalent
- **TECH 3311** Manufacturing Processes
- **TECH 3324** Plant Layout & Facilities Operations
- **TECH 3333** Polymer Processing
- **TECH 3344** Industrial Safety
- **TECH 4317** Computer Integrated Manufacturing
- **TECH 4323** Lean Production
- **TECH 4343** Advanced Manufacturing Process
- **UD TECH Elective** (Must be 3000 or 4000 level)

**Professional Core Courses – 12 Hours**

- **TECH 3310** Total Quality Management
- **TECH 3355** Supply Chain Management
- **TECH 3331** Project Management or HRD 4301 Supervision
- **TECH 4372** Capstone Experience or Internship *Requires Dep. Approval
- **TECH 4370** Entrepreneurship

**Minor in Business Administration – 15-18 hours**

- **ACCT 3300** ACCT & FINA For Small Bus & ENTP (ACCT 2301 & 2302 will also satisfy)
- **MANA 3305** Operations Management
- **MARK 3311** Principles of Marketing
- **FINA 3315** Personal Finance recommended or See Catalog

**General Electives 9-15 hrs. to reach 120 hours**

- 3 hrs. General Elective
- 3 hrs. General Elective
- 3 hrs. General Elective
- 3 hrs. General Elective (if needed to reach 120)
- 3 hrs. General Elective (if needed to reach 120)

---

**NOTE:** Student is seeking a Bachelor of Science in Industrial Technology; must have a minimum of 120 hours (At least 42 UD hrs. and 45 resident hrs. for honors eligibility) and a UT Tyler GPA of 2.0+ to be eligible for graduation. This degree will also result in a Minor in Business Administration.
Appendix C: Tenure and Promotion Policy
TENURE

A. Purpose
The purpose of this policy is to specify the procedures for recommending tenure and for implementing policies as set forth in The University of Texas System Board of Regents’ Rules and Regulations, Rule 31007.

B. Persons Affected
Tenure track faculty, Faculty, Department chairs, Deans, Provost, President

C. Definitions
Not applicable.

D. Policy and Procedures
A. The Concept of Tenure
Tenure is a faculty status that assures faculty they will be able to perform their professional institutional responsibilities without fear of arbitrary dismissal. Academic and professional security, the products of tenure, are needed to assure the success of an institution in fulfilling its obligations. To ensure academic freedom, tenured faculty shall tenured until retirement or resignation unless terminated because of:

1. abandonment of academic programs or positions (Regents’ Rules and Regulations, Rule 31003, Section 2)
2. financial exigency (Regents’ Rules and Regulations, Rule 31003, Section 3), or
3. good cause in accordance with Regents’ Rules and Regulations, Rule 31008, Section 1

B. Regulations Governing the Award of Tenure
1. Recommendations regarding tenure of all tenure-track faculty, including administrators holding faculty status, shall be made through consistent application of established procedures set forth in this document with final approval by the Board of Regents
2. A tenure-track appointment is one in which the appointee's principal responsibilities are teaching, professional achievement and professional service.
3. Tenure-track appointments are non-tenured full-time appointments to the faculty. Upon hiring, the tenure-track appointee shall be placed into one of three ranks:
   i. Professor
   ii. Associate Professor
   iii. Assistant Professor
TENURE

4. Tenure is not granted below the rank of Associate Professor.

C. Tenure

1. Regents’ Rules

University of Texas System rules regarding tenure, promotion and termination of employment may be found in Regents’ Rules and Regulations, Series 30000.

2. Importance of Tenure to U.T. Tyler and Faculty

Decisions to grant tenure are the most critical in the professional life of the faculty member as well as U.T. Tyler. The granting of tenure not only denotes a status of continuing appointment, but is also a statement of confidence in the future achievements of the individual. The decision to grant tenure depends in part on what the candidate has achieved in teaching, research/creative activity, and service, and to a greater degree, on a pattern of performance indicative of a lifetime of continued accomplishment and productivity. Thus, the decision to grant tenure requires careful and deliberate planning by each faculty member who expects to be considered for such action, as well as responsible, objective and informed consideration by all who are involved in review and recommendations.

While tenure criteria should be viewed as guidelines for faculty development, more importantly, they are standards for a summative judgment about the individual’s lifelong commitment to U.T. Tyler and to the academic life. The recommendation to grant tenure is an acknowledgment by peers that the candidate is accepted as a life-long member of the academic community. Therefore, the tenure process is a collegial one, and the judgment of faculty colleagues and responsible administrators is required. All recommendations on tenure shall begin at the lowest level of organization in which the candidate resides (department, school, or college), and pass sequentially through the recommending levels. However, in colleges that are organized without departments or schools, nothing in this shall be construed as requiring a review at a level lower than the college. For purposes of document, department chair is synonymous with school director.

3. Department/School/College Policies

Because the needs and goals of each program vary widely, the level of faculty involvement in teaching, research/scholarship/creative activity, and service may also vary from program to program. To this end, each department/school and/or college shall develop written tenure policies of their own. The tenure policies developed by each department/school and/or college shall be consistent with the provisions described here and shall include:
TENURE

a. Definitions and criteria of excellence in teaching, research/scholarship/creative endeavor, and service;
b. Qualitative and/or quantitative standards by which such activities and achievements shall be judged; and
c. A listing of activities and achievements properly associated with tenure, promotion to Associate Professor, and promotion to Professor.

In the development of the criteria and policies for tenure, the tenured and tenure-track faculty within that department/school and/or college shall be consulted. Such policies, both at the departmental and college level, should be reviewed at least once every five years to ensure that they are consistent with U.T. Tyler's and each respective college's expectations and reflect the variance in the responsibilities and assignments of individual faculty members. All tenure policies must be in compliance with University of Texas System and UT Tyler rules and be approved by the Provost and Vice President for Academic Affairs and the President.

4. Performance Standards for the Granting of Tenure

a. There can be no simple list of accomplishments that, when achieved, guarantee that a faculty member will obtain tenure. Tenure is not a right to which a faculty member is entitled, nor is tenure granted simply as a result of a record of satisfactory annual evaluations.

b. To be tenured, faculty must achieve a strong record in 1) teaching and 2) research/scholarship/creative activity. The faculty member further is expected to demonstrate outstanding achievement in one of these areas. The faculty member is also expected to have a satisfactory record of service to the University, profession, and/or community. In addition to demonstrating quality in these traditional areas, the candidate for tenure must also demonstrate professional collegiality. i. Teaching. To qualify for tenure, faculty members must have a consistent pattern of effectiveness in teaching. Tenure will not be granted unless the candidate is deemed to be a strong teacher and demonstrates a commitment to lifelong improvement of his or her teaching skills. Thus it is vital that information concerning teaching effectiveness, gathered from multiple and flexible assessment methods, be part of the tenure review.

ii. Research/Scholarship/Creative Activity. The purpose of research/scholarship/creative activity is to make a substantive contribution to the body of knowledge and understanding in one's discipline. For tenure to be granted, a faculty member must have established a strong, consistent, and progressive program of research/scholarship/creative activity and must
TENURE

evidence a commitment to continue making contributions throughout his or her career.

iii. Service. To qualify for tenure, the candidate must display evidence of commitment to service to the University and to the profession and/or the civic community.

iv. Collegiality. U.T. Tyler defends the concept of academic freedom, which assures each faculty member the freedom to criticize and advocate changes in existing theories, beliefs, programs, and policies, and guarantees faculty the right to support any colleague whose academic freedom is threatened. Collegiality is a professional, not personal, criterion relating to the performance of duties within a department. Collegiality should not be confused with sociability, likeability or conformity to certain views. Instead collegiality addresses such issues as the faculty member’s compatibility with department missions and goals, an ability and willingness to work cooperatively within the department and college, a willingness to engage in shared governance, and a high standard of professional integrity in dealing with colleagues and students on a professional and personal level.

The University subscribes to the following description of collegiality from the American Association of University Professors (AAUP) statement on professional ethics:

As colleagues, professors have obligations that derive from common membership in the community of scholars. Professors do not discriminate against or harass colleagues. They respect and defend the free inquiry of associates. In the exchange of criticism and ideas, professors show due respect for the opinions of others. Professors acknowledge academic debt and strive to be objective in their professional judgment of colleagues. Professors accept their share of faculty responsibilities for the governance of their institution.

5. Appointment and Promotion

The weight of the decision to grant tenure rests on a pattern of performance indicative of a lifetime of continued accomplishment and productivity. The recommendation of tenure for an assistant professor normally shall be concurrent with the recommendation for promotion to associate professor. However, a recommendation for promotion does not require a recommendation for tenure. Recommendation for promotion and tenure must be voted separately.
TENURE

6. External Letters of Review

External letters of review from peers outside the University will be required for tenure-track faculty members applying for Associate Professor and/or tenure who began their tenure-earning service at U. T. Tyler on or after August 1, 2007. All departmental/school and college tenure and promotion policies must adhere to this same implementation date.

A recommendation for tenure must include supporting evidence that the individual’s contributions have had an impact on the discipline; that is, the research/scholarship/creative activity should have made a significant contribution to candidate’s discipline and be recognized by professional colleagues. To that end, the dossier for tenure of all candidates after the implementation dates described above must include a minimum of three (3) outside review letters, with a minimum of one (1) letter from the candidate’s list of external reviewers.

Letters of review should be solicited from disinterested scholars of appropriate rank or stature not affiliated with UT Tyler who serve in the faculty member's field of training, specialty, or a closely related field. Individuals who may have a bias or perceived bias, such as dissertation committee members, co-authors, classmates, former students, research collaborators, departmental colleagues, and friends should not serve as external reviewers.

Reviewers will be nominated by the department chair and the candidate. The candidate should provide the department chair with the names of at least five (5) potential reviewers as well as a statement of their credentials and clarifying the nature of any prior contact the candidate has had with any suggested reviewer. The department chair will likewise compile a list of at least five (5) additional qualified reviewers. Chairs will also disclose their relationships with potential reviewers to the dean of the college. The final selection will be made by the dean of the college. The dean will select three (3) potential reviewers from each list (candidate and chair), resulting in a total of six (6) potential reviewers. Understanding that not all reviewers will agree to participate or that reviews will not arrive in a timely manner, the final list will contain no fewer than five names. At least two (2) reviewers must be from the candidate’s list. The final list of names of external reviewers is to be kept confidential from the candidate.

The department chair shall contact the external reviewers to request their willingness to participate in the external review process. If the reviewers agree to participate, the department chair shall prepare and mail letters requesting outside reviews. Letters shall follow the standard template approved by the University. In the case where an insufficient number of reviewers are unable to participate, alternate reviewers may be selected by the dean.
Tenure

Reviewers will be provided with the candidate’s c.v., appropriate reprints and other representations of the candidate’s scholarship, and a summary of the candidates teaching and service responsibilities since arriving at UT Tyler. The contents of all outside review letters will be kept confidential to the extent permitted by law and University regulations. Candidates will be informed when reviews are received and may have access to them. The department chair will place all reviews into the candidate’s dossier before the departmental committee begins its review. Outside letters received after the departmental committee begins its deliberations will not be included in the review process without the approval of the dean.

The department chair shall prepare a summary of the outside review process that will be included in the candidate’s dossier. This summary shall list the name, position, and organization of each person from whom evaluations were requested. For those whose letters are included in the dossier, the summary shall include relevant information about the reviewers' professional/academic qualifications for evaluating the candidate for tenure and/or promotion.

7. Consideration of Tenure

Because the tenure process is a collegial one, the judgment of both faculty colleagues and responsible administrators is required. There should be no recommendation regarding tenure without formal consultation with the tenured faculty of the department/school and/or college in which the faculty member will hold rank. To that end, each department/school and/or college shall adopt procedures governing the consideration of faculty member seeking tenure. At minimum, such procedures shall include the following:

a. All cases for tenure shall pass sequentially through the recommendation levels as described below.

b. Faculty eligible to vote are those with tenure in the case of a faculty member being consideration for tenure. Where there are fewer than three eligible faculty in a department, the dean, in consultation with the candidate, will select eligible faculty from similar or related departments.

c. The tenured faculty of the department shall vote by secret ballot on the tenure of the faculty member being considered. The outcome of the vote and the vote count shall be recorded.

d. A college committee of tenured faculty shall vote by secret ballot on the tenure of a faculty member being considered. The outcome of the vote and the vote count shall be recorded.
TENURE

e. The appropriate administrator at each level of review shall inform the faculty member in writing of the vote or recommendation before the file is sent forward to the next level.

f. No person shall serve as a voting member of any tenure committee during an academic year in which he or she is under consideration for tenure, nor shall any individual make a vote or recommendation on his or her tenure nomination.

g. Voting members shall leave the room during deliberations on a faculty member with whom they share a significant personal or professional relationship and shall abstain from voting or making a recommendation concerning that faculty member.

8. Tenure Process

The institutional tenure decision-making process begins with the faculty member being considered and ends with the President. A faculty member should consult the dean regarding the timetable for the process.

a. Request for Early Decision

Faculty members may request consideration of an early tenure decision by presenting a written request to the department chair by June 1, prior to the academic year during which the tenure decision is to be made. If the Department chair makes a positive recommendation to the dean for early tenure, it must be justified with evidence that the candidate meets the written criteria established for those who apply for tenure during their sixth year of service. If the Department chair denies the faculty member’s request for early tenure, the faculty member may request that the dean review the department’s decision. The dean will not recommend early tenure unless the evidence of accomplishment meets the written criteria established for those who apply for tenure during their sixth year of service. There is no appeal beyond the College dean. A denial of early tenure shall not prejudice action on tenure at the completion of the usual probationary period.

b. Faculty Responsibility

It is the responsibility of all faculty to be aware of departmental, college, U. T. Tyler and U. T. System rules and regulations regarding tenure. The faculty member who is to be considered begins compiling his or her files in the summer. The documentation of professional accomplishments shall be submitted in accordance with the criteria, standards and guidelines established by the department and/or college.
At no time after the deadline for submission of the materials may additional materials to be used in the review process be placed into or withdrawn from the file without the permission of the dean. A faculty member being reviewed may withdraw from further consideration for tenure promotion at any point in the process by submitting to the dean a written request for withdrawal. Withdrawal from consideration of tenure in the sixth year of the probation period may be done only by formal resignation, which is effective no later than the end of the subsequent, or seventh, year.

c. **Departmental Recommendation**
   The departmental recommendation for or against tenure is the responsibility of the tenured faculty. For all cases of tenure that are reviewed at the departmental level, there shall be a recommendation and a record of votes of faculty qualified to participate. That recommendation and vote shall be forwarded to the department chair.

d. **Department Chair**
   The vote of the qualified faculty in the department is advisory to the department chair. After making an independent judgment on the tenure, the chair shall submit his or her recommendation and written summary to the chair of the college committee. The department chair will notify the affected faculty member if his or her recommendation differs from that of the department faculty. In cases where the chair’s recommendation and that of a departmental faculty differ, the faculty may submit a dissenting report to the college committee.

e. **College Committee**
   Committee members shall individually review the file of the faculty member being reviewed, taking into consideration the departmental criteria and guidelines for tenure. The recommendation of the members and a vote count are recorded and forwarded by the committee chair to the dean along with the file of the faculty member and the department chair’s recommendation and summary. Committee members shall leave the room during deliberations on a faculty member with whom they share a significant personal or professional relationship and shall abstain from voting on or making a recommendation concerning that faculty member.

f. **Dean**
   The dean, after review of the faculty member’s file and, if appropriate, consultation with the department faculty, department chair and college committee, prepares his or her recommendation. Before submitting the recommendation to
TENURE

the Provost and Vice President for Academic Affairs, the dean will notify the affected faculty member of his or her recommendation and provide him or her a copy of the college committee’s recommendations.

g. Provost and Vice President for Academic Affairs
After review of all materials and consultation with the dean and any other appropriate individuals or groups, the Provost and Vice President for Academic Affairs will prepare his or her recommendation regarding tenure. The Provost and Vice President for Academic Affairs will notify the candidate of his or her recommendation. The Provost and Vice President for Academic Affairs’ recommendation, along with all previous recommendations, shall be forwarded to the President.

h. President
After review of all recommendations, the President will prepare his or her recommendation regarding tenure. The President will notify the affected faculty member of his or her recommendation and provide the candidate an opportunity, within two weeks of notice, to discuss the recommendation. Recommendations for tenure are then forwarded to the U. T. System for appropriate review and required action.

E. Responsibilities
Not applicable.

F. Review
The Divisional Head for this policy is the Provost and Vice President for Academic Affairs. This policy shall be reviewed every five years or sooner if necessary by the Provost and Vice President for Academic Affairs, the Faculty Senate President, the Council of Academic Deans, and a committee of faculty members designated by the Faculty Senate.

Program Mission Statement: The Industrial Technology program at The University of Texas at Tyler provides its students with a comprehensive educational experience comprised of a vast array of technical skills and business knowledge deemed necessary for successful professional careers. Our high quality, accredited program offers courses online and face-to-face, thereby enabling students the flexibility to earn a degree that fits their schedule. Students from the program will learn from faculty scholars who have nationally recognized expertise in various technologies and engage in research and creative activity.

ATMAE CME RESULTS MAY 7 2011

**Closing The Loop:** The course TECH 4323 Lean Production that covers metrology was revised to incorporate more material on metrology. TECH 4380 Total Quality Management is currently being covered by an adjunct due to accelerated growth in the program and no permanent faculty available to teach the course. A request has been submitted to hire a new faculty member to cover all the courses adjuncts have been teaching. It has been found that many of the current students had not had a technical drafting course and were allowed to substitute any lower division technical course in its place. This policy has since halted and a technical drafting course will be offered to students once a new faculty member is hired. (11/29/2015)

**Analysis & Planning:** Based on results, although the students did much better than the national average on the ATMAE CMS certification exam, they did have some issues with the bending and sheet metal classification areas. More time has been planned to be committed to these areas in the course TECH 4323.

Polymers - Students will be able to identify and determine the correct process for manufacturing various plastic parts.  
Outcome Status: Currently Being Assessed  
Start Date: 01/21/2013  

Licensing Exam - Students will take the ATMAE national certification exam by which a section covers industrial plastic/polymers processing. TECH 2223.  
Criterion: The Industrial Technology students at UT Tyler will average higher scores on the Polymers section of the ATMAE Certified Manufacturing Specialist (CMS) exam than the current year average, which is composed of the average of all individuals from across the country who took the exam for that year.  
Schedule: Every spring semester.  

Follow-Up Status: In-Progress  
Result Type: Criterion Partially Met  
The Industrial Technology students at UT Tyler averaged a perfect score (10 out of 10) on the Polymers section of the ATMAE Certified Manufacturing Specialist (CMS) exam. This was almost twice as good as the national yearly and historical average. (02/27/2018)  
Assessment Cycle: 2016-2017  
Notes: Although the students did very well on the CMS, the department will try and make more students take the exam.  
Related Documents: 2017 MAY CMS EXAM RESULTS polymers.docx  

Analysis & Planning: Students were awarded extra credit if they took the ATMAE CMS exam in order to encourage them to take the exam. Students were only be allowed to take the exam if they finished all their Technology course work. (06/29/2018)

### Outcomes

- Career: Graduation with preparation for Graduate/Professional School; and Overall satisfaction with educational experience at UT Tyler.

### Assessment Methods

- Effective 2015-16: Add satisfaction with academic advising items.

### Criteria:

- Effective 2015-16: 90% Agreement department/faculty advisor was easy to contact, achieve graduation timeline, accurate degree plan information; 90% Agree degree emphasized marketable skill for future career plans and 90% Satisfied with overall educational experience. (Formerly: 90% of survey respondents indicate Excellent or Adequate Preparation for Career Field and/or Graduate/Professional School. 90% Very Satisfied/Satisfied with overall educational experience.)

- 2015-16: 90% Strongly Agree/Agree they were satisfied on each of the administrative/other specific to the department advising.

### Schedule:

- Results are collected annually and analyzed every other year on odd numbered year.

### Related Documents:

- Overview of UT Tyler Graduation Exit Survey

### Results

#### Follow-Up Status: In Progress

- Result Type: Criterion Met

- 2016-2017 Department or faculty advisor was easy to contact: 36 of 35 (92%) Agree, helped complete degree in a timely manner: 37 of 39 (94%) Agree, helped create an accurate degree plan: 37 of 39 (95%) Agree, Prepared for Career Field: 25 of 25 students (100%) Excellent/Adequate, Prepared for Grad/Professional School: 3 of 3 students (100%) Excellent/Adequate, Overall Satisfaction with overall educational experience: 27 of 28 students (96%) Satisfied

#### Assessment Cycle: 2016-2017

- Related Documents:
  - UT17-CBT-8-Industrial Technology.pdf

### Analysis & Planning

- Analysis & Planning: We plan to close the survey items on student's perception of career field and grad/professional school preparation based on feedback that students are unable to respond accurately.

- Faculty reviewed the student exit survey results and since the outcome was over 90%, for all academic advising items, the faculty plan to continue collaborating with college advisors to continue providing quality advising for our students. 2017-18 results will be reported separately for both the UT Tyler campus and the Longview instructional site.

#### Closing The Loop: Closed survey item: Prepared for grad/professional school.

- 2018-2019: Added survey item: Degree emphasized marketable skills for future career plans. (02/07/2019)

#### Closing The Loop: The Souls College of Business Academic Advisors reviewed and updated the college academic advising point of service survey that was provided to every student for face-to-face or online advising session. The Point of Service Survey items triangulate with the exit survey advising items and the first report including results from both surveys were generated in June 2018. (06/29/2018)

COLLEGE OF BUSINESS AND TECHNOLOGY PERFORMANCE EVALUATION GUIDELINES

Preamble
The College of Business and Technology (CBT) faculty believe that a fair and systematic performance evaluation system is a necessary condition for guiding an individual faculty member’s professional development and is a critical element of efforts to implement the mission and improve the quality and reputation of the CBT. Based on the policies defined in the university *Handbook of Operating Procedures* (HOP), the performance evaluation system specified in this document describes shared beliefs about the activities, behaviors, and outcomes that will help the CBT remain competitive.

The philosophy guiding the performance evaluation system incorporates the following six basic beliefs:

- The ongoing review and improvement of the performance evaluation system will help continually examine the activities, behaviors, and outcomes necessary to achieve the mission and goals of the departments and the CBT.

- A well-defined performance evaluation system will serve as a guide for new and existing faculty to improve job performance and professional development. This document helps specify the activities, behaviors, and outcomes that are valued.

- The performance evaluation system explicitly recognizes that individual faculty members can make a significant contribution to the CBT in many different ways. Thus, it is recognized that different weightings of the evaluation criteria are appropriate for different faculty members and that alternative sets of activities, behaviors, and outcomes may result in the same level of overall performance.

- There are many different forms of scholarly activities that are important to the profession and to various stakeholders. Each of these diverse forms of scholarship is valued. Consequently, one or more scholarly activities must be explicitly incorporated in each dimension of performance.

- The annual performance evaluation process should provide consistent and accurate feedback about job performance. The job performance and formative feedback history documented in the annual review process constitute only one piece of information that will be incorporated in promotion, tenure, and post-tenure review decisions. Receiving a “meets or exceeds expectations” does not guarantee promotion or tenure.

- We recognize that professional performance is very complex and cannot be accurately and reliably measured on simple interval scales. Thus, great confidence is placed in the professional judgment and integrity of the Department Chairs/Coordinator, and the Dean. These individuals are charged with insuring that the performance evaluation process is conducted in a fair and impartial manner.

Purpose
The performance review is designed to provide both summative and formative information. The summative information will provide input into decisions about annual merit pay increases, contract renewals, and faculty workloads. In most cases, these summative decisions will be based on the
performance review conducted by the Department Chair/Coordinator. The formative information generated during the performance review process is expected to play an important role in the ongoing career development of each faculty member. It is the responsibility of the Department Chair/Coordinator to provide each faculty member with ongoing professional development feedback and guidance.

The annual performance evaluation does not replace the role of the cumulative review processes in the department. Thus, in addition to the annual performance reviews, untenured faculty members will receive a 3rd year review prior to being reviewed for tenure, and post-tenure reviews following tenure. Faculty members are expected to include copies of each annual review in the materials submitted for cumulative reviews.

**Process and Timetable**

1. The Performance Evaluation Guidelines can be found on the CBT shared computer drive.

2. All faculty members will receive an annual performance review each year. The *approximate* timeline follows:

   a. March 20 (one week after return from Spring Break). **Faculty information must be complete in FAC 180.**
   b. April 15 completed faculty evaluations due to the Dean for review.
   c. April 20 – May 7 Chair/Coordinator meets with faculty individually to discuss evaluation.
      Chairs/Coordinator provide each faculty member a copy of their evaluation and a copy is provided to the Dean’s Office.
   d. May 31 all evaluations complete and certified to Provost’s Office.

3. The results of the Annual Performance Review by the Chairs/Coordinators will be summarized on the Performance Evaluation form. Each faculty member will be rated on the dimensions of Teaching, Research, Service, and Collegiality.

   On each dimension, a faculty member will be evaluated on a four-point scale:
   1 – Unsatisfactory
   2 – Does not meet expectations
   3 – Meets expectations
   4 – Exceeds expectations

   An individual faculty member need not demonstrate each of the activities in a category to achieve the corresponding level of performance, and exhibiting a single activity, behavior or outcome in a category does not automatically place the faculty member’s performance in that category. The professional judgment of the Department Chair/Coordinator and Dean are relied upon to fairly and accurately evaluate the performance of each faculty member.

4. The score on the Teaching, Research, and Service dimensions will be weighted by the appropriate percentage of effort for the faculty member on that dimension. For example, if a faculty member is to spend 50% of his/her effort on research, the score for research is weighted by 50%. See Workload policy for appropriate distribution of effort scenarios.

   The weighted scores plus the Collegiality score will be averaged into a single number that is used for summative purposes.

   The Chair/Coordinator must also provide an overall rating. This is a holistic evaluation and not merely a function of the summary score. However, large differences between the weighted average of the individual dimensions and the overall evaluation requires justification.
5. At the discretion of the Chair/Coordinator and the Dean, a rating of unsatisfactory on any performance dimension may trigger a professional development process for the faculty member. This plan is developed in consultation with the Department Chair/Coordinator and provides specific actions that the faculty member will take to improve his or her performance on the appropriate dimension(s). The initial draft of the professional development plan will be submitted to the Department Chair/Coordinator by May 15, and the final version approved by the Chair/Coordinator will be submitted to the Dean by May 31. Failure to submit and implement a professional development plan may be cause for termination.

6. Repeated performance evaluations of unsatisfactory on any single dimension or as the overall performance rating may be cause for termination.
TEACHING DIMENSION OF PERFORMANCE

Teaching is a core activity for all members of the faculty and the primary revenue generating activity for the College of Business and Technology. As such, it is imperative that all members of the faculty contribute to the continuing improvement and integration of the curriculum, instructional delivery, and collective learning environment. Despite the importance of teaching, mechanisms for evaluating teaching effectiveness are underdeveloped. No single instrument, method, or data source has been demonstrated to provide a valid and reliable approach to evaluate teaching performance. Thus, teaching performance in the CBT will draw on multiple sources of information including those provided by the faculty member, students, peers, and administrators.

The minimum documentation required for evaluating teaching performance includes copies of the student teaching evaluations for each class, a syllabus for each class, and a clear statement of learning objectives for each class. Faculty members will submit via FAC 180. Materials that cannot be submitted on FAC 180 may be submitted directly to the Chair/Coordinator.

Performance Criteria for Teaching

1 – Unsatisfactory
Below are the activities expected of each faculty. Failure to meet these expectations will result in the score of “1” – Unsatisfactory.

☐ Regularly meets classes as scheduled and holds appropriate office hours
☐ Ensures that course content is consistent with the CBT curriculum
☐ Ensures that course materials are current and relevant
☐ Provides students with a current course syllabus
☐ Maintains a current and relevant Blackboard page for each course
☒ Cooperates with activities to support both the CBT Assurance of Learning program and SACS assessment.
☐ Typically receives student teaching evaluations above 3.5 on a scale of 5.0

2 – Below Expectations
A faculty member who only meets the expected activities noted below will be evaluated as “2” - Below Expectations.

☐ Regularly meets classes as scheduled and holds appropriate office hours
☐ Ensures that course content is consistent with the CBT curriculum
☐ Ensures that course materials are current and relevant
☐ Provides students with a current course syllabus
☐ Maintains a current and relevant Blackboard page for each course
☐ Cooperates with activities to support both the CBT Assurance of Learning program and SACS assessment.
☐ Typically receives student teaching evaluations above 3.5 on a scale of 5.0

3 – Meets Expectations
In addition to performing the activities necessary to earn a “2” or “Below Expectations” rating, a faculty member evaluated as “Meets Expectations” will provide evidence that they have achieved several of the following outcomes during the previous year:

☐ Creates updated course materials on a yearly basis
☐ Integrates his or her current research with the course content when appropriate
☐ Creates an active learning environment through the appropriate use of exercises and assignments, lectures, and other instructional strategies and techniques
☐ Participates in or coordinates multiple section courses in the core
☐ Remains competent in and instructs multiple different courses
☐ Typically receives student teaching evaluations above 4.0 on a scale of 5.0

4 – Exceeds Expectations
In addition to performing the activities necessary to earn a “3” or “Meets Expectations” performance rating, a faculty member evaluated as “Exceeds Expectations: will provide evidence that they have achieved several of the following outcomes” during the previous year:
☐ Engages in new course development or significant revisions to existing courses
☐ Engages in significant efforts to initiate program revisions within the CBT
☐ Publishes a case in widely used text book
☐ Publishes pedagogical materials in refereed outlets
☐ Publishes multiple pedagogical articles in refereed outlets
☐ Publishes a textbook or casebook that is widely used
☐ Receives a teaching award from the College, the University, or a professional association
☐ Typically receives teaching evaluations above 4.25 on a scale of 5.0
RESEARCH DIMENSION OF PERFORMANCE

(Tenured and Tenure-Track Faculty)
Research activities are the primary mechanism through which faculty members make intellectual contributions to the College of Business and Technology and to their respective professions. Typically, the evaluation of research will focus on the creation of new knowledge (basic scholarship) and the application, transfer, and interpretation of knowledge to advance the practice of management (applied scholarship) that is disseminated through refereed scholarly journals, scholarly books, and high quality practitioner journals. Other types of scholarly activities, such as instructional development, business cases, consulting activities, and publications in trade journals are explicitly incorporated in other areas of the annual performance review document and thus do not contribute to the research dimension of performance.

The research dimension only will incorporate a 3-year moving evaluation period to allow for uneven publication cycles. Special consideration will be given to faculty with less than 3 years of service. Research for the performance evaluation will only be considered when published not when accepted and, thus, should be presented with full citation. Documentation required to evaluate research performance will be submitted via FAC 180.

An ongoing pattern of unsatisfactory ratings on the research dimension may constitute unsatisfactory cumulative performance.

Performance Criteria for Research
1 – Unsatisfactory
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved only the following during the previous 3-year period:
- Created a substantial draft of a new paper for submission to an academic conference of journal
- Created a substantial draft of a new scholarly book chapter
- Gathered new data for an ongoing research project
- Made significant revisions that demonstrate progress on existing working paper(s)
- Renewed IRB approval to continue research on prior research study
- Submitted at least one scholarly paper to an academic conference
- Presented at least one intellectual contribution at a regional academic conference
- Submitted at least one scholarly paper to an academic journal for blind peer review
- Responded to at least one “revise and resubmit” editor letter by revising and resubmitting a scholarly paper to an academic journal
- Presented research at a department, college, professional, or academic seminar
- Published research or a position paper in practitioner outlets

2 – Below Expectations
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved several of the following outcomes during the previous 3-years:
- Engaged in significant ongoing research activities
- Submitted manuscript(s) or manuscript revisions to academic journal(s)
- Presented at national or regional conference appropriate for discipline
- Provided evidence of work under review at journals on the CBT journal list
- Published chapters in scholarly or professional books
- Completed technical reports to funding sources
- Applied for research or grant funding
3 – Meets Expectations
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved several of the following outcomes during the previous 3-years:

- Published one or more manuscripts in a journal on the CBT journal list
- Obtained internal (college or university) research funding
- Applied for significant external research funding
- Received external research funding
- Supervised doctoral students in ongoing research activities
- Received a best paper or best track award
- Received a research award from a department, the CBT, or UT Tyler or a professional/academic association
- Published/Presented multiple papers at national conferences

4 – Exceeds Expectations
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved several of the following outcomes during the previous 3-years:

- Published multiple blind peer review articles in journals that are ranked as “A” or “B” on one of the CBT departmental journal lists
- Published a paper in a journal that is ranked “A+” on one of the CBT departmental journal lists
- Received significant external research funding
- Received a research award from a regional or national professional organization
- Published or edits scholarly book or textbook
- Received a patent for intellectual property
- Served as Editor or Associate Editor for a journal on the CBT journal list
RESEARCH DIMENSION OF PERFORMANCE

(Lecturers and Senior Lecturers)
Generally, Lecturers/Senior Lecturers with the faculty status of IP are not considered to have any research expectations (workload would be 0% for research). However, the requirements to obtain/maintain the faculty status of SP may include a research component. The workload distribution for research may be greater than 0% with concurrence of the Chair/Coordinator and the faculty member. When that is the case, the performance criteria shown below will be used for the research dimension.

Research activities are one mechanism through which lecturers and senior lecturers maintain appropriate SP faculty status. Typically, the evaluation of research will focus on activities that demonstrate currency and relevancy in the field of teaching. The set of activities encompass peer reviewed journal articles, publications and presentations at professional meetings, among others.

Documentation required to evaluate scholarship and professional activities will be submitted via FAC 180.

It should be noted that an ongoing pattern of unsatisfactory scholarship and professional activities is not sufficient for a given faculty member to maintain his or her status as being considered AACSB Qualified. An ongoing pattern of unsatisfactory ratings on the scholarship and professional activities dimension constitutes unsatisfactory cumulative performance.

Performance Criteria for Research
1 – Unsatisfactory
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved none of the following outcomes during the previous year:
☐ Attended regional professional meeting in discipline
☐ Submitted at least one manuscript to a regional conference
☐ Presented research at a “brown bag” seminar
☐ Participated in select AACSB seminars and workshops

2 – Below Expectations
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved several of the following outcomes during the previous year:
☐ Attended regional professional meeting in discipline
☐ Submitted at least one manuscript to a regional conference
☐ Presented research at a “brown bag” seminar
☐ Participated in select AACSB seminars and workshops

3 – Meets Expectations
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved several of the following outcomes during the previous year:
☐ Submitted manuscript(s) to journal(s)
☐ Presented at national or regional conference appropriate for discipline
☐ Applied for research funding
☐ Published materials in academic or professional outlet

4 – Exceeds Expectations
Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved several of the following outcomes during the previous year:
- Published in peer reviewed journals
- Submitted manuscripts to national conferences appropriate for discipline
- Obtained internal or external research funding
- Presented paper at regional or national conference
- Received a research award from a regional or national professional organization
- Published scholarly book(s) (as author or editor)
SERVICE DIMENSION OF PERFORMANCE

Service is an important and valued activity that is a key responsibility for each faculty member. Each member of the faculty is expected to provide significant service to the department, college, and university. In addition, faculty members are expected to engage in other service activities to the broader community including service to professional organizations, business organizations, government organizations, and/or community organizations.

Given the large assortment of service options, a large variation in the service of individual faculty members is expected. No single type of service is preferred, and many different types of service are valued. It is also expected that the amount and type of service contributions to vary with an individual’s career stage. Junior faculty members often have lower service requirements and are likely to focus more on internal service activities. More senior faculty members are expected to make greater overall service contributions and are likely to focus on more external service activities. Thus, the Department Chair/Coordinator and the Dean may shift the behavioral descriptions somewhat to adjust for the career position of the individual faculty member.

Documentation required to evaluate service performance will be submitted via FAC 180.

Performance Criteria for Service

1 – Unsatisfactory

Faculty members will earn this performance rating when their annual evaluation materials clearly provide evidence that they have achieved none of the following outcomes during the previous year:

☐ Regularly attended department and CBT faculty meetings
☐ Provided service to department
☐ Conducted consulting activities that benefit the department or college
☐ Provided oversight to student groups when asked
☐ Was regularly present in office and meetings
☐ Attended graduation convocations when possible

2 – Below Expectations

In addition to performing the activities noted above, a person will earn this rating when their evaluation materials clearly provide evidence that they have achieved multiple outcomes from the following during the previous year:

☐ Regularly attended department and CBT faculty meetings
☐ Provided service to department
☐ Conducted consulting activities that benefit the department or college
☐ Provided oversight to student groups when asked
☐ Was regularly present in office and meetings
☐ Attended graduation convocations when possible

3 – Meets Expectations

In addition to performing the activities noted above, a person evaluated as “Meets Expectations” will provide evidence that they have also achieved several of the following outcomes during the previous year:

☐ Actively served on at least one CBT committee or taskforce
☐ Served as faculty sponsor of a student organization
☐ Served on Faculty Senate
☐ Actively participated in departmental efforts
☐ Supervised doctoral students if applicable
☐ Conducted significant consulting activities that benefit the CBT, department, University, community or national professional organization
☐ Conducted significant review for scholarly journals in their discipline
☐ Actively participated in professional associations
☐ Served as coordinator for one or more of the multiple section core or interdisciplinary courses
☐ Edited and/or reviewed papers for colleagues
☐ Reviewed papers for proceedings and journals
☐ Served on major University and CBT and department committees
☐ Provided support to colleagues by attending their presentations
☐ Served on an editorial board for a major journal
☐ Directed CBT Center
☐ Represented CBT at University and Community events*

4 – **Exceeds Expectations**
In addition to performing the activities noted in the above categories, a person evaluated as “Exceeds Expectations” will provide evidence that they have also achieved several of the following outcomes during the previous year:
☐ Actively participated on multiple CBT of University committees
☐ Chaired a Faculty Senate Committee
☐ Was an active reviewer for two or more journals on the CBT journal list
☐ Chaired (or co-chaired) a major CBT committee or taskforce
☐ Helped with Development and Alumni Relations
☐ Served as an active mentor for junior faculty members
☐ Provided economic development activities
☐ Served as an officer or program chair in a professional association
☐ Held an officer position in a regional or national professional organization
☐ Demonstrated significant Center activities
☐ Delivered significant executive education activities

SOULES COLLEGE OF BUSINESS
ANNUAL FACULTY PERFORMANCE EVALUATION

Faculty Member: __Example_________ Evaluation Year: 2017-2018

Current Rank: ________________

Rating Scale:
1 = Unsatisfactory
2 = Does not meet expectations
3 = Meets expectations
4 = Exceeds expectations

Rating x Weight* = Score
Teaching 4 .2 = .8
Research 4 .2 = .8
Service 4 .1 = .4
Administration 4 .5 = 2
Average Score 4

*Distribution of effort percent

Meeting appropriate faculty qualification status?
■ Yes Check Status: □ SP □ IP □ SA □ PA
□ No Explain on Page 2

If on tenure track, progress toward Tenure/Promotion? Complete narrative on Page 2
□ Yes □ Some Degree □ No

If Associate, progress toward promotion? Complete narrative on Page 2
□ Yes □ Some Degree □ No

Meeting expectations regarding collegiality (1-4 scale) 4

OVERALL EVALUATION (1-4 scale) 4

Is a professional development plan required?
■ No
□ Yes For which dimension(s) ________________

Distribution of effort for next academic year (complete goals for each area on reverse):
Teaching 20%
Research 20%
Service 10%
Administration 50%

Chair/Coordinator: ________________ Date: 11/30/18

I have read and received a copy of this evaluation:
Faculty Member: ________________ Date: 11/30/18

Dean: ________________ Date: ____________
If not meeting appropriate faculty qualification status, why:

N/A

**Progress toward Tenure/Promotion.** Receiving a “meets or exceeds expectations” does not guarantee promotion/tenure:

Areas of strength:

N/A

Areas requiring work:

**Progress toward Promotion:**

Areas of strength:

N/A

Areas requiring work:

N/A

**Summarize goals for next year in each area:**

**Teaching:**
Continue to revise courses and upgrading technology in the labs as noted by industry and our professional journals.

**Research:**
Continue to publish textbooks and articles in the discipline.

**Service:**
Continue to maintain ATMAE accreditation for both the graduate and undergraduate programs. Improve the quality of all the HRD programs and improve their image throughout the profession. Grow the enrollments in all the programs and especially at the LUC.
Student Course Evaluation Form

Sample of New Online Format

Students can select from a scale of 1 to 5. A grade of 5 being the best and 1 being the worst.

All instructors can be accessed at: [https://apps.uttler.edu/courseevals/homepage.aspx](https://apps.uttler.edu/courseevals/homepage.aspx)

Faculty and chairs are also provided a lot more information including comments from the students which are very helpful in order to continuously improve the courses. An example is listed below.

**Example John Doe**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Question</th>
<th>Comments 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>TECH 3310.060</td>
<td>Please identify area(s) where you think the course could be improved.</td>
<td>Everything was good.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>It's great as it is.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Nothing</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Nothing comes to mind. Great professor that was prepared from the beginning and always communicated effectively.</td>
</tr>
<tr>
<td></td>
<td>TECH 5336.060</td>
<td>Please identify area(s) where you think the course could be improved.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>For the future, it would be nice if all of the assignments were posted beforehand just so that students have an idea of what assignments are going to be due in the future for planning purposes. On a positive note, I really did like the 5S assignment with the numbers. More assignments like that would be beneficial, in my opinion.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>I think the only recommendations I’d like to make is that 1) each week have a question list like the question lists we had to answer and submit for credit this semester. We didn’t do them every week, but I found them helpful for retaining information, and 2) that the items for use on projects be streamlined into a phase based filing system using Box, Dropbox, and some other Canvas compatible application, so that each week’s listings isn’t such a jumble.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Dr D was a great instructor this semester. I enjoyed his class and the assignments kept me engaged in the course. I would definitely take another course by Dr. D if applicable!</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Very insightful learning experience from this course and the professor as well. Strong work Dr. D.</td>
</tr>

Q1.28 - Comments:

UT Tyler needs major upgrading. I know that the plans are to build a new business and technology building and the campus has grown over the past couple of years, but the labs for Industrial Technology pale in comparison to the work spaces at Tyler Junior College. Also, having 42 people in a class where you are expected to use a limited amount of power tools to produce lab work is ridiculous, why the decision was not made instead to have two classes is frustrating for me. I have also had a professor request that students bring laptops to class, and then on the first day of class tell us we need to have them fully charged because the room was set up to have outlets to charge. Why not have the class in one of the multiple computer labs on campus? Both of these classes are senior level classes. I have been at UT Tyler part time while working full time. As a "nontraditional" student who has been in the workforce for many years, I find a lot of the studies to not be applicable or realistic to real world working conditions or situations. I believe a remedy of this is to have professors that actually interact or serve on boards with other business owners and managers (I believe there are some that do but I think this should be a requirement for all, especially business and HR faculty). Overall, I love the Industrial Technology program, I just feel like my education was short changed do to lack of space and faculty. I feel that most of the faculty did everything they could to make up for inadequacy with the campus, but after touring TJC's campus I was shocked that their facilities were so much nicer than UT Tylers. UT Tyler's ever increasing tuition and enrollment size should afford for much better facilities and more faculty.

Overall my experience since I have transferred to UT Tyler has been great. I initially started out in Electrical Engineering and was very disappointed in their inability to solidify their theories expressed in lectures in lab exercises. The one professor that took his time with everything and made sure all of the students understood what he was teaching was more or less forced to leave. I changed my major to Industrial Technology and felt right at home. I enjoy working with my hands more than I do just sitting in a classroom talking about doing activities. Unfortunately there is one specific new instructor that is essentially ruining entire classes just because he does not know how to explain things correctly. Other than the Electrical Engineering program letting me down tremendously and the terrible new instructor in the industrial Technology program, UT Tyler has been a great experience.

I do not like that fact that I failed my first semester ever in college or high school, because I could not set my Pathbrite E-portfolio class to public. I received a B in a class which brought down my GPA with something not related to my field of study. The course material is good, to fail a class related to social media with no actual application to the real world is a key to why our society is struggling to accept true intellect. People tend to rather seem smart instead or give the impression of being intelligent of actually gain knowledge and share it. It is the personification of efficiency over effectiveness. Yes it is efficient to have a linked in account but not truly effective in gaining useful employment. The only true application for the class is to booster the colleges ability in social media.

Amazing campus, welcoming staff and supportive community

A lot of these questions did not apply to me. I transferred to UT Tyler and I was almost done with my degree plan. Overall I loved my experience here. I started out in Electrical Engineering and was disappointed with their inability to solidify what we were covering in lecture in their lab procedures. The Electrical Engineering department is
extremely heavy in the theoretical side which is great, but if you do not back that up with a lab exercise that showcases that, then the students will be left not understanding the concepts. That was the sole reason why I changed my major to Industrial Technology. Industrial Technology is absolutely great, everything is practical and explained properly. I have learned so much since I have changed my major. Unfortunately one instructor is not meeting up to standards.
## Industrial Technology

Q27 - Comments:

Comments:

The program was not as it was presented to me. I was told hands on, but in reality, not so much. There was book work that was busy work. For example, looking up definitions of bold words. That was high school coaches' teaching style. I was hoping to get a lot of hands on activities!

Makes no sense to pay that much for a parking pass if I don't even go to the school that much or at all. Food choices were nice. Library is nicely setup.

I wish I could say I was more impressed with this school, but to me it's just a factory of worthless degrees.

The survey form is messed up. Most items in the survey are in a format where you cannot make a choice. I am very satisfied with my experience at UT Tyler and will be continuing with Graduate School.

The industrial technology professors are the best in the business. They provide encouragement, advice, and seeks to engage students. They all have great personalities and are fair with grades. I thoroughly enjoyed their classes.

I am an licensed conceal carry and I support the 2nd amendment to keep and bear arms. I know that there is a strong police presence near the campus, but with the exception of the Longview Campus, I have not seen a policaman in any building the last 3.5 years. I would feel much safer if I was able to keep my concealed weapon on me. I am 51 years old, so I'm older than the normal student, but I didn't have a single concern about all of the students I was in class with being able to carry a concealed weapon. I do however, have a concern that someone could come onto the campus and go on an unimpeded rampage as has happened at gun-free zones all over America, including many colleges. Seems normal for me to arm law abiding citizens and let them be able to exercise their 2nd amendment rights while at college.

9 - What do you consider to be the strengths of the Industrial Technology program?
10 - What do you consider to be the weaknesses of the Industrial Technology program?

[Bar chart showing weaknesses: Program curriculum content, Faculty, Facilities, Other, No major weaknesses]

11 - What suggestions would you offer towards improving the Industrial Technology program?

What suggestions would you offer towards improving the Industrial Technology program?

I had a great time earning my industrial technology degree and the teachers in the department are the best in the school.

Better equipment

I feel like there's an overall trend toward not enforcing attendance and the "no late work" policy, which probably hurts students in the long run. My guess is that this is probably a trend across all universities and degree plans these days, but it fails to prepare students for the real world when bosses don't accept excuses instead of results. I will say that it did once benefit me personally this semester when I accidentally overlooked an assignment deadline and asked for a late submission--but many of my classmates asked for (and received) extensions more often than not. I do understand that instructors have to be understanding and compassionate, but it can be frustrating for the students who turn things in on time when the same people are always getting a break.

Heavier concentration on design, robotics, and PLC

keep on good work.

Program content

Some areas need to be taught more in depth

Facilities

Longview campus need more room and equipment.

Limited classroom and lab space

Industrial technology is not a degree field that people know hardly anything about. 90% of jobs that I have applied for have no idea what industrial technology degree entails and seems kind of worthless!

Facilities and critical thinking courses

Q12 - What suggestions would you offer for improving your degree curriculum/course of study?

More in depth knowledge of industry, felt like most courses were glorified high school shop classes

More elective choices.

Upgraded facilities and lab equipment
I think the degree curriculum does not need changing. The diverse courses cover the spectrum of the market. Bringing the curriculum more online with what is recognized throughout Private Industry and governmental entities. 

make courses cover more information

More leadership courses. We need more equipment training in order to better understand industry practices.

I would add more technical/engineering courses to fully grasp the fundamentals of materials and electrical/mechanical hardware. courses/software matching majority of current job descriptions

Q13 - What suggestions would you offer towards improving the Department of Technology?
Better facilities and equipment

Larger and more labs (in progress with new technology building).

Update equipment and technology

Larger classroom and lab space. Advertise the program more. I did not know it existed until I talked with an advisor.

Explaining exactly what kind of job field you can expect to try to get a job in with this degree

Look at above answer

Add more electrical courses. Electronics manufacturing is currently not an emphasis but will be a major part of manufacturing’s future.

courses/software with more focus on particular job titles/industries

Q14 - If you are employed, please respond to the following questions. If you are NOT currently employed, please answer this question and skip the remaining questions.

Q3 - What do you like about your employee's educational preparation?
It seemed to simulate real-world experience. The graduate always reported to me about his new knowledge and skills.

Seems like he is ready to go.

Well rounded education and is ready to learn more.
Q4 - Is there anything you do NOT like about your employee's educational preparation? I can think of nothing.

No

Not really.

Q5 - Do you have any suggestions on how to improve your employee's educational background? No.

Better than most that I have had.

It would be nice if they knew all our software, however, that changes all the time.
College of Business and Technology

Intern Evaluation Form

Intern:__________________
Supervisor:__________________

Instructions: Rate intern on a scale of 1-5 (Deficient to Superior). Return electronically to Faculty Member: __________

1. **Oral Communication** (Communicates ideas clearly with proper vocabulary usage)
   Remarks:

2. **Written Communication** (Communicates ideas clearly with proper grammatical structure)
   Remarks:

3. **Quality of work** (Accuracy, neatness, timeliness)
   Remarks:

4. **Quantity of work** (Volume of accurate work not needing correction)
   Remarks:

5. **Job knowledge** (Understands job requirements and needs minimal assistance)
   Remarks:

6. **Attitude** (Positive, willing to learn, accepts direction)
   Remarks:

7. **Motivation** (Seeks additional work when assignments completed)
   Remarks:

8. **Reliability** (Dependable, gets the job done on time, acts responsibly)
   Remarks:

9. **Use of time** (Uses time wisely and does not distract others)
   Remarks:

10. **Uses good judgment** (Considers actions and possible effects, makes sound decisions)
    Remarks:

11. **Interpersonal skills** (Cooperative, helps others, listens)
    Remarks:

12. **Technological competence** (Familiar with hardware and software required for the job)
    Remarks:

13. **Professional proficiency** (Dresses appropriately for the job and conveys a professional image to customers/clients)
    Remarks:

   **Additional Comments:**
ATMAE Certified Manufacturing Specialist Exam Results

Only one student failed, however, he had not taken all the course work like the other students and was merely taken the exam for practice. It was good to see how well the students fared nationally and how all those who had taken all the course work from the program had passed the exam.
ATMAE CMS exam results for April 15, 2015.

Two passed the CMS exam and one student failed, however, that student had not taken all the course work like the other students and was merely taken the exam for practice. Moreover, that student missed passing the exam by only one point.
ATMAE CMS exam results for December 3, 2015.

Five passed the CMS exam and five students failed, however, the students that failed had not taken all the course work like the other students and were merely taking the exam for extra credit to make a better grade in a course. It is interesting to see that this documentation proves that the educational experience that is provided by the program is value added and does enhance majors with learning what is expected out of them according to the validated student learning outcomes/ competencies.
ATMAE CMS exam results for April 27, 2016.

In this exam session, 12 of the 12 students who took the CMS exam passed it. In addition, the addition of more emphasis in TECH 4323 Lean Production improved the Metrology session scores. Furthermore, the course TECH 1303 Engineering graphics became required and the students no longer did poorly on this section of the exam. Moreover, a new instructor was now teaching TECH 3310 Total Quality Management and the students did much better on this section as well. In all three cases, the students exceeded the Current Year Average and the Historical Average of the exam sessions. In fact, the students did better in almost every category versus the Current Year and Historical Averages except for three. However, they faired just a few tenths of a point below the Current Year Average.
### Category Breakdown

**Certified Manufacturing Specialist (CMS)**

**The University of Texas at Tyler**

Session 10975 / Held 05/09/2017 7:09 pm to 05/11/2017 1:30 am

Session Manager: Mark Miller (mmiller@uttyler.edu)

Data Recipient: Mark Miller (mmiller@uttyler.edu)

Student Count: 13

ATMAE CMS exam results for May 9, 2017.

All 13 students who took the ATMAE CMS exam passed the exam and the session average was higher than the Current Year and Historical Averages in all of the major categories of the exam. This was the first time the program graduates had achieved this distinction.
ATMAE CMS exam results for May 25, 2018.

I suppose if you have a perfect pass rate the previous year then the odds are against you to achieve the same level of performance. In this session, four of the seven students passed the CMS exam. Two of those students who failed only missed passing the exam by two points (98 instead of 100). The other student missed it by 16 points (86 instead of 100), however, this student has consistently had trouble taking exams. Because of these issues, the faculty were going to wait to see how well the students fared on the next exam session before any majors program or curriculum changes were made.
In this session six out of seven students passed the exam and the student who failed missed it by only six points (94 instead of 100). Furthermore, this student was a junior and the other six were graduating seniors. The only category that the students did not fair as well as the Current Year Average was in supervision. The difference was only a tenth of a point, so it was not a major concern. In addition, the department no longer teaches this course. No major changes in curriculum were deemed appropriate this year.

ATMAE CMS exam results for December 7, 2018
CURRICULUM CHANGES FROM 2013-2019

The following is a list of the official curriculum changes for the program by year. Documentation for these changes is illustrated by clicking on the web link next to the year.

1. TECH 1303 Engineering Graphics was removed from the curriculum as students were expected to transfer the course in from a two year college.
2. TECH 1301 Technology and Society was removed from the curriculum so another technical course with a hands-on lab could be added.
3. TECH 1320 Industrial Materials was removed from the curriculum as students were expected to transfer the course in from a two year college.
4. TECH 2311 Mechanical & Fluid Systems was removed from the curriculum as students were expected to transfer the course in from a two year college.
5. The degree plan was reduced from 125 hours to 120 total semester hours. All university degrees were required by the state to be reduced to 120hrs. Omitting the four courses allowed for more course work to be transferred from community colleges.

1. HRD 3333 Human Relations was removed from the degree plan to allow space for TECH 1320 Industrial Materials since most transfer students did not take this at their community college. Not offered as a WECM course. Industrial Advisory Committee thought it was important and should stay in the degree plan.
2. TECH 4320 Job Analysis and Design was removed from the degree plan so TECH 2311 Electrical and Fluid Systems could be added to the degree plan. Again, the same problem had arisen that transfer students did not have a hydraulics or pneumatics course and/or a basic electricity and electronics course. The faculty and Advisory Committee did not want students to graduate without this fundamental knowledge and skills.
3. Reduction in the Core Curriculum from 44 to 42 hours also assisted in allowing the program to bring back some basic technical course work.

1. TECH 1303 Engineering Graphics returned to the degree plan because it was noted that many of the transfer students did not have a basic drafting
course. Furthermore, if a transfer student did have a drafting course, then they could substitute it for TECH 1303.

2. TECH 2319 Programmable Logic Controllers was added to the degree plan as the Industrial Advisory Committee noted that it was fundamental knowledge for the students to have, especially as they continually automated their plants.

3. The Department of Human Resource Development and Technology officially split into two separate departments. The Department of Technology was also part of the new School of Technology. This was due to the large increases in enrollment in both departments. The most beneficial result of the split was that the Department of Technology now had their own cost centers and could purchase more equipment and supplies then in years past.

1. There were no major curriculum changes for the undergraduate program this year as departmental efforts were focused on the graduate program and improving the Longview University laboratory facilities.

2. Industrial Technology majors were required to take MANA 3305 Operations Management as part of the Business minor.

1. A new course TECH 3331 Project Management was developed to replace TECH 4301 Supervision since a lot of the course work in TECH 4301 was redundant with the required course in the Business minor of MANA 3305 Operations Management and MANA 3311 Fundamentals of Management.

2. The Business minor was reduced from 24 hrs to 21 hrs. since an Economics course was already required.

1. TECH 4173 was dropped from the degree plan and was infused into the course TECH 4372 Capstone Experience.

2. TECH 3355 Supply Chain Management became part of the Professional Core Curriculum since TECH 4173 Electronic Portfolio was dropped and integrated into TECH 4372 Capstone Experience.

3. The Business minor was reduced from 21 hrs to 18 hrs. since the Industrial Technology degree required a supply chain management course.

4. Another three hours of lower division electives are now allowed to be transferred to help recruit more students from the community colleges.
Program Goals Status Form

2013-2018 Bachelor of Science in Industrial Technology Short Range Goals

<table>
<thead>
<tr>
<th>Goal</th>
<th>Status</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>The program will maintain ATMAE accreditation</td>
<td>O</td>
<td>The Industrial Technology program was reaccredited without a single partial or non-compliance in 2012 and hopes to maintain accreditation in 2019.</td>
</tr>
<tr>
<td>The program will continue to produce graduates that can pass national certification exams</td>
<td>O</td>
<td>The seniors who have graduated from the program have consistently averaged better session grades than the national average for the ATMAE Certified Manufacturing Specialist exam. Moreover, all seniors who have taken all the technology core courses have passed the ATMAE CMS exam.</td>
</tr>
<tr>
<td>The program will have state-of-the-art laboratories</td>
<td>M</td>
<td>In July of 2018, the Department of Technology moved into a brand new 52 million dollar building that houses five laboratories for the department. The department was able to triple the size of its laboratories. In addition, the metals and nonmetallic materials processing labs are on the first floor with overhead bay door access. The labs also have the correct ventilation and there is now a welding lab available.</td>
</tr>
<tr>
<td>The program will consist of faculty who publish as required by the Soules College of Business Tenure and Promotion policy.</td>
<td>O</td>
<td>The faculty have published over the past six years and this is documented by the full professor passing a post-tenure review, two tenure-track professors earned tenure, however, one new faculty did not pass the third year review process. However, that was mainly due to the teaching component being totally unacceptable.</td>
</tr>
<tr>
<td>The program will have at least one research proposal submitted over a three year period.</td>
<td>O</td>
<td>Dr. Fazarro has co-PI for several research proposals dealing with nanotechnology safety. Furthermore, Dr. Donaldson was the co-PI for an internal college grant.</td>
</tr>
<tr>
<td>The program will consist of faculty who present at the national level annually.</td>
<td>O</td>
<td>The program’s faculty have consistently presented at the ATMAE national conference for the last six years.</td>
</tr>
<tr>
<td>The program will consist of faculty who are known for innovative endeavors.</td>
<td>M</td>
<td>Dr. Fazarro is national reknown for his work with nanotechnology. He even started the Nanotechnology Focus Group at</td>
</tr>
<tr>
<td>The program will maintain and expand its Advisory Board to provide input to the program so it can produce graduates that are adequately prepared for the workforce in the surrounding areas and beyond.</td>
<td>O</td>
<td>Every year the Department of Technology cycles an Advisory Committee member off and replaces them with another. The intent is to keep it fresh and gain insights from other companies in the area that hire the program’s graduates. Advisory Committee members’ names are listed in the each years meeting minutes.</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>The program will provide internship opportunities for majors in order to better prepare them for real life careers.</td>
<td>O</td>
<td>Each semester students participate in internships and their papers, journal, evaluations are kept in the main office storage room.</td>
</tr>
<tr>
<td>The program will provide opportunities for students to participate in volunteer projects to help the community of East Texas and beyond.</td>
<td>O</td>
<td>Students who join the department’s student organizations are provided volunteer opportunities every semester. In fact, this semester the ATMAE Student Chapter assisted with the planting of trees on Arbor day.</td>
</tr>
<tr>
<td>The program will create and/or offer a variety of student organizations and honor societies for students to participate in.</td>
<td>O</td>
<td>The program currently has an active ATMAE, SME, and EPT chapter that hold events throughout the year. The ATMAE chapter students attend the national conference as well as participate in volunteer projects. SME chapter members attend the Houstex event and coordinate plant tours throughout the year. The EPT members assist with the annual initiation ceremony.</td>
</tr>
<tr>
<td>The program will provide opportunities for students to partake in external field trips to various local, regional, and national events related to the discipline.</td>
<td>O</td>
<td>SME chapter members attend the Houstex event and coordinate plant tours throughout the year. Furthermore, ATMAE chapter members who attended the national conference are able to attend plant tours. Many went on the GM plant tour in Kansas City.</td>
</tr>
<tr>
<td>The faculty will provide training sessions to companies throughout the year that will generate revenue for the college and the university.</td>
<td>O</td>
<td>Faculty have hosted events through the Texas Productivity Center on learning how to use six sigma quality techniques, how to make value stream maps, and become a lean champion and/or green belt certified.</td>
</tr>
<tr>
<td>Faculty of the program will be encouraged to attend at least one sponsored event by the UT Tyler Center for Excellence in Teaching.</td>
<td>N</td>
<td>Only one faculty member has attended such an event. More encouragement will be provided to make sure every faculty member attends events annually.</td>
</tr>
<tr>
<td>Faculty of the program will assist the</td>
<td>O</td>
<td>All the faculty of the program assisted with</td>
</tr>
<tr>
<td>university held programs to promote career success annually.</td>
<td>the Career Success Conference in September of 2018.</td>
<td></td>
</tr>
<tr>
<td>-------------------------------------------------------------</td>
<td>------------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td>Students of the program will participate in university held programs to promote career success.</td>
<td>O Over 80% of the program registered and attended the Career Success Conference in September.</td>
<td></td>
</tr>
<tr>
<td>Tenure-track faculty will be encouraged to submit research proposals annually for college sponsored research grants.</td>
<td>O The sole tenure-track faculty member submitted and was awarded a college sponsored research grant.</td>
<td></td>
</tr>
<tr>
<td>Faculty of the program will assist with the setup of equipment at the Tyler Innovation Pipeline (TIP) joint venture.</td>
<td>O Dr. Miller spent a good portion of his summer setting up most of the equipment at the TIP.</td>
<td></td>
</tr>
<tr>
<td>Students of the program will assist patrons of the TIP in making innovative projects…</td>
<td>O The Soules College of Business has provided funds for the program’s students to work at the TIP and assist patrons.</td>
<td></td>
</tr>
<tr>
<td>Faculty of the program will develop curriculum for summer camps that will recruit new students to the Industrial Technology program.</td>
<td>O Drs. Ali and Miller developed a Robotics summer camp in 2018.</td>
<td></td>
</tr>
<tr>
<td>Faculty of the program will offer summer camps either annually or biennially.</td>
<td>O A summer camp taught by Dr. Ali was offered at the Longview University Center in June 2018.</td>
<td></td>
</tr>

<tr>
<td>The program will be known to have the same reputation for quality as the best programs in the country.</td>
<td>M</td>
<td>The program has retained ATMAE reaccreditation and now has brand new state-of-the-art facilities.</td>
</tr>
<tr>
<td>The program will consist of faculty with excellent scholarly and research records.</td>
<td>M</td>
<td>All the faculty have presented at national conferences over the past six years and have met the minimum publication standards for the college.</td>
</tr>
<tr>
<td>The program will provide opportunities for students and faculty to build long term relations with the community of East Texas and beyond.</td>
<td>M</td>
<td>Faculty have taught workshops for local industries and students have interned in a wide variety of industries throughout the last six years.</td>
</tr>
<tr>
<td>The program will provide opportunities for students to build long term relations, and camaraderie with peers and faculty to enhance their college experience.</td>
<td>O</td>
<td>Faculty have an open door policy and each of them sponsor a student organization. Dr. Miller – SME, Dr. Lawrence – ATMAE, Dr. Fazarro – EPT, Dr. Donaldson – PMI, Dr. Ali handles all the organizations in Longview.</td>
</tr>
<tr>
<td>Encourage and optimize research collaborations between faculty and community business leaders that will result in development of profit centers.</td>
<td>O</td>
<td>Dr. Miller currently runs the Texas Productivity Center that provides workshops and training for local industries.</td>
</tr>
<tr>
<td>The faculty of the program will improve their teaching by some means of training.</td>
<td>O</td>
<td>Faculty are encourage and supported to go to training events. Dr. Miller attended FANUC robotics vision training this summer in Union City, CA.</td>
</tr>
<tr>
<td>Faculty of the program will engage and encourage students to network with alumni from UT Tyler</td>
<td>O</td>
<td>Students are provided opportunities for internships and conducting mock interviews with alumni.</td>
</tr>
<tr>
<td>Tenure-track faculty will be encouraged to conduct research as required in the College’s Guidelines for Tenure and Promotion.</td>
<td>O</td>
<td>All faculty have met the publishing standards for the Soules College of Business.</td>
</tr>
<tr>
<td>Faculty and students of the program will promote academic partnerships throughout the region.</td>
<td>O</td>
<td>Students of the program are currently working at the TIP. Drs. Miller and Ali are working with school districts in the Longview area to encourage students who graduate from the Advanced Manufacturing Academy to continue to pursue their educational goals.</td>
</tr>
<tr>
<td>The Department of Technology will provide events for East Texas youth to promote the Industrial Technology program.</td>
<td>O</td>
<td>A summer camp was provided and tours to high schools students are now available. New high school technology events will be offered once the fourth floor is finished in the new building.</td>

Professor & Chair of the Department of Technology
Interim Chair of the Department of Human Resource Development

EDUCATION

Doctor of Philosophy Texas A&M University, College Station, Texas
(August, 1993). Major: Industrial Education,
Dissertation title: Strategies for Developing an Exemplary Program in Manufacturing Engineering Technology.

Master of Arts
Ball State University, Muncie, Indiana (August, 1983). Major: Industrial Education.

Bachelor of Science
State University of New York, College at Buffalo (May, 1982). Major: Industrial Arts Education.

PROFESSIONAL EMPLOYMENT HISTORY

2017 – Present Interim Department Head of Human Resource Development

2014 – Present Tenured Professor and Department Head of the Department of Technology at The University of Texas at Tyler.

2005 – 2014 Tenured Professor and Coordinator of Industrial Technology and Industrial Management at The University of Texas at Tyler.
PROFESSIONAL EMPLOYMENT HISTORY continued

2004 – 2005  Professor and Chair of the Industrial Technology Department at Texas A&M University-Kingsville.

1999 – 2005  Associate Professor and Chair of the Industrial Technology Department at Texas A&M University-Kingsville.

1993 - 1999  Assistant Professor in the Industrial Technology Department at Texas A&M University-Kingsville. Tenured September 1999.

1990 - 1993  Full-time Lecturer in the Manufacturing Engineering Technology program at Texas A&M University.

1989 - 1990  Graduate teaching assistant for the Educational Human Resource Development Department at Texas A&M University.

1982 - 1983  Teaching Assistant and Graduate Fellow for the Department of Industry and Technology at Ball State University.

LIST OF COURSES TAUGHT

The University of Texas at Tyler – 2005-Present
TECH 1301 Technology & Society,
TECH 1320 Industrial Materials,
TECH 3311 Manufacturing Processes,
TECH 3333 Polymer Processing,
TECH 4302 Multiple Technology Systems,
TECH 4317 Computer Integrated Manufacturing,
TECH 4323 Lean Production,
TECH 4343 Advanced Manufacturing Processes,
TECH 4350 Topics in Industrial Studies: Robotics,
TECH 4351 Topics in Industrial Studies: Programmable Logic Controllers,
TECH 4372 Technology Capstone,
TECH 5309 Industrial Processes and Materials,
TECH 5335 Lean Manufacturing,
TECH 5317 Computer Integrated Manufacturing,
TECH 5366 Value Stream Management
TECH 5329 Trends in Industry,
TECH 4370 & 4371 Internship in Technology,
and TECH 5370 & 5371 Internship in Technology.
Texas A&M University-Kingsville  1993-2005
IMEN 5301 Industrial Management,
IMEN 5335 Industrial Safety and Risk Management,
ITEN 1311 Technical CAD,
ITEN 2321 Architectural CAD,
ITEN 4303 Advanced Computer Graphics,
ITEN 3331 Construction Technology,
ITEN 3308 Industrial Plastics,
ITEN 4336 Industrial Seminar,
ITEN 3300 Manufacturing Technology,
ITEN 3399 Industrial Internship,
ITEN 4303 Advanced Manufacturing Processes,
ITEN 2330 OSHA for General Industry,
ITEN 4353 Construction Management,
and ITEN 4335 Senior Projects.

Texas A&M University  1989-1993
ENTC 181 Manufacturing and Assembly Processes I,
ENTC 403 Fluid Power Technology,
and INED 302 Technology, Resources, and Society.

Production Systems,
Engineering Graphics,
Architectural Graphics,
Manufacturing Technology,
and Construction Technology.

INTELLECTUAL CONTRIBUTIONS

TEXTBOOKS:

TEXTBOOKS continued:

TEXTBOOKS continued:

REFEREED JOURNAL ARTICLES:

Miller, M. R. & Donaldson, E. S. (Fall/Winter 2016). Do certifications make a difference with the recruitment of graduate students for Industrial Management Programs? Technology Interface International Journal.

REFEREED PROCEEDINGS & PRESENTATIONS:

Miller, M. R. and Donaldson, E. S. (2016). Do certifications make a difference with the recruitment of graduate students for technology-related programs? IAJC-ISAM Joint International Conference. Orlando, FL.

REFEREEED PROCEEDINGS & PRESENTATIONS continued:

REFEREEED PROCEEDINGS & PRESENTATIONS continued:

JOURNAL & CONFERENCE PAPER REVIEW ACTIVITIES:

2008- Present Reviewer for ATMAE Manufacturing Division abstracts & papers.

2011- Present Reviewer for ATMAE Nanotechnology Division abstracts & papers.

2009- 2011 Associate Editor for The Journal of Technology Studies.
RESEARCH AND CREATIVE ACTIVITIES:

Co-Principal Investigator.

*Society of Manufacturing Engineers Education Foundation* (June 1995): Awarded $475,600 worth of computer software for use in manufacturing related coursework.

Higher Education Assistance Funds, College of Engineering (1998-2002): Awarded $142,527 over a four year period for equipment for lecture and laboratory courses.

*Faculty Development Fund* (December 1993): Awarded $374 for assistance in travel to attend faculty development training in Geometric Dimensioning and Tolerancing in Chicago, Illinois.

PROFESSIONAL GROWTH ACTIVITIES:

**Member**
American Society for Engineering Education (ASEE)

Association for Career and Technical Education (ACTE)

Association of Technology, Management, and Applied Engineering (ATMAE)

Epsilon Pi Tau (EPT) Honor society for professions in technology

Institute of Electrical and Electronics Engineers (IEEE) Computer and Nanotechnology

Society of Manufacturing Engineers (SME)
Leadership Roles in Professional Societies

Chair, Association of Technology, Management, and Applied Engineering Certification Board. Terms: 2008-Present.

Member of the National Association of Industrial Technology Certification Board. Terms: 2000-2007.

Member of the Society of Manufacturing Engineers Student Relations Subcommittee. Term: 2004-2008.

Society of Manufacturing Engineers - 2008 – 2016, Chair for Chapter 126 in East Texas

Society of Manufacturing Engineers - 2003, Chair for Chapter 121 in San Antonio, TX

Society of Manufacturing Engineers - 1999, Chairman for Chapter 121 in San Antonio, Texas

Society of Manufacturing Engineers - 1998, Chair-elect for Chapter 121 in San Antonio, Texas

Society of Manufacturing Engineers faculty advisor for The University of Texas at Tyler student chapter S358 from 2006 - present (increased membership from 0 to 26)

Society of Manufacturing Engineers faculty advisor for TAMUK student chapter S264 from 1994 - 2005 (increased membership from 29 to 85)

Professional Society Meetings

Attended and presented at all the ATMAE & NAIT annual conferences from 1993-present.

Attended the Society of Manufacturing Engineers Annual Convention in Dallas, TX on May 29-June 1, 2002.

Attended the 1997 ASEE Gulf-Southwest Annual Conference in Houston, TX on March 24-25, 1997.

Attended the American Vocational Association Convention in Las Vegas, Nevada on December 10-14, 1997.
Professional Society Meetings continued:

Attended the Society of Manufacturing Engineers Annual Convention in Cleveland, OH on May 29-31, 1998.

Attended the Society of Manufacturing Engineers Regional Conference in Dallas, TX on November 12-14, 1998.

Attended all of the Society of Manufacturing Engineers San Antonio Chapter 121 meetings from November of 1993 – June 2005.

SERVICE ACTIVITIES

Committee Work

The University of Texas at Tyler (2005-Present)

Chair of the University Undergraduate Council, 2014-present
Member of the CBT Graduate Curriculum and Standards Committee, 2016-2018
Chair if the CBT Tenure and Promotion Committee, 2015
Member of the University Undergraduate Council, 2013-2014
Member of the University Undergraduate Council Subcommittee: Undergrad. Curriculum
Chair of the CBT Undergraduate Curriculum Committee, 2013-2016
Chair of the CBT Faculty Governance Committee 2013-2016
Treasurer for the Faculty Senate, 2012-2015.
Member of the Department’s Tenure and Promotion Committee, 2009-2014.
Member of the Department’s Curriculum Committee 2005-Present.
Chair of the Industrial Technology Re-accreditation Committee, 2010- present
Member of the CBT Promotion and Tenure Committee, 2011-2013.
Chair of the University Faculty Affairs Committee, 2010-2011.
The University of Texas at Tyler (2005-Present) continued:

Chair of the School of HRD & Technology SACS Committee, 2007-2010.
Chair-Elect of the University Faculty Affairs Committee, 2008-2011.
Member of the University Graduate Council, 2009-2012.
Member of the College of Business & Technology Leadership Team, 2009-2010.
Member of the University Graduate Council from 2009-2012.
Chair of the University Information Technology Committee from 2007-2008.
Member of the University Information Technology Committee from 2005-2007.
Member of the Provost Search Committee from 2007-2008.

Texas A&M University-Kingsville (1993-2005)

Member of the Dean of the College of Engineering Search Committee from 2001-2002.
Member of the College of Engineering Recruitment Committee from 2004-2005.
Member of the university’s SACS Technology committee from August 2002-2005.
Chair of the department’s curriculum committee 1999-present.
Chair of the university 1997-2000 Calendar Committee.
Chair of the 1997-1998 search committee for a full-time departmental faculty member.
Member of the College of Engineering Curriculum Committee from 1995 – 2005.
Member of the Dean of the College of Business Search Committee from 1998-1999.
Member of the BAAS Advisory Committee from 1995-2005.
Member of the Council of Chairs Committee from 1999-2005.
Member of the Accessibility Compliance Committee from 1999-2005.
Member of the Engineering Ethics Committee in 1994.
**Student Organizations**

Co-Trustee for Epsilon Pi Tau – Delta Gamma Chapter (Honor society for technology professionals).

Faculty advisor for the Association of Technology, Management, and Applied Engineering student chapter at The University of Texas at Tyler, 2005-2011.

Installed the Epsilon Pi Tau, Delta Gamma chapter at The University of Texas at Tyler in March, 2005.

**Awards and Certifications**

2018 Recipient of the Distinguish Service Member award from Epsilon Pi Tau.

2018 FANUC robotics certification in vision systems

2017 Charles W. Keith Award, is administered by the Chair of the Board. It should be noted that this award is not a yearly award, but will be given only when an individual is judged by the current Chair of the Board and two past chairs to have displayed exemplary accomplishments toward the significant development of ATMAE over an appreciable period of time.

2014 Phi Kappa Phi Member, All-discipline Honor Society, The University of Texas at Tyler Chapter

2012 Recipient of the ATMAE Faculty Excellence Award

2012 Earned Lean Six Sigma Black Belt Certification

2012 Recipient of the Faculty Senate Service Award
Awards and Certifications continued:

2012 Recipient of the ATMAE Outstanding Faculty Excellence Award
2012 Recipient of the College of Business & Technology Faculty Service Award
2012 Authorized Certified Trainer for FANUC robots (CERT)
2011 Earned Certified Senior in Engineering Graphics status
2010 Earned Certified Senior Technical Professional status.
2009 Earned Certified Manufacturing Specialist status.
2009 Earned Certified Senior Technology Manager status
2007 Earned Certified Senior Industrial Technologist status.
2006 Recipient of the National Association of Industrial Technology Outstanding Professor of Technology Award.
2005 Awarded the prestigious Laureate Citation from the international honor society for professions in technology, Epsilon Pi Tau.
2001-2004 OSHA Authorized Outreach Trainer
1995 GD&T Level 1 Training by SME
1988 Texas permanent teaching certificate
1982 New York state provisional teaching certificate

OTHER PROFESSIONAL ACTIVITIES NOT COVERED PREVIOUSLY

Prepared the self-study report for re-accreditation of the Industrial Technology program at The University of Texas at Tyler by the Association of Technology, Management, and Applied Engineering in the all new 2019 outcomes format.

Prepared the self-study report for initial accreditation of the Industrial Management graduate program at The University of Texas at Tyler by the Association of Technology, Management, and Applied Engineering in the all new 2019 outcomes format.
OTHER PROFESSIONAL ACTIVITIES NOT COVERED PREVIOUSLY *continued*:

Purchased and setup new equipment for the new College of Business building as well as packed and setup existing equipment from the HPR building. Spent countless hours drawing up the plans and meeting with architects about the new laboratory requirements.

Purchased and setup new equipment in order to create a brand new manufacturing laboratory at the Longview University Center.

Gave numerous presentations to local organizations and industries regarding the start of the new Industrial Technology program at the Longview University Center.

Developed the Supply Chain Management certificate program for the graduate program in Industrial Management in 2014.

Authored the ATMAE Certified Lean Six Sigma online Study Guide in 2014.

Coordinated and assisted with the development of the ATMAE Lean Six Sigma certification exam from 2009-2014.

Developed the Lean Six Sigma Black Belt certificate program for the graduate program in Industrial Management in 2013.

Annually revise the curricula for the Industrial Technology and Industrial Management programs in order to meet ATMAE accreditation standards.

Prepared the self-study report for re-accreditation of the Industrial Technology program at The University of Texas at Tyler by the Association of Technology, Management, and Applied Engineering (reaccredited with no partial or non-compliances until 2018).

Assisted with the development of the new ATMAE Certified in Engineering Graphics exam from 2009-2011.

Coordinated, developed, and prepared the new online ATMAE Technical Professional Certification exam from 2007-2010.

Authored the ATMAE Certified Technical Professional online Study Guide in 2010.

Coordinated, developed, and prepared the new online ATMAE Manufacturing Specialist Certification exam from 2005-2009.

Authored the ATMAE Certified Manufacturing Specialist online Study Guide in 2008.
OTHER PROFESSIONAL ACTIVITIES NOT COVERED PREVIOUSLY continued:

Authored the ATMAE Certified Technology Manager online Study Guide in 2006.

Ordered and setup new equipment, tables, chairs, cabinets, tool cribs, etc. for the manufacturing laboratory in rooms HPR 256 and 261 in 2005-2012.

Assisted and developed assessment instruments and other documents essential for full (6 year) ATMAE (NAIT) accreditation status for the HRD & Technology Department at UT Tyler (2005).

Developed and prepared the proposal for a graduate program in Industrial Management for the Industrial Technology Department at Texas A&M University-Kingsville which was approved by The Texas Higher Education Coordinating Board on February 19, 2004.

Developed and prepared the Industrial Technology Department at Texas A&M University-Kingsville’s Self Study Report for Accreditation by the National Association of Industrial Technology (awarded full accreditation of 6 years from 2003-2009).
Dominick E. Fazarro, Ph.D., CSTM
Department of Human Resources Development and Technology
The University of Texas at Tyler
Tyler, TX 75799

EDUCATIONAL HISTORY

Ph.D., Industrial Education and Technology, 2001
Iowa State University
Ames, Iowa

M.S., Industrial Management, 1992
Central Missouri State University
Warrensburg, Missouri

B.S., Manufacturing Design Technology, 1989
Norfolk State University
Norfolk, Virginia

RESEARCH AGENDA

My research agenda focuses on various areas of innovative technologies which requires unique
instruction to enhance learning outcomes

- Learning Styles
- Nanotechnology Safety and Education
- Nanotechnology Workforce Education and Development
- Workforce Development
- Evaluation and Assessment

ACADEMIC EXPERIENCE

The University of Texas at Tyler
Dept. of Human Resources Development and Technology
August 2010 - present
- Associate Professor

Sam Houston State University
Department of Agricultural and Industrial Sciences
Industrial Technology Program
July 2007 - July 2010
- Associate Professor

University of Arkansas at Pine Bluff
Industrial Technology Program
August 2002 - May 2007
- Associate Professor (promoted in 2007)
- Assistant Professor

Longview Community College
August 1997 - May 1998
Applied Sciences Department
- Adjunct Drafting Instructor
Iowa State University  
Student Affairs  
George Washington Carver Academy  
- Assistant Coordinator – Post-Doctoral

TEACHING & CURRICULUM DEVELOPMENT EXPERIENCE

My teaching focuses on preparing graduates with the necessary skills sets to cope with the challenges of a knowledge-based economy. My course and curriculum development stresses innovation and preparedness for the 21st century workplace.

Programs Developed
Industrial Safety Management, Sam Houston State University, Approved by the Texas Higher Education Coordinating Board, Spring 2009

Courses Developed
- Advanced Statistics in Research, (The University of Texas at Tyler), Ph.D. course
- Principles of Risk Management of Handling Nano Scaled Materials, (The University of Texas at Tyler), Fall 2010
- Innovations in Nanotechnology, (The University of Texas at Tyler), Fall 2010
- Product Design and Development, (Sam Houston State University), Spring 2009
- Leadership Energy and Environmental Development (LEED), (Sam Houston State University), Spring 2009
- Engineering Materials Technology, (Sam Houston State University), Spring 2008
- Advance Design, (The University of Arkansas at Pine Bluff), Fall 2003

Undergraduate Teaching
- Behavioral Safety Concepts  
- Risk Management for Safety & Health  
- Facility Planning  
- Ergonomics  
- Topics in Industrial Studies-Nanotechnology  
- Behavioral Safety Concepts  
- Risk Management for Safety & Health  
- Introduction to Computer Aided-Drafting  
- Engineering Graphics  
- Advanced Design  
- Construction Drafting  
- Civil Drafting  
- Material Handling and Plant Layout  
- Engineering Materials Technology  
- Product Design and Development  
- Engineering Graphics  
- Manufacturing Process & Assembly  
- Advanced Design  
- Manufacturing Process & Assembly

Graduate Teaching
- Industrial Maintenance Management  
- Advanced Logistics  
- Trends in Industrial Studies (Nanotechnology)  
- Material Handling and Plant Layout  
- Application of Statistical and Research Education  
- Industrial Maintenance Management
PUBLICATIONS

Peer-Reviewed Journal Publications

**Peer-Reviewed Proceedings**

**Book Chapters**

**Practitioner Publications**

**Under Review Peer-Reviewed Journal Publications**

Fazarro, D., Newberry, D., & Trybula, W. Introducing a nanotechnology curriculum and considerations for bridging academic/industry relationships for applied technology-oriented programs: The new challenge for ATMAE *Journal of Industrial Technology*

Fazarro, D., McWhorter, R., & Felder, C. Leveraging green computing for increased viability and sustainability. *Journal of Technology Studies*

**Work in Progress**

Developing the U.S. nanotechnology workforce: Challenges for workforce agencies (Targeted for Workforce Education Forum)

**PRESENTATIONS**

The presentations listed are divided by my major research areas.

**Peer-Reviewed Presentations (Nanotechnology Safety and Education)**

**Peer-Reviewed Presentations (Workforce Development)**

**Peer-Reviewed (Assessment and Evaluation)**

**Peer-Reviewed (Learning Styles)**

**Invited Presentations in Various Research Areas**

**Member of Panel Discussions**

A Parent and Community Empowerment Summit: Our Children-Our Responsibility “No Child Left Behind”:

**EXTERNAL DOCTORAL CONSULTANT ACTIVITIES**

**External Methodological Consultant**

- Guided eight University of Arkansas-Little Rock doctoral students (Education Leadership Ph.D. program) (2004-07)
- Explained various research methods and statistical analysis that are suitable for research topics at various universities (2004-10)
- Assisted students in preparing PowerPoint defense presentations at various universities (2004-2010)
- Facilitated a dissertation boot camp-Nova University, Palm Beach, FL. (July 2004)

**Doctoral/Masters’ Thesis Committees**
Doctoral
- Doctoral Committee Member-University of Arkansas Medical School (Marion Evans), Graduated Spring 2010
- Doctoral Committee Member/Methodologist-Sam Houston State University (Edna Kingsley), Graduated Summer 2010
- Doctoral Committee Member/Methodologist-Walden University (Kenya Avent), 2010-Present
- Doctoral Committee Member-University of Central Florida (Wanda Holmes), 2009-Present

Masters
- Masters Committee Chair-Sam Houston State University (Mariana Freties), Graduated Spring 2010

INDUSTRY AND UNIVERSITY ACCREDIDATION EXPERIENCE
- Data Manager-EDS/GM Fairfax Plant-Kansas City, Kansas ,(1996-1997)
- Inventory Control/Logistics-U.S. Army,(1993-2001)
- National Association of Industrial Technology (NAIT) ACCREDIATION University of Arkansas-Pine Bluff, (2006-2007)
- Data Manager & Assessment Coordinator, Standard Two Assessment Team-National Accreditation for Teacher Education (NCATE University of Arkansas-Pine Bluff, (November 2004-May 2005)
- Assistant Researcher (Research Internship)-Kauffman Foundation, Kansas City, MO, (June-August 1995)
- Evaluation Committee Chairperson –university assessment NCA/HLC(UAPB), (2005-2006)

CONSULTING- ASSESSMENT & EVALUATION
- Evaluated the effectiveness of the John Deere Team Scholars Program, (Feb-May 1999)
- Consulted for Edu-Care International (Supplemental Education Service Provider), (July 2004-March 2005)
- Designed a evaluation model for the Teacher Advisement Grant-Savannah School District, (2005)
- Conducted data analyses and developed data bases for the Kiwanis Pheifer Camp, (2004-2005)
- Generated survey data for Arkansas Baptist College, (October-December, 2006)
- Coordinated the evaluation of The Online Journal for Workforce Education and Development (Southern Illinois University), (2006)
- Conducted needs assessment at the Alexandria Center’s (Department of Youth Services-AR) Education Program, (2007)
• Data analysis and created reports for Pulaski Special County School District’s Multiage Program, (2007-Present)
• External Evaluator-NSF-STEM/ HBCU-UP Program/Florida A&M University, (2009-Present)

GRANTS

Funded Applications

• 2002- Co-wrote $40,000 Title III grant for computer upgrade for AutoCad and student labs for the Industrial Technology Program
• 2003-04UAPB Incentives Grant (Learning Style Research) $1,200
• 2006- STEM Seed Grant-Investigation of the Learning Preferences of Biology and Chemistry students $600
• 2010- Susan Hardwood Grant Training Grant Program (nano-safety), total: $236,000

Proposals

• 1999- Assisted in writing a proposal for renewing the Alcoa Grant for $50,000 for recruiting efforts
• 2000- Assisted in writing the Iowa State University Horizons Advanced Computer and Instructional Lab Grant for upgrading hardware and software for the Industrial Education & Technology Graduate Computer Lab $25,000
• 2004 U.S. Department of Education-Student Learning and Cognition $471,000
• 2007- Susan Harwood Training Grant Program, $235,473
• 2008- Enhancement Grant for Research (SHSU) $ 18,000
• 2008- Nanotechnology Undergraduate Education (NUE) in Engineering: NUE Nanotechnology Undergraduate Curriculum Addressing Environmental Issues, NSF, $500,000
• 2009- Advance Technological Education (ATE) in Engineering: Multi-State Collaboration for Implementing Nanotechnology Safety Education, NSF, $161,000
• 2010- Nanotechnology Undergraduate Education (NUE) in Engineering: NUE Nanotechnology Undergraduate Curriculum Addressing Environmental Issues, NSF, $200,000
• 2010- Technical Approach and Program Design: Project for Nanosafety Education and Training- Susan Hardwood Grant Training Grant Program, total: $248,000
• 2011- Nanotechnology Undergraduate Education (NUE) in Engineering: NUE Nanotechnology Undergraduate Curriculum Addressing Environmental Issues, NSF, $200,000
• 2011- Susan Harwood Training Grant: Virtual Reality Safety and Emergency Preparedness Training, $195,343

PROFESSIONAL AFFILIATIONS

Association of Technology, Management, Applied Engineering (ATMAE)
Epsilon Pi Tau Honor Society (EPT)
IEEE: Advancing Technology for Humanity
National Industry Advisory Council (NIAC)
The Association of sTEm Teacher Education (ASTE)
Association for Career and Technical Education (ACTE)
Association of Career and Technical Education Research (ACTER)
National Association of Workforce Development Professionals (NAWDP)

SERVICE

National
Founder-Nanotechnology Focus Group (ATMAE) (2011)
President Industry Division (ATMAE) (2009-2010)
Nomination Chair (ATMAE) (2009-2010)
Vice Chair-Executive Board (ATMAE) (2009-2010)
Chaired-Member of the National Visiting Committee-National Science Foundation Grant (Omaha, NB) (March 2008)
President Elect-Industry Division (ATMAE) (2007-2009)
Association for Career and Technical Education (ACTE)-Engineering and Technology Education Division (2007-2010) Post-Secondary Representative
Member of the National Visiting Committee-National Science Foundation Grant (Omaha, NB) (2006-2008)
Chairperson of Awards Committee- Engineering and Technology Education Division (ACTE) (2004-2007)
Representative -ACTE Public Information Standing Committee (2004-2006)

State
Texas Israel CoC Nanotech Committee (2011)
Advisory Board-Centers of NANO-SAFETY-Texas State University (2008-Present)
Co-founded the Texas State University System Nanotechnology Task Force (2008-10)

University
Faculty Recognition Subcommittee-UT-Tyler (2011)
COBT Faculty Awards Development Team (2010-Present)
Undergraduate Education Committee-College of Business and Technology (UT-Tyler) (2010-Present)
Trustee-Epsilon Pi Tau (Delta Gamma Chapter) UT-Tyler (2010-Present)
Presenter -2010 University Development Conference UT Touch Conference (UT-Tyler)
Search Committee Chair -Industrial Technology Program (SHSU) (2009)
ATMAE Student Chapter Advisor (SHSU) (2007-2009)
Curriculum Committee (SHSU) (2007-2009)
NCATE Standard 2 (Assessment)-Committee (UAPB) (2006)
NSF/HBUC-UP STEM Program-Data Manager (UAPB) (2005-2007)
2004 Keynote speaker (Assessment Conference at UAPB)
Ronald McNair Faculty Mentor (UAPB) (2003-2006)

Editorial Appointments
Column Editor-IEEE Nanotechnology Magazine (2011)
Reviewer-Workforce Education Forum (2011)
Editorial Board-Journal of Workforce Development (2010-Present)
Editorial Board - Journal of STEm Teacher Education (JsTEm) (2008-Present)
Editor-Special Issue “Evaluating Workforce Education” - Online Journal for Workforce Education and Development Vol 3 Number 4 (2007)
Editorial Board - Online Journal for Workforce Education and Development (Southern Illinois University) (2006-Present)
Reviewer - Journal of Industrial Technology (JIT) (2003-Present)

Conference Assignments
IEEE Nanotechnology Council Paper Reviewer (2011)
ATMAE Paper Reviewer (2005-Present)
ACTER Paper Reviewer (2010-Present)
ACTE Paper Reviewer (2006-Present)
International Journal of Engineering Research and Innovation (IJERI) (2009-Present)
Co-Session Chair - Nanotechnology Education Division of IEEE (2011)

HONORS & AWARDS
2010 Sar Levitan Award Recipient
2010 ATAME Academic Excellence Award
The 2009 Outstanding Service Award - Engineering & Technology Education Division/Association for Career and Technical Education (ACTE)
2009 Faculty/Staff Recognition (SHSU)
2008 Faculty/Staff Recognition (SHSU)
2007 Epsilon Pi Tau Laureate Citation
2007 Who’s Who Among American Teachers
The 2007 Distinguished Service Award (ACTE)
The 2006 NAITTE-G. Harold Silvius Outstanding Young Teacher Educator Award
The 2005 Outstanding Service on the Public Information Committee (ACTE)
The 2004 Service Award - Technology Education Division/Association for Career and Technical Education (ACTE)
The 2003-04 Research Article of the Year - Journal of Industrial Teachers Education (JITE)

CERTIFICATIONS
ATMAE Certified Senior Technology Manager
OSHA 511 General Industry
OHSAM 30 Hour General Industry
OSHA Authorized Outreach Trainer

PROFESSIONAL DEVELOPMENT
OSHA 30 Hour General Industry-Workforce Development Risk Management Institute, Kilgore, TX.
Certificate-Penn State Center for Nanotechnology Education and Utilization (September 2014)
Nanotechnology Course Resources I: Safety, Processing & Materials Applications (Penn State University-NACK Center, September 14-18, 2014)
Webinar-Ways of Introducing Nanotechnology into Your Program: (Penn State University-NACK Center, January 27, 2012)
Nanotechnology Course Resources II: Patterning Characterization & Applications (Penn State University-NACK Center, October 3-6, 2011)
Preliminary application for patent-nano carbon tubes disposal unit
EDUCATION

**Mississippi State University – Starkville, MS**
Ph.D. in Instructional Systems and Workforce Development  
May 2010

*Dissertation title:*
An Investigation of Alumni Perceptions of the Industrial Technology Undergraduate Program At Mississippi State University and Its Transferability to Industry

*Specializations:*
- Educational Technology
- Instructional Technology
- Educational Research
- Industrial Technology

*Research Agenda:*
- Examination of Industrial Technology undergraduate programs
- Pedagogy and Industrial Technology
- Improving the curriculum of Industrial Technology
- Examination of industry and its impact on Industrial Technology students

**Mississippi State University – Starkville, MS**
M.S. in Instructional Technology  
May 2004

*Concentrations:*
- Educational Technology
- Instructional Technology
- Curriculum Development
- Pedagogy/Andragogy of Technology Integration

**Mississippi State University – Starkville, MS**
B.S. in Industrial Technology  
May 2003
PROFESSIONAL EXPERIENCE

Fall 2016-Present  Associate Professor  The University of Texas at Tyler; Tyler, TX
Fall 2010-Fall 2016  Assistant Professor  The University of Texas at Tyler; Tyler, TX
Fall 2008-Fall 2009  Adjunct Instructor  Jackson State University; Jackson, Mississippi
Fall 2003-Spring 2009  Graduate Teaching Assistant  Mississippi State University Starkville, Mississippi

GRANTS

Grant Proposal Funded:
Co-PI Follow-up study of students in the department of Instructional Systems, Leadership and Workforce Development between 2001-2005 funded for $6,656. (Mississippi State University)

COURSES INSTRUCTED

The University of Texas at Tyler

Graduate Courses

Spring 2017-present TECH 5303 Research Techniques in Technology (online instruction): a graduate course designed to engage students with various backgrounds in learning and practicing basic steps in conducting and reporting original research.

Summer 2015-present TECH 5329 Trends in Industry (hybrid instruction): a graduate course that explores Six Sigma concepts and utilizes the statistical software, Minitab

Spring 2015-present TECH 5308 Strategic Sourcing (traditional/ t.v instruction/ Online): a graduate course that explores the concepts of Strategic Sourcing

SU 2013-present TECH 5390 Adv. LSSBB Techniques (online instruction/hybrid): a graduate course that involves discussions, analysis and application of the DMAIC Six Sigma process as well as Lean concepts.
Spring 2012-Spr. ‘15  *TECH 5331 Project Management (online instruction/ traditional)*: a graduate course that provides students with the fundamental concepts related to the field of project management. Gantt and PERT concepts will be implemented and studied.

Fall 2011-present  *TECH 5310 Six Sigma Quality (online instruction)*: a graduate course that involves discussions, analysis and application of quality control concepts to include both attribute and variable quality control techniques. Advanced graphical problem solving techniques in Six Sigma will be studied.

Spring 2011-present  *TECH 5320 Total Quality Management (traditional/online instruction)*: a graduate course that focuses on the analysis and application of total quality management principles with an emphasis on Six Sigma methodologies.

**Undergraduate Courses**

Fall 2015-present  *TECH 1320 Industrial Materials (traditional/t.v instruction)*: an undergraduate lab and instructional based course that explores the fundamental make-up and use of metals.

Fall 2011-present  *TECH 2311 Mechanical and Fluid Systems (traditional instruction)*: an undergraduate laboratory based course that introduces students to the fundamentals of mechanical and fluid power systems.

Summer 2011-2013  *TECH 2323 Introduction to Computer Applications (traditional instruction)*: an undergraduate course that addresses technology skills, presentation skills and integration of computer applications into teaching and learning.

Summer 2011  *TECH 4350 TPS in Industrial Studies (online instruction)*: an advanced database course that integrated industrial applications.

Fall 2010-present  *TECH 3310 (formerly 4310) Total Quality Management (traditional/t.v. and online instruction)*: an undergraduate applied computer course that focuses on the analysis and application of total quality management principles.

Fall 2010-Spring 2011  *TECH 1330 Fundamentals of Electronics (traditional instruction)*: an undergraduate laboratory based course that addresses the basic AC and DC concepts as well as the fundamentals of electronics.

*Jackson State University*
Fall 2008-Fall 2009  *IT 100 Introduction to Industrial Technology (traditional instruction)*: an undergraduate course that addresses the past, present and future direction of the field of Industrial Technology as well as terminology.

**Mississippi State University**

Fall 2009  *TKI 3383 Forecasting & Cost Modeling (traditional instruction)*: an undergraduate course addressing the higher functions of spreadsheet software to undertake costing of manufacturing process routes and to forecast changes in manufacturing scenarios.

Fall 2009  *TKI 4263 Manufacturing System (traditional instruction)*: an undergraduate course focusing on the understanding and application of the basic concepts of modern manufacturing process management systems, with regards to quality, just-in-time, lean manufacturing and six sigma.

Fall 2003-Fall 2009  *TKT 1273 Computer Applications in Education (online and traditional instruction)*: an undergraduate course that addresses technology skills, presentation skills and integration of computer applications into teaching and learning.

Spring 2007  *TKB 2122 Introduction to Database Management (online)*: an undergraduate course addressing database management technology as it applies to business applications in today's contemporary business environment.

Spring 2007/Fall 2007  *TKT 4000 Directed Independent Study*: an undergraduate course that enables students to apply their theoretical knowledge and technological skills to create and present technology-based projects and papers.

Summer 2006  *TKB 2132 Introduction to Spreadsheet Design and Analysis (traditional instruction)*: an undergraduate course that addresses electronic spreadsheet technology applied to business applications in today's contemporary business environment.

Fall 2005-SU 2006  *TKB 1123 Document Formatting/Information Processing (traditional instruction)*: an undergraduate course addressing keyboarding principles and mastery of word processing competencies required to produce business documents.
Spring 2006  
*TKI 4363 Manufacturing Systems (traditional instruction)*: an undergraduate course focusing on the understanding and application of the basic concepts of modern manufacturing process management systems, with regards to quality, just-in-time, lean manufacturing and six sigma.

**COURSES DEVELOPED**

*The University of Texas at Tyler*

Spring 2016  
Research Techniques in Technology (Graduate)

Spring 2015  
Strategic Sourcing (Graduate)

Summer 2013  
Advanced Lean Six Sigma Black Belt (Graduate)

Spring 2012  
Project Management (Graduate)

Fall 2011  
Six Sigma (Graduate)

Fall 2010  
Total Quality Management (Undergraduate/Graduate)

**SERVICES/ASSIGMENTS**

*The University of Texas at Tyler*

**HRD DOCTORAL ADVISEES and DOCTORAL COMMITTEE MEMBERSHIPS**

Susan Grove (Fall 2012-2014 Cohort, Graduated, 2018)  
*Dissertation*: Examining the Relationship between Employee Engagement, Job Satisfaction, Job Burnout, and Turnover Intention of Student Services Employees in Higher Education

David Macauley (Fall, 2015-2017 Cohort, Graduated, 2018)  
*Dissertation*: Examining Managerial Leadership Behavior, Perceived Proximity, and Job Satisfaction in Distributed Work Arrangements

Jim Rumsey (Fall, 2011-2013 Cohort, Graduated, 2014)  
*Dissertation*: The Difference in the Social Styles of Career and Volunteer Fire Chiefs

Afton Barber (Fall, 2011-2013 Cohort, Graduated, 2014)  
*Dissertation*: Exploring Generational Differences Between Generation Y and Baby Boomers in Work-Life Balance

**ADDITIONAL SERVICES/ASSIGMENTS**
The University of Texas at Tyler

Fall 2017-2019 Member of CBT Tenure and Promotion Committee

Summer 2013-present Dissertation Committee member for Ph.D. Candidates

Spring 2011-present Faculty advisor for Epsilon Pi Tau- Delta Gamma Chapter (Honor society for technology professionals)

Fall 2011-present Marshall for CBT Commencement Ceremonies

Fall 2010-present Faculty advisor for the Association of Technology, Management, and Applied Engineering (ATMAE) student chapter

Fall 2018 Reviewer for Journal of Management Development

Fall 2017 Reviewer for Technology Interface International Journal

Fall 2017 Reviewer for Quality Engineering

Fall 2016-2017 Co-chair CBT Undergraduate Curriculum Committee

Summer 2016/Spring 17 Reviewer for the Journal of Technology, Management, and Applied Engineering

Spring 2016-2018 Member of CBT Faculty Awards and Research Committee

Fall 2015-Fall 2017 Member of CBT Student Awards and Scholarship Committee

Spring 2015 Reviewer for Human Resource Development Quarterly

Spring 2014 Reviewer for International Journal of Vocational and Technical Education

Fall 2013-2016 Chair of The University of Texas at Tyler Traffic and Parking Citation Appeals Panel

Fall 2012-Fall 2013 Member of The University of Texas at Tyler Traffic and Parking Citation Appeals Panel

Fall 2012-2014 Member of CBT Undergraduate Curriculum Committee

Fall 2012-2014 Member of the CBT Undergraduate Council (HRD and TECH)

Summer 2012 Served on the search committee for Student Life & Leadership for the Student Development Specialist I position
Spring 2012  Reviewer for *Technology Integration and Foundations for Effective Leadership*

Spring 2012  Served as a CBT mission committee member (HRD and TECH)

Fall 2011-Fall 2013  Member of the Writing Assessment Task Force Committee

Fall 2011-Fall 2014  Assurance of Learning Committee member

**Mississippi State University**

Fall 2006-Spring 2009  Instructional Technology Advisory Committee (ITAC) representative for the Department of Instructional Systems, Leadership and Workforce Education

Fall 2006-Spring 2009  Instructional Technology Advisory Committee: worked in a team environment to evaluate and implement technology usage at Mississippi State University as well as discuss the creation, use, ownership, royalties of electronically and traditionally developed course materials.

Spring 2005/Fall 2005  Served as a guest speaker in the TKT 9213: Foundation, Trends and Issues in Instructional Systems, Leadership and Workforce Development (ISLWD) Graduate class at MSU; conducted a discussion about the US education system in regards to its roots and origins

**PROFESSIONAL AND ACADEMIC ASSOCIATIONS**

Fall 2018-Fall 2020  Association of Technology, Management, and Applied Engineering (ATMAE) Board of Directors-Chair

Spring 2018-Present  Association of Technology, Management, and Applied Engineering (ATMAE) Awards committee-Chair

Spring 2018-Present  Association of Technology, Management, and Applied Engineering (ATMAE) Membership committee

Spring 2018-Present  Association of Technology, Management, and Applied Engineering (ATMAE) Student Division Liaison

Fall 2011-present  Industrial Technology/Industrial Management Advisory Committee: works in a team environment to advance the Industrial Technology/Industrial Management curriculum and students involvement throughout East Texas

**AWARDS**

- **2017** The College of Business and Technology Service Award
- **2016** The Association of Technology, Management and Applied Engineering Outstanding Student Chapter Award-ATMAE Conference (Advisor)

  Awarded University co-curricular funding for lodging and travel for students at The Association of Technology, Management, and Applied Engineering (ATMAE) Conference, Orlando, FL-5 students

  Epsilon Pi Tau's (EPT) Warner Professional Practice Award

  Outstanding Accomplishment at The University of Texas at Tyler's “Faculty and Staff Publications and Presentations Reception”
2015 The Association of Technology, Management and Applied Engineering Outstanding Student Chapter Award-ATMAE Conference (Advisor)

Awarded University co-curricular funding for lodging and travel for students at The Association of Technology, Management, and Applied Engineering (ATMAE) Conference, Pittsburgh, PA-4 students

Outstanding Accomplishment at The University of Texas at Tyler's “Faculty and Staff Publications and Presentations Reception”

2013 Editor's Choice Award for article accepted in Academic Exchange Quarterly, 17(2).

The Association of Technology, Management and Applied Engineering Outstanding Student Chapter Award-ATMAE Conference (Advisor)

Awarded University co-curricular funding for lodging and travel for students at The Association of Technology, Management, and Applied Engineering (ATMAE) Conference, New Orleans, LA-8 students

2012 The Association of Technology, Management and Applied Engineering Outstanding Student Chapter Award-ATMAE Conference (Advisor)

Awarded University co-curricular funding for lodging and travel for students at The Association of Technology, Management, and Applied Engineering (ATMAE) Conference, Nashville, TN-5 students

2011 Nominated for The University of Texas at Tyler’s Outstanding Student Organization Advisor Award

The Association of Technology, Management and Applied Engineering Outstanding Student Chapter Award-ATMAE Conference (Advisor)

Awarded University co-curricular funding for lodging and travel for students at The Association of Technology, Management, and Applied Engineering (ATMAE) Conference, Cleveland, OH-5 students

LICENSES / CERTIFICATION

2016 Certified Lean Champion (CLC)
2012 Certified Lean Six Sigma Black Belt (CLSSBB)
Certified Senior Technology Manager (CSTM)
Certified Senior Manufacturing Specialist (CSMS)
2011 Certified Technology Manager (CTM)
Certified Manufacturing Specialist (CMS)

PROFESSIONAL AFFILIATIONS

- Epsilon Pi Tau (EPT) Honor society for professions in technology
- Association for Educational Communications and Technology (AECT)
- The Association for Career and Technical Education (ACTE)
- American Educational Research Association (AERA)
- Association of Technology, Management and Applied Engineering (ATMAE)
- Association for sTEm Teacher Education (ASTE)

PROFESSIONAL CONFERENCES/WEBINARS AND WORKSHOPS:

- Association of Technology, Management and Applied Engineering (Annually)
- Canvas LMS training (The University of Texas at Tyler)
- Lean Management Systems (Heriot-Watt University, Edinburgh, Scotland, UK)
- Small Teaching: Everyday Lessons from the Science of Learning (The University of Texas at Tyler)
- End Note workshop (The University of Texas at Tyler-Library)
- Zoom workshop (The University of Texas at Tyler)
- Ten Principles for Online Course Assessment Webinar (The University of Texas at Tyler)
- 10 Strategies to Improve Blended Course Design 2012 Webinar (The University of Texas at Tyler)
- Respondus workshop (The University of Texas at Tyler)
- Tegrity Lecture Capture workshop (The University of Texas at Tyler)
- Camtasia Studio 7 workshop (The University of Texas at Tyler)
- Elluminate Live workshop (The University of Texas at Tyler)
Mohammed Ali

Longview University Center Program Coordinator and
Associate Professor of Industrial Technology and Industrial Management
Department of Technology, The University of Texas at Tyler
Longview University Center #218
3201 N. Eastman Road, Longview, TX 75605, USA
Phone: (903) 663-8218, Email: mohammedali@uttyler.edu

OBJECTIVES

- Serving the University of Texas at Tyler through teaching, scholarship, service and professional collegiality;
- Applying my strong teaching, research and industrial experience on experiential learning;
- Teaching face-to-face and online both undergraduate and graduate levels Industrial Technology and Industrial Management courses;
- Engaging students in applied research in the areas of pulmonary drug delivery, biomedical device and additive manufacturing;
- Providing academic and co-curricular advising to the students and contributing to student development, registration, retention and timely graduation;
- Undertaking scholarship and professional services to ATMAE and EPT;
- Enhancing student recruitment through advisement, 2+2 MOU articulation, community outreach, college fair, and Undergraduate/Graduate science and engineering research fair.
- Serving various committees of the department, college and university.

EDUCATION

Ph. D., University of Arkansas at Little Rock, Little Rock, Arkansas, USA, May 2008.

M.S., Oklahoma City University, Oklahoma City, Oklahoma, USA, Aug. 2001.
Major: Computer Science
Supporting Areas of Emphasis: Database and Artificial Intelligence

Major: Management of Technology

M.E. Coursework, Bangladesh University of Engineering and Technology, Dhaka, Bangladesh, August 1993.
Major: Industrial and Production Engineering

B.S., Chittagong University of Engineering and Technology (Formerly Bangladesh Institute of Technology), Bangladesh Sept. 1992.
Major: Mechanical Engineering

TEACHING & PROFESSIONAL POSITIONS

1. Associate Professor of Industrial Technology and Industrial Management, and Program Coordinator, Longview University Center, The University of Texas at Tyler, Texas, USA. (Sept 2016 - present) w/tenure.

2. Associate Professor of Industrial Systems and Technology and Program Coordinator of Manufacturing and Design, Jackson State University, Jackson, Mississippi, USA. (Aug 2013 -16) w/tenure.

3. Assistant Professor, Department of Industrial Technology, Jackson State University, Jackson, Mississippi, USA. (August 2007 – July 2013). Received ATMAE Faculty Excellence Award 2011 for Teaching, Research and Service. Received departmental Outstanding Faculty for Research Award 2012.

5. Research Fellow, National Institute of Environmental Health Sciences, Research Triangle Park, North Carolina, USA. (June 1, 2007 - July 30, 2007).

7. Adjunct Professor, University of Arkansas at Little Rock, Little Rock, Arkansas, USA. (August 1, 2004 - December 30, 2004).

8. Assistant Professor, University of Information Technology and Sciences, Dhaka, Bangladesh. (January 1, 2004 - July 30, 2004).
9. Lab Administrator, Oklahoma City University, Oklahoma City, Oklahoma, USA. (January 1, 2000 - August 30, 2001).

**TEACHING EXPERIENCE AND INTERESTS**

- Computer Integrated Manufacturing (CIM)
- Programmable Logic Controller (PLC)
- Manufacturing Processes
- Lean Production
- Polymer Processing
- Advanced Manufacturing Processes
- Total Quality Management
- Plant Layout and Facilities Planning
- Advanced Production Management
- Logistics and Supply Chain Management
- Advanced Supply Chain Management
- Materials Testing and Machine Design
- Production and Inventory Management
- Statics and Materials Mechanics
- Hydraulics and Fluid Power, Hydraulic and Pneumatic Module Lab
- Computer Aided Drafting (AutoCAD, Inventor)
- Advanced Computer Aided Drafting (SolidWorks, Pro-E)
- Motion and Time Study
### TEACHING EVALUATION BY STUDENTS

Average score of teaching evaluation was 4.78. Students were asked to evaluate the teaching effectiveness of various classes taught on a 1 to 5 point scale. 1 represents the lowest and most negative impression which is unsatisfactory, 2 for some extent satisfactory, 3 for very satisfactory, 4 for exceeding expectation and 5 represents the highest and most positive impression. Following table summarizes the overall ratings for respective courses.

#### Course Number and Title

### LEAD ORGANIZER OF MIDDLE & HIGH SCHOOL SUMMER CAMPS
Lead Organizer and Instructor, 3D Printing and Robotics summer camp every year since 2018. Twenty attendees ranging from 8th to 11th grade. Activities include a) industrial plant tour, b) design 3D model of machine parts and miniature rockets (~300 ft. flight) using CAD and manufacture of these models using additive 3D printing technology and laser cutter, and c) program robotic work-cell at virtual factory.

**SELECTED AWARDS & HONORS**

1. ACA Scholarship Award 2018, awarded by the Epsilon Pi Tau, International Honor Society for Professions in Technology.

2. Best Faculty Award 2012 for Research awarded by College of Science, Engineering and Technology, Jackson State University

3. Faculty Excellence Award 2011, selected from 97 ATMAE accredited college and university program faculties in the nation, awarded by the Association of Technology, Management, and Applied Engineering (ATMAE) for demonstrated excellence in teaching, research and service in an academic career.

4. US Navy Summer Faculty Fellowship Award; Naval Surface Warfare Center, Virginia. (2013-15).

8. Research Achievement Award, American Association of Bangladesh Pharmaceutical Scientists. (November 15, 2008).

10. NIEHS Fellowship Award from National Institute of Health. (June 2007).

11. Best Student Research Award, Arkansas Society for Public Health Education. (March 2007).

12. Faculty Inductee, Alpha Epsilon Lambda, Engineering Professional Honor Society. (October 2006).

**LICENSURES & CERTIFICATIONS**

- Certified Senior Manufacturing Specialist (CSMS), since 2011, Certified by Association of Technology, Management and Applied Engineering (ATMAE) for the USA.

- Certified Educational Robot Training Instructor by FANUC America Corp. (June 2017)

- Engineer Intern, Texas Board of Professional Engineers, since 2003.

- Engineer Intern, Louisiana Professional Engineering, and Land Surveying Board, since 2003.

**PROFESSIONAL MEMBERSHIP & LEADERSHIP**

- Professional Member, Association of Technology, Management and Applied Engineering (ATMAE).

- Chapter Trustee, Delta Gamma Chapter, Epsilon Pi Tau, The UT Tyler, 2018 – To date

- Professional Member, American Society of Mechanical Engineers (ASME), 2010-2016.

- Member, American Association for Aerosol Research, 2006-2009.

- Member, Mississippi Academy of Science, since 2008.

- Life Member, Alpha Epsilon Lambda.

- Life member, Upsilon Pi Epsilon.

**HOLDING OFFICE PROFESSIONAL ASSOCIATIONS**

1. Program Evaluator, ATMAE Accreditation Visiting Team (every year since 2016).

2. Exam Commission Member, ATMAE Certified Manufacturing Specialist (every year since 2010).
3. Advisory Board Member, Kilgore College Maintenance and Corrosion Technology Programs, Texas 2017- to date

4. Advisory Council Member, East Texas Advanced Manufacturing Academy, Longview, TX. 2918- To date

5. Chair, Executive Committee of the ASME Mississippi Chapter (2013-2016).

6. Vice Chair, Executive Committee of the ASME Mississippi Chapter (2010-2012).

7. College and Student Relations, Officer of the ASME Mississippi Chapter (2011-2012).

8. Faculty Advisor & University Liaison, Society of Manufacturing Engineers MS Chap. (2007-2016)

JOURNAL EDITORIAL BOARD MEMBER

2. Associate Editor, ASME Early Career Technical Conferences and Journals. (since 2012).

GRANTS & SCHOLARSHIPS REVIEW PANELIST

1. Panelist, NSF Graduate Research Fellowship Program (GRFP), (every year since 2013).
2. Panelist, NIH Grant Proposals at the Center for Scientific Review (CSR), National Institute of Health (since Aug 2012).

**PH.D. DISSERTATION EXAMINER AND M.S. RESEARCH**

**SUPERVISED GRADUATE & UNDERGRADUATE RESEARCH**

6. Supervised Research, REO Grant Funded by MS-INBRE, "Characterizing principles of laboratory graded aerosols generated from pressurized metered dose aerosol generators." (June 1, 2009 - August 31, 2009). REO Student: Courtney L. Johnson.

ADVISORY COMMITTEE MEMBER OF INTERNATIONAL CONFERENCE

JUDGING AND CHAIRING NATIONAL CONFERENCE SESSIONS

1. Judge, The UT Tyler Student Research Showcase, Honors Program and the Center for Teaching and Learning (every year since 2017).

2. Judge, Students Robotics Competition organized by Manufacturing Division of ATMAE at Annual Conference 2014 and 2013.

ORGANIZER OF REGIONAL WORKSHOP

1. Organizer of Regional Workshop (thrice), American Society of Mechanical Engineers (ASME) District-F annual workshop was organized during the Engineers Week celebration at JSU campus on February 17-22, 2014; February 16-21, 2012 and November 8, 2012 for the first time at JSU.

SCIENTIFIC PUBLICATIONS

Peer Reviewed and Refereed Journals (Selected)

**Book Chapter**

**Presentations and Peer-reviewed Conference Proceedings (Selected)**

**FUNDED RESEARCH GRANTS & CONTRACTS**

5. Ali, M. (Senior Personnel), Kyle Bray (PI) "Verizon Minority Male Maker summer program – hands-on summer learning experience on solid modeling and 3D printing for Blackburn Middle School students," Sponsored by Verizon Communications, Corporate, $92,000.00. (June 1, 2015 – July 31, 2016).

7. Ali, M. (Conference Travel Grant) JSU Center for University Scholars $1,250 x 5 = $6,250, every year since 2010.

Note: Though the titles of above three grants are same but each work focused on a particular component of electromechanical deposition mechanisms of submicron and nano particles.

University Scholars, Jackson State University, $13,910.00. (June 1, 2008 - July 31, 2008).

PENDING & UNFUNDED GRANTS

2. Ali, M. (Principal Investigator), "Two 3D printers -Dremel DigiLab 3D45 for LUC -Industrial Tech Lab," Sponsored by Phillips 66 Pipeline, Midland, TX, $4,000.00. (March 6, 2018).

10. Ali, M. (Principal Investigator), Yuan, Pao-Chiang, "MRI: Acquisition of Aerosol Particle Analyzers for Interdisciplinary, Collaborative Research and Education in Jackson State University," Sponsored by National Science Foundation, Federal, $261,512. (Unfunded)

11. Ali, M. (Senior Personnel), Fadavi, Mehri (PI), "Mississippians Engaged in Research and Inquiry-based science Teaching—Project MERIT," Sponsored by Howard Hughes Medical Institute, Private, $2,200,000. (Unfunded)

ACADEMIC CITIZENSHIP & UNIVERSITY SERVICE

Departmental Service-----------------------------------------------

4. Committee Member, BS and MS Program Assessment Committee. (February 2, 2009 - 2015).

5. Faculty Advisor, Society of Manufacturing Engineers. (September 15, 2007 - 2016).

7. Member, Chair Selection Committee of Technology Department, 2013-2014, JSU.

College Service---------------------------------------------------------------

1. Member, Soules College of Business Faculty Awards & Research Committee (August 2018 – To date).
2. Member, UT Tyler Soules College of Business Awards and Scholarship (August 2017 – To date).

5. Member, JSU CSET College Performance Base Pay. (August 2013 - 2016).

6. Chair, JSU CPH Research Poster Sub-committee and Member of Steering Committee for Health Disparities Conference. (October 9, 2007 - 2013).

7. Judge, Jackson State University (JSU) Region II Science and Engineering Fair. (March 26, 2008 - 2016)

University Service--------------------------------------------------------------

3. Committee Member, SACS Self Study Committee. (December 4, 2008 - 2013).

4. Committee Member, Quality Enhancement Planning (QEP) at JSU, (September 18, 2008 - 2014).

FACULTY TEACHING, RESEARCH & PROFESSIONAL DEVELOPMENTS

15. Continuing Education Program, "ASME MS Section National Engineers' Week” Lecture," American Society of Mechanical Engineers. (February 21, 2012).

24. Workshop, "Introducing Science Faculty to Materials Science and Engineering," NSF (Conducted by the University of Alabama, Tuscaloosa). (June 8, 2008 - June 27, 2008).
E. Shirl Donaldson

• Donaldson, E. S., & Dixon, T. (2014, June). *Family Businesses: A gift or a burden? A pilot study focused on students that were nurtured by entrepreneurial parents*. Accepted for ASEE National Conference.

• Donaldson, E. S. (2016, November). *Can Lean Six Sigma be implemented in Higher Education while ensuring that all customer needs are being met?* *IAJC*. Orlando, Florida: IAJC.
Donaldson, E. S., & Goris, T. (2016, November). *Addressing the challenges of preparing science teachers to introduce engineering to early learners in elementary and middle schools*. IAJC. Orlando, Florida: IAJC.

Do students think certifications and licensures are important to their future career goals? This paper addresses this issue and by doing so provides the details of how a dying graduate program was revitalized into one that is sought after by students from across the globe. Additional information regarding the selection of curriculum content, enrollment trends, student demographics, and more will be covered as well as a feasible timeline for implementation.

Donaldson, E. S., McWhorter, R. R., & Fountain, R. (2017). *Utilizing Lean Six Sigma in the treatment of Cardiac Care: Optimizing the response to STEMI events in a rural community*. JATMAE.
McWhorter, R. R., & Donaldson, E. S. (2017, April). Documenting online service-learning projects: A collaborative effort to preserve legacies in East Texas. 1st Annual Service-Learning Showcase.,. The University of Texas at Tyler.: The University of Texas at Tyler.

This exploratory case study sought to gather the perceptions of current graduate students enrolled in an online HRD course involved in a large-scale regional service-learning project; also, to involve a second graduate course studying project management techniques that applied PM concepts to document the preservation and service-learning the processes by a project management graduate course.

This presentation details the first online training program associated with an ATMAE certification and its impact on improving the pass rate on the ATMAE Lean Six Sigma Exam.

This presentation details the first online training program associated with an ATMAE certification and its impact on improving the pass rate on the ATMAE Lean Six Sigma Exam.

Appendix F: Course and Program Continuous Improvement Model

Learner Outcomes Assessments
Directed by Department Chair
- ATMAE certification exam results
- Course assessments and projects
- Capstone and portfolio review
- Course and Instructor Evaluations
- Graduation Survey
- Alumni Survey
- Faculty Research
- External Sources

Analysis and Synthesis of Assessment Information
Directed by Department Chair
- Program faculty develop course/program improvement recommendations for departmental and advisory committee review and approval

University Curriculum Approval Process
Directed by Department Chair,
- Technology Department
- College of Business
- University Curriculum Committee
- Provost

Program/Course Revision
Directed by Department Chair
- Faculty provided with approved changes
- Changes made in course materials
- Advisory committees verification
- Pre and post change documents archived by Departmental Administrative Assistant
- Revise assessment process/procedures

</table>
The previous list of equipment was during the department’s last accreditation cycle when the now two separate HRD and Technology Departments were one department. At the time, the Technology faculty would request funds and maybe they would receive some funding for equipment and materials from the HRD Department Head. As of 2015, when the Technology Department became its own separate department again, the Technology faculty would not ask for funding. They were merely given the funding that they should have received from state formula funding and other sources. Separating the two departments was the best thing that ever happened and allowed the department to grow and improve its facilities and programs. As you can see, the funding allocation went from around $30,000 to over $200,000 which equated to a seven fold increase.

Appendix H: Advisory Committee By-Laws & Meeting Minutes
ARTICLE I: UNIVERSITY MISSION STATEMENT

The University of Texas at Tyler is a general component of The University of Texas System. The University provides a setting for free inquiry, excellence in teaching; scholarships and research; and public service by faculty, staff and students. As a community of scholars, the university develops the individual’s critical thinking skills, appreciation of the arts and humanities, foundation for participation in the global society, and commitment to lifelong learning.

ARTICLE II: DEPARTMENT OF TECHNOLOGY MISSION STATEMENT

Program Mission Statement: The Industrial Technology program at The University of Texas at Tyler provides its students with a comprehensive educational experience comprised of a vast array of technical skills and business knowledge deemed necessary for successful professional careers. Our high quality, accredited program offers courses online and face-to-face, thereby enabling students the flexibility to earn a degree that fits their schedule. Students from the program will learn from faculty scholars who have nationally recognized expertise in various technologies and engage in research and creative activity.

In accordance with the above statement, the Department of Technology continually strives to improve the array of managerial and technical knowledge and skills of individuals by offering programs and courses based on industry’s need for applications oriented, technically competent, flexible and internationally competitive employees.

In order to ensure that the program offerings are technically up-to-date, the Department employs laboratory instruction based on tabletop technology and computer-based simulation.

ARTICLE III: PURPOSE

Section 1. The Committee will be called The Department of Technology Advisory Committee. It is authorized by The Department of Technology and will serve at the pleasure of the President of UT Tyler or his designee.

Section 2. The general purpose of the Advisory Committee to The Department of Technology shall be to provide advice, guidance, and support for the continuing development of high quality technology programs and competent, well-trained graduates at The University of Texas at Tyler. The Committee’s role
is advisory to the Chair and faculty of the department in promoting leadership and quality in technology programs and graduates.

Section 3. The Committee shall assist in promoting the professional image and good relations of The Department of Technology. The specific purposes of the Committee may include the following responsibilities:

- assure that The Department of Technology addresses the current and future needs of business and industry
- recommend and review curriculum and program changes which will enable the department to be responsive to business and industry
- assist in identifying resource needs to support the program mission
- encourage and develop positive relationships between business and industry and the department
- aid in identifying and securing needed resources

ARTICLE IV: ORGANIZATIONAL STRUCTURE

Advisory Committee

The Advisory Committee is responsible for providing advice, guidance and support of programs of The Department of Technology. The initial Advisory Committee will consist of nine (9) members. Committee members will constitute a cross-section of the employment community, with special emphasis on private sector employees and employers. Membership will contain the following composition:

- A minimum of 50% of the committee membership shall be employees in business and industry.
- The rest of the committee membership shall be employees who represent higher education, nonprofit organizations and student(s).

Functions of the Advisory Committee

- Elect a Chair and a Vice-chair of the Advisory Committee. The Chairperson or Vice-Chairperson of the Advisory Committee will conduct the meetings.
- A majority of the members of the Advisory Committee present will constitute a quorum for the transaction of business at any meeting. Each
member will be entitled to one vote on each matter considered by the Committee.

- Advisory Committee members will not use a proxy system. Only those in attendance will vote on issues presented. Members may not appoint someone to take their place on the Committee in their absence for the purpose of voting.
- Agenda items may be proposed to the Chairperson of the Advisory Committee or by any member of the committee at least five (5) working days prior to the mailing of the agenda.
- Ensure Advisory Committee make-up as established by these by-laws
- Action items to be considered will be defined and sent to the Advisory Committee members prior to the meeting, whenever possible.
- Advisory committee meetings are open to all stakeholders; however, only the members and Chair will participate in the conducting of business, unless a stakeholder is recognized by the Committee Chair, for input into the discussion.
- Any member of the Committee will abstain from voting on an issue which directly benefits his organization in favor of another organization. Issues that benefit interested stakeholders equally do not require that a member abstain from voting on the issue.

Election & Terms of Officers

The Advisory Committee will have a Chairperson, a Vice-Chairperson, and a Recording Secretary. These officers will be elected by a majority of vote of the Advisory Committee and serve for one year, with a maximum of two consecutive terms in the same office, with the exception of the Secretary.

1. The Chairperson will:
   a. Have been a member of the Advisory Committee for at least one year prior to his/her election.
   b. Preside over all meetings of the Advisory Committee
   c. Establish subcommittees when necessary
   d. Represent, or appoint a designee to represent the Advisory Committee at official functions.
   e. Be a member of all subcommittees.

2. The Vice-Chairperson will:
   a. Be elected by a majority vote of the Advisory Committee.
   b. Function in the absence of the Chairperson.

3. The Secretary will:
   a. Be appointed by the Chair of The Department of Technology
   b. Be a non-voting member of the Advisory Committee
   c. Record and distribute the minutes of the meeting & prepare all other documents pertinent to the functioning of the Advisory Committee
Procedural Rules

1. **By-laws:** The committee will adopt a set of written by-laws at the organizational meeting of the committee. The by-laws govern committee operation. By-laws require a two-thirds vote for adoption or change.

2. **Meetings:** The committee will meet at least one (1) time per year. Written notices of upcoming meetings will be mailed to members at least ten (10) working days before a meeting. The Chair of The Department of Technology will call The Department of Technology Advisory Committee meetings.

3. **Minutes:** Minutes of each meeting will be kept by the recording secretary.Copies will be sent to the Advisory Committee and the Chair of The Department of Technology within two weeks after a meeting.

4. **Recommendations and Reports:** Committee recommendations and reports will be submitted in writing to the Advisory Committee. Documents will include both suggested action and justification for suggestions. The Committee will respond/react to such recommendations/reports in the next scheduled meeting.

5. **Term and Attendance Requirements:** The Advisory Committee members shall serve a term of not more than three years. The Committee will draw for two-year or three-year terms in order to provide continuity of leadership for the program. Members can choose to serve another term if requested.
   - Members who are absent without reasonable cause from two successive meetings will be considered to have resigned their seat. The Department of Technology will move to fill the position.
   - A Nominating Committee of three members of the Advisory Committee and the Chair of The Department of Technology will be established to maintain adequate committee membership.
   - The composition for the Advisory Committee will always be maintained as presented in these by-Laws.

6. **Public Announcements:** While members are expected and encouraged to discuss the instructional program within the community, members shall not report opinions expressed in meetings, nor shall they report independently on committee action.
Department of Technology Advisory Board Meeting Minutes
Soules College of Business, Room 350.55
Friday, November 30, 2018 at 11 a.m.

1. Introductions:
Mark Miller  Department of Technology
Heshium Lawrence  Department of Technology
Randell Farley  Trane
John Connolly II  Caterpillar, Inc.
Eric Ayanegui  Cintas
Luis Ibarra  Komatsu
Eric Boettcher  Tyler Junior College
Mohammed Ali  Department of Technology
Michael Rostis  John Soules Food
Dominick Fazarro  Department of Technology
Scott Reily  Brookshire Grocery Company
Dane Clark  Cardinal Health
Kelly Kaemmerling  Kilgore College
Roger Lirely  Interim Dean
Hannah Isleem  Industrial Technology Student Representative
Raejean Griffin  Industrial Management Student Representative
Brandy Smith  Admin Assistant II

2. Review of previous year’s minutes
Dr. Heshium Lawrence motioned to change date to 2017. Dane Clark seconded.

3. Overview of undergraduate degree program changes
Dr. Miller mentioned how they added the Warehouse course that was discussed previously to the graduate Industrial Management program as part of the Supply Chain Management certification.

Dr. Miller added that a chemistry class is now required, he believes it will help with preparing students for the Industrial materials course as noted by the representatives from STEMCO and Kluber from last year’s advisory committee meeting.

With the addition of the new building, the department is now offering a welding lab as part of the TECH 4343 Advanced Manufacturing Processes course.

Dr. Miller asked industry leaders for feedback regarding the current course offering, especially regarding gaps that might be filled making UT Tyler graduates more appealing.

Michael Rostis- wanted to know the statistics of how we keep up with the students after graduation.
Eric Ayanegui – suggested we get them an Alumni card, which would give the graduates discounts to different things on campus, and it allows the department to keep up with the student once they have graduated. It was what they were doing at his former alma mater.

Eric Ayanegui – Suggested more projects be mandatory with a company. 1-3 companies can sponsor or partner so students can do a project with their company – Grad Program service project with company or undergraduate capstone.

Eric Ayanegui – Suggested we offer a preventive maintenance course for graduates working in a company with more equipment.

Scott Reily – Suggested business basics are needed for industry leaders and managers.

Michael Rostis – Suggested more management courses that focus on building soft skills.

Eric Ayanegui – Seconded the idea of soft skills.

4. Discuss changes for ATMAE accreditation of the graduate program.
ATMAE is coming in spring to view the new building and labs as part of their accreditation site visit.

5. Seek input for changes to the program.
Scott Reily - suggested we focus more on the business background, more accounting.

Randell Farley - suggested maybe having more course or certifications that focus on safety, construction, six sigma, and becoming an ISO auditor.

Scott Reily - suggested changing the name of the program to Applied Engineering; he thinks the program applies more to Engineering.

Randell Farley - suggested PhD in Technology.

6. Review of competencies for the Industrial Technology program.
Dr. Miller – Reviewed the survey that he wanted the advisory board members to fill out so we could improve the program to suit their needs.

Dr. Miller – Reviewed the survey that he wanted the advisory board members to fill out so we could improve the program to suit their needs. Also noted that it was important for ATMAE accreditation.

8. Announce enrollment changes and possible search status.
Most of the Industrial Management students come from other disciplines. Enrollment was down because there are new guidelines to be met before enrolling in the program and less international students are entering the country for an education. Most of the students came from India and are now going to Australia and Canada because of their less stringent immigration policies.

9. Status on 2+2 articulation agreements and input from committee members.
2 Plus 2 agreements with Kilgore and others. Program is growing.

10. Discuss Longview Center affiliation and accomplishments.
Dr. Ali - Longview University Center – Added more courses since last semester. 90% of students are working full time/part time in the industry. They like the hands on.

Enrollment is growing.

East Texas Academy dual credit students enrollment is growing, 40 are enrolled in each class now.

Luis Ibarra- Added Komatsu is a big sponsor of the East TX Academy; he said they have to turn students away because there isn’t enough space in the Old Brew Honda dealership.

11. Continually review and validate content for both programs – survey (rate and rank homework) – Solicit advisory board input to better prepare graduates to serve industry.
Eric Ayanegui- Stated the curriculum is sound the way it is now and that if you want to fine tune, so be it.

12. Plant tours, sponsorship of student organization events, internships, student projects, donations of used equipment, even new equipment.
Dr. Miller- If anyone needs interns, the companies can send us a flyer and we can send it to the students.

Dr. Fazarro- Needs a company to volunteer for a plant tour.

Randell Farley offered a tour of Trane.

Luis Ibarra offered a tour of Komatsu.

Dane Clark offered a tour of Cardinal Health.

Michael Rostis offered a tour of JS Food.

Dane Clark- He mentioned that he is looking for an intern.
13. Comments from advisory board on any agenda items, issues, etc.
Dr. Miller – Noted that as the grad school students must complete industrial projects and it would be a great opportunity for plants to have a project that needs attention, but doesn’t have the personnel to accomplish it. Better to hire people from the area. UT Tyler is a good resource, better to hire locals. Finding a way to keep in touch with Gradates, to keep them local.

14. Discuss any new business.
PhD program would be beneficial to the university; the rep from Trane said there is at least 5 employees interested.
No other new business was discussed.

15. Adjournment – 1:30 p.m.
1. Introductions:

Dwight Evans  Kluber  
Tom Mullins  Tyler Chamber Of Commerce  
Joe Bumgarner  Eastman Chemical  
Marco Anaya  Stemco  
Mark Miller  Department of Technology  
James Lumpkin  College of Business and Technology  
Heshium Lawrence  Department of Technology  
Dominick Fazarro  Department of Technology  
Mohammed Ali  Department of Technology  
Peggye Mahfood  Department of Technology

2. Review of previous year’s minutes

Dr. Heshium Lawrence motioned to approve old minutes. Dr. Dominick Fazarro seconded.

3. Overview of undergraduate degree program changes

Dr. Lumpkin - New facility will have enough labs and space for the equipment needed. Could be a good opportunity for collaboration with the industrial community.
Dr. Miller asked industry leaders for feedback regarding the current course offering, especially regarding gaps that might be filled making UT Tyler graduates more appealing.
Scott Riley (BGC) previously suggested more courses focused on distribution. Dr. Fazarro asked about the need for a warehouse course.
Marco Anaya agreed that more warehousing courses would be helpful. Incorporating flow, layout, and technology integration would be helpful.
Joe Bumgarner – agreed and added that Receiving, RFID, and Supply Chain could be included.
Dr. Lumpkin shared that he has received requests to offer a supply chain emphasis in the MBA.
Joe Bumgarner added that more universities are offering degrees in Supply Chain Management.
Marco Anaya suggested that there be an MBA with procurement emphasis.
Dr. Miller - Majority of Tech students are 18 – 21.
All agreed that a supply chain emphasis should be implemented.
Marco Anaya - suggested incorporating a tool design course.
Joe Bumgarner – suggested a polymer class – could this expand to include chemicals, etc. 70% of the chemical industry is in the US. Would a chemistry class become a requirement? Would be good for industry to know that our graduates are comfortable with all aspects of their product.

Discussed the finance component – all agreed that Principles of Finance would be preferable of to Personal Finance.

Industry would like to see more students that are taking courses that offer more bang for the buck – coming away with a broader base of understanding.

Dr. Lumpkin – could we create a course like Accounting for technology – what would the list of topics look like?

4. **Discuss changes for ATMAE accreditation of the graduate program.**

Research component is required for ATMAE accreditation.

5. **Seek input for changes to the program.**

6. **Review of competencies for the Industrial Technology program.**

Dr. Lumpkin – Minor in business for the undergrad – what would industry like to see that might be a better fit along with an Accounting/Finance course. HRD 4372? Tech Writing would be a good offering.

Communication course is important.

Joe Bumgarner - interviewing skills is important for TECH students.

7. **Review of competencies for the Industrial Management program.**

Nine people took the Project Management Certification Exams and seven passed the PMI test. Marco Anaya said that it was important for all students to have a strong knowledge of project management. About 40% of students take the Lean Six Sigma test twice. First time taken, students get feedback. Industrial Management is a broad degree. If students take one more course, they can leave with 4 certifications.

8. **Announce enrollment changes and possible search status.**

Most of the Industrial Management students come from other disciplines.

9. **Status on 2+2 articulation agreements and input from committee members.**

2 Plus 2 agreements with Kilgore and others. Program is growing.

10. **Discuss Longview Center affiliation and accomplishments.**

Dr. Ali - Longview University Center – growing will need more room going forward.
11. Continually review and validate content for both programs – survey (rate and rank homework) – Solicit advisory board input to better prepare graduates to serve industry

12. Plant tours, sponsorship of student organization events, internships, student projects, donations of used equipment, even new equipment.

Joe Bumgarner suggested that a Needs List be produced and shared with industry.

13. Comments from advisory board on any agenda items, issues, etc.

At the grad school students must complete industrial projects and could be a great opportunity for plants to have a project that needs attention but doesn't have the capacity to accomplish it. Better to hire people from the area. UT Tyler is a good resource, better to hire locals.

Dr. Lumpkin – Would like to see more support/involvement with industry (labs, supplies, equipment, etc.) There is a lot of manufacturing in Smith and Gregg County – as new equipment comes in, UT Tyler students need to be able to learn on similar or equal type of equipment.

14. Discuss any new business.

Dr. Miller – will work on curriculum proposal to submit in January.

15. Adjournment – 8:30 am
The University of Texas at Tyler
Department of Technology
Industrial Advisory Board Meeting Minutes
at
The Longview University Center
December 14, 2016, Noon – 2:00 pm

Present: Dr. Mark Miller, Dr. James Lumpkin, Jake Garland, Dr. Van Patterson, Dr. Dominick Fazarro, Dr. Shirl Donaldson, John Hopkins, Dan Flournoy, Dr. Muhammad Ali, Dr. Heshium Lawrence, and Neely Smith

Minutes taken by Dr. Heshium Lawrence

- Motion to prove the previous minutes from last year by Dr. Lawrence seconded by Dr. Fazarro.
- Dr. Miller noted an upward trend in enrollment and a large increase at the LUC. Over 200.
  - Around 90 in graduate program (33 total students in Longview University Center)
- Dr. Miller explained the reason for offering the Industrial Technology program at Longview due to the results of a Longview Economic Development Corporation (LEDCO) survey to see if there was a need; survey was sent to 250 industries, 70% response rate, 80% will hire Industrial Tech majors.
- Dr. Lumpkin commented that there was a rule change that affected our international students, resulting in a drop of international students.
- Dr. Patterson commented on the Roadmap to Success brochure - Articulation agreements with Kilgore College, TSTC, and North East Community College (Industrial tech building)
- A 2+2 articulation agreement was approved with TSTC is good for any TSTC campus offering those programs. Dr. Patterson noted how the Chancellor and UT Tyler President signed the agreements.
- Dr. Lumpkin also provided some additional comments about the process and thanked Dr. Miller.
- Neely approved of the 2+2 adding that they work with the Industrial Maintenance Technology program at TSTC over the past year.
- Course inventory was discussed and we discussed about reactivating some older courses not currently being taught; Industrial Distribution program courses were discussed.
- Dr. Miller noted that 43% of our students are now starting out as freshmen.
- Applied research methods class was discussed and approved by the Undergraduate Curriculum Council.
- Course description for project management was changed due to its vagueness.
- Undergraduate concentration emphasis course for Supply Chain Management:
  - Supply Chain Mgmt., Industrial Distribution, Purchasing and Distribution and Manufacturing, Warehousing
- Dr. Miller is trying to find a niche for our program is the premise for this concentration area.
- Project management is at the graduate level and there was a discussion about creating a course at the undergraduate level. Neely and others thought that was an excellent idea since their production supervisors are always working on projects and have difficulty organizing them.
- Looked at graduate level on page 5 (Research core, Professional core, Technical core)
  - Certifications offered at the graduate level: LSSBB, Supply Chain, Project Management, FANUC
- Dr. Fazarro asked a question concerning an end of the year project with industry at the graduate level
- Neely asked about work experience for Industrial Technology students when they graduate and Dr. Miller responded that the more internships we can obtain for them, the better.
- Dr. Donaldson also noted that the undergraduate students had to take a senior design or capstone experience course.
- Neely would rather hire an undergraduate with industrial experience.
- Dr. Ali pointed out the difference between the thesis or non-thesis routes for the master’s program.
- HRD shares courses with the graduate Industrial Maintenance program so courses are often full and difficult to enroll in so the degree plan now allows students to pick two out of the four research courses available. Furthermore, the research component was added to an internship course to promote more internships for students.
- Survey was sent out to rate competencies as either needed or not to the advisory board
  - The website provides the syllabi for each of the courses in case the advisory board wants a clear idea of the courses’ content.
- Page 14 was looked at the layout of a possible new Technology building if enrollment continues to increase at the LUC.
- Dr. Fazarro discussed the ATMAE certifications and their advantages at the meeting.
- The Board discussed a date for the next meeting (Late March/early April-possible breakfast meeting).
- The group then toured the Longview University Center campus.
- Adjoined the meeting at 2:02 pm.
The University of Texas at Tyler
Department of Technology Advisory Committee Meeting
Friday, December 4, 2015- 11:30 A.M. – 1 P.M.
Coyote Sam’s Restaurant: Banquet Room

• **Introductions**- Dr. Miller called the meeting to order at 11:09 A.M., by welcoming and expressing appreciation to those in attendance.
  - Facilitator- Dr. Mark Miller, Prof. & Chair of Technology Department - UT Tyler
  - Minutes Taker- Drs. Heshium Lawrence and Mark Miller- UT Tyler
  - Dr. James Lumpkin, Dean of the College and Business of Technology- UT Tyler
  - Dr. Shirl Donaldson, Assist. Prof., Industrial Technology &Industrial Management- UT Tyler
  - Dr. Heshium Lawrence, Assist. Prof., Industrial Technology &Industrial Management- UT Tyler
  - Scott Riley, Sr. VP of Logistics at Brookshire Grocery Company
  - Peter Kuczkowski, Process Improvement Leader -Trane
  - Daniel Lee, Production Manager-Trane
  - John Hood, Argon Medical Devices, Inc.
  - Dr. Van Patterson, Director of the Longview University Center
  - Joe Bumgarner, Eastman Chemical

Regrets:
  - Samuel Kaemmerling, Chair of the Industrial Maintenance program- Kilgore College Longview
  - Kenya Ray, Instructor Corrosion Technology -Kilgore College
  - Tim Gill, Chair Comp. Info. Systems & Eng. Tech. at Tyler Junior College
  - Wayne Dillon, Division Director of Design, Manufacturing & Transportation- TSTC-Marshall
  - Dr. Dominick Fazarro, Associate Professor of Industrial Technology &Industrial Management- UT Tyler

I. **Review Previous Year’s Meeting Minutes**
  - At 11:30 a.m. Dr. Miller distributed last year’s minutes and called a vote to approve the meeting minutes from the previous meeting on December 15, 2014; Scott Riley motioned to approve the minutes.
  - Motion was seconded by Dr. Heshium Lawrence.
• Motion carried unanimously by the Technology Advisory Board Members.

II. Overview of Undergraduate Industrial Technology Program Changes
• It was noted that no new undergraduate courses were created, instead three courses were reactivated which only required the dean of the college’s signature (TECH 4305 Industrial Distribution, TECH 4316 Time and Motion Study, and TECH 4348 Warehousing). This would eventually allow students to earn an emphasis in Supply Chain Management with the following courses once enough faculty were hired:
  TECH 3355 Supply Chain Management
  TECH 4305 Industrial Distribution
  TECH 4348 Warehousing
  TECH 4325 Purchasing in Distribution and Manufacturing

III. Overview of Graduate Industrial Management Program Changes for ATMAE Accreditation
• Dr. Miller noted that a new course (TECH 5302 Applied Research Methods) would be added to the curriculum to improve our research component of the degree plan. In addition, TECH 5307 Measurement & Evaluation in Industrial Ed. and TECH 5355 Technological Innovation were reactivated for later use as the program expands and hires new faculty. Furthermore, TECH 5306 Advanced Logistics Management was changed to just Logistics Management and TECH 5329 Trends in Industry and TECH 5371 Internship in Technology had the word “research” added to the beginning of the title to expand the research component required by ATMAE accreditation.

IV. Seek Input for Changes to the Programs
• Mr. Hood noted that he was on the school board for Rusk and that it would be great if the Industrial Technology program could offer dual credit courses for the high schools. He noted that it had generated a lot of interest with engineering offerings and that the school board was really interested in establishing those connections with area universities.
• Mr. Bumgarner mentioned that instead of hiring a lot of clerks, Eastman Chemical was hiring baccalaureate graduates because of all there additional educational background. He noted that they were happy with the Industrial Technology majors and had hired several of them. Dr. Miller noted that he had spoken with Pete Lamothe (Learning Services Manager) and that Industrial Technology majors were now listed as an
official degree they accepted and would require much less of their in-house training.

V. Review of Competencies for the Industrial Technology Program

- Dr. Miller reviewed the results of the competency survey that advisory board members completed. Mr. Riley noted that just because a competency was rated lower than others that didn’t necessarily mean that it wasn’t important. He also noted that he didn’t feel that any of the competencies should be omitted. Mr. Riley also noted that SAP familiarity was important for a graduate of the program. Dr. Lumpkin noted that if students took enough business courses, than they could earn an SAP certification. Mr. Riley noted that the SAP module in purchasing was important.

VI. Review of Competencies for the Industrial Management Program

- Another survey was distributed to rate the competencies of the graduate program and none of the advisory board members felt that anything should be changed except that Mr. Kuczkowski noted that students should be familiar with ERP systems.

VII. Announce Enrollment Changes and Search Status.

- Dr. Miller noted that there were now 105 officially enrolled undergraduate Industrial Technology majors and 151 actively enrolled in the last year. That was an increase of only three from the previous year, however, the size of the facilities and number of faculty limited the growth of the program. Plans were to start the program at the Longview University Center as well with a new laboratory equipped similar to the Tyler campus.

- The graduate program increased by almost 20 students from 79 to 98. It was also noted that most of the majors come from engineering, computer science, and business backgrounds and that very few of the Industrial Technology majors come back for an additional degree.

- Because of the large increases in enrollment and students who want to earn minors and certifications, the department asked for at least one new faculty member for the 2016 Fall Semester. Dr. Shirl Donaldson was hired the previous year to assist with the growth of the programs.
VIII. Discuss Longview Center Affiliation

- Dr. Van Patterson explained the decline in enrollment over the years due to the offering of online coursework. In addition, he noted that the nursing program has really seen a lot of growth since it is a “hands-on” type program where most of the coursework cannot be offered online. He noted that another type of hands-on program would also probably flourish there and referred to a LEDCO survey that queried over 250 companies as to the importance of offering an Industrial Technology program in the area. There was a favorable response by 80% of those surveyed.

- Dr. Patterson also noted that a new Industrial Technology laboratory was being set up at the Longview University Center and the Provost welcomed the addition of a new faculty member permanently housed there. He also noted that they were paying for advertising, sent out many press releases, created a “Road Map to Success” brochure with the partnership of Kilgore College. He was also working with NTCC and TSTC.

- Dr. Miller noted that he was visiting Longview on a weekly basis and working with Dr. Patterson on getting the word out to industry, schools, and the public in general.

IX. Discussion of Any New Business

- Dr. Miller noted that the new Texas Productivity Center, previously referred to as the East Texas Lean Consortium, now had Mr. Ron Gewin offering Lean Champion training for them at the university or directly at plant locations pending the number of participants.

- The meeting was adjourned at 1:05 pm.
The University of Texas at Tyler
Department of Technology Advisory Committee Meeting
Friday, November 14, 2014 - 11:30 A.M. – 1 P.M.
Coyote Sam’s Restaurant: Banquet Room

- **Introductions**- Dr. Miller called the meeting to order at 11:15 A.M., by welcoming and expressing appreciation to those in attendance.
  - Facilitator- Dr. Mark Miller, Prof. & Coordinator of Technology Department - UT Tyler
  - Minutes Taker- LaTonya Morgan, Student Worker HRD and Tech.- UT Tyler
  - Dr. James Lumpkin, Dean of the College and Business of Technology- UT Tyler
  - Dr. Heshium Lawrence, Assist. Prof., Industrial Technology &Industrial Management- UT Tyler
  - Dr. Dominick Fazarro, Associate Professor of Industrial Technology &Industrial Management- UT Tyler
  - Samuel Kaemmerling, Chair of the Industrial Maintenance program- Kilgore College Longview
  - Kenya Ray, Instructor Corrosion Technology -Kilgore College
  - Scott Riley, Sr. VP of Logistics at Brookshire Grocery Company
  - Tim Gill, Chair Comp. Info. Systems & Eng. Tech. at Tyler Junior College
  - Wayne Dillon, Division Director of Design, Manufacturing & Transportation- TSTC-Marshall
  - Peter Kuczkowski, Process Improvement Leader -Trane
  - Daniel Lee, Production Manager-Trane
  - Lauren McGrew, Eastman Chemical
  - Joe Bumgarner, Eastman Chemical

Regrets:
- John Hood, Argon Medical Devices, Inc.
- Gulliarmo Garcia, Lean Sigma Master Black Belt-City of Tyler

V. **Review Previous Years Meeting Minutes**
- At 11:30 a.m. Dr. Miller distributed last year’s minutes and called a vote to approve the meeting minutes from the previous meeting on December 6, 2013; Tim Gill motioned to approve the minutes.
- Motion was seconded by Dr. Heshium Lawrence.
- Motion carried unanimously by the Technology Advisory Board Members.

VI. **Overview of Undergraduate Industrial Technology program changes**
- Meeting Focus: Building working relationships with area colleges and industry leaders focused on ensuring their programs offer transferrable knowledge, competencies, and practical training that allow students to enter the workforce as valuable assets.
- **2015 B.S. Industrial Technology Minor in Business Administration Degree Plan:**
  - New Course: TECH 2319 Programmable Logic Controllers? Industrial committee members praised the idea of adding the course to the curriculum.
  - Now require an existing course TECH 1303 Engineering Graphics as part of the degree plan as it had been several years prior.
Returned to Degree Plan: TECH 2311 Electronic and Fluid Systems and TECH 1320 Industrial Materials were reinstated last year.

- The department is always working on building working relationships with area colleges and industry leaders focused on ensuring their programs offer transferrable knowledge, competencies and practical training that allows students to enter the workforce as valuable assets. The Industrial Technology (Applied Engineering) Bachelor of Science brochure was distributed to board members for review.

VII. Discuss ATMAE Accreditation for the Graduate Program
- Dr. Miller noted that each program had to be accredited separately so the graduate program was seeking ATMAE accreditation for 2018 and required feedback regarding what competencies were necessary for the program’s majors.
- The ATMAE Accreditation is part of UT Tyler’s initiative to inspiring excellence following the spring 2012 ATMAE site visit.

VIII. Discuss Industrial Management graduate degree program changes-four certifications, research component. Distribute Brochures for Industrial Management graduate program.
- Dr. Miller noted that the Lean Six Sigma Black Belt (LSSBB) Certification for the graduate program was going well and was thought to help increase enrollment in the Industrial Management program. He noted that it was not meant to replace any existing LSSBB certification programs that may be offered companywide; however, it would save companies a lot of time training new hires and allow them to be more productive much sooner.
- The Supply Chain Management certification was just initiated this year and already had a dozen people enrolled. It was a culmination of efforts
- FANUC- Robotics Certification
  1. Robot safety & System components, Power up and jogging robots, Creating frames for programs and Creating and writing a program
     Motion instruction & copying and editing programs, and Program Instructions
     I/O programming instructions

IX. Review of Competencies for the Industrial Technology Program.
- Dr. Miller asked the industrial advisory board members to fill out a survey that rated competencies of the program with a Likert-type scale from 1-4 (with four being most important and a one not required). He noted that this was for ATMAE accreditation so it could show that the program was providing majors with the proper knowledge and skills that would make them competent at the jobs they were trying to obtain.

IX. Review of Competencies for the industrial Management.
- Another survey was distributed to rate the competencies of the graduate program, however, this was done by course because graduate students have a variety of courses to select from. Course descriptions were given under each course.

X. Announce enrollment changes and search status.
- In the 2012 Spring Semester the enrollment in the Industrial Technology program was 54 students and 26 for the graduate Industrial Management program. This 2014 Fall Semester the enrollment jumped to 103 in the Industrial Technology program and 98 in the Industrial Management program.
• Because of the large increases in enrollment and students who want to earn minors and certifications, the department asked for at least one new faculty member for the 2015 Fall Semester.

XI. Status on 2+2 articulation agreement and input from committee members
• The Industrial Technology program has 2+2 articulation agreements with Tyler Junior College, Texas State Technical College, Kilgore College, Trinity Valley Community College, and Panola. The addition of required lower division course work should help strengthen those ties.
• Mr. Tim Gill noted that they could reinstate their pre-Industrial Technology program to assist with the 2+2 program.
• Dr. Miller noted that they welcomed input regarding course work that was transferrable with the 2 year programs.

XII. Discuss Longview Center Affiliation
• The University of Texas at Tyler makes its outstanding academic programs conveniently available to the Longview area residents through the Longview University Center. Students experience cost-saving convenience, greater flexibility in scheduling their classes, and reduced travel expenses and commuting time to Tyler, all while receiving a degree from UT Tyler either Face to Face, Online, or through Hybrid Courses.
• The goal was to offer a standalone Industrial Technology program at Longview. The only way to do this was to require the lower division course work to be taken at Kilgore College – Longview or Kilgore College.
• UT Tyler wanted to partner with Kilgore to make it happen and most of the course work was available in the Industrial Maintenance Technology program.

XIII. Review and validate content for both program- surveys (rate and rank homework)
• Solicit advisory board member input to better prepare graduates to serve you. How well do think our program is working. Competency level of students entering the workforce and can they hit the ground running.
  Kenya Ray & Kelly Kaemmerling: Kilgore College:
  • They would like to see a Business Directed Curriculum that allows students to take lower level coursework, earn an Associate’s Degree, which would fulfill core and lower level course requirements for students seeking a B.S. in Industrial Technology.
  • At this point, the built-in certifications would be a major selling point.
  Dr. Lumpkin- CBT Dean UT Tyler responds and clarifies program intent.
  • Assured those representing learning institutions and local business of plans create a School of Technology at UT Tyler’s and later combines the Department of Computer Science.
  • The Productivity Center is UT Tyler and The East Texas Lean Consortium collaborative effort to offer the region with information, resources, and training. (Coordinating Student Internships and use of Ornelas Activity Centers)
  • He will make sure the board received pamphlets that reflect current and upcoming changes.
  Scott Riley: Brookshire’s
  • Approves of the Productivity Center it will provide an opportunity to join efforts.
  • Do course numbers correspond among colleges?
Tim Gill- Tyler Junior College
• Specific degrees (Electronic, HVAC.) do not transfer.
• Willing to revisit the possibility of transferring lower level Industrial Technology courses.
• Expressed a need to communicate in detail to students the benefits of our joined effort.

Wayne Dillon, TSTC
Interested in partnering with UT Tyler to make the FANUC Certification available to their students.

XIV. Plant tours sponsorship of student organizations, events internships, student.
• 6.3.10 Industrial Experience: Each program of study shall include appropriate industrial experiences such as industrial tours, work-study options/cooperative education, and/or senior seminars focusing on problem-solving activities related to industry. These experiences shall be designed to provide an understanding of the industrial environment and what industry expects of students upon employment.
  1. Student work and assignments that verify the inclusion of industrial experiences
  2. Students in the program have opportunities to attend field trips to local and regional business and manufacturing firms.

(Faculty, HRD and Technoly UT Tyler, 2012, p. 42)

XV. Future projects, and donations of used equipment, etc.
Texas Productivity Center
• The University of Texas at Tyler College of Business and Technology is actively engaged in community outreach to determine if a center dedicated to enhancing productivity in East Texas industry is needed.

UT Tyler has partnered with the East Texas Lean Consortium to test the prospect of developing a Texas Productivity Center that would serve the region with vital information and resources.

As part of the initiative, a Texas Productivity Summit and Training Sessions have been established to explore techniques for improving productivity.

Dr. Miller shared economic opportunity for business to offer students workers that meet acceptable criteria internships or work study opportunities. Benefits are twofold: reduced labor costs and the students gain valuable workplace skills. Dr. Lumpkin agreed with the benefits and will give the concept consideration.

XVI. Comments from the advisory board on agenda items, issues, etc.
Kelly Kaemmerling: Kilgore College Longview:
• They would like to see a business directed curriculum that allows students to take lower level coursework, earn an associate’s degree, which would fulfill core and lower level course requirements for students seeking a B.S. in Industrial Technology.
• Dr. Miller’s response, the problem is we are transferring too many unrelated classes and students that enter the program lack basic competencies.

Kenya Ray, Kilgore College
• At this point, the built-in certifications would be a major selling point.
• Increase technical skills levels by making courses hybrid with lecture and quizzes online and labs in class.
• It is difficult to push the idea of transferring to UT Tyler when graduates from Kilgore College’s Corrosion Technology program (1 of 2 Programs in the country) starting salaries average $65,000. Dr. Dominque Fazarro and Scott Riley agreed. Students want to finish school, get to work and pay off their student loans.

Dr. James Lumpkin- CBT Dean UT Tyler-responds and clarifies program intent.
• Assured those representing learning institutions and local business’ that there is now a School of Technology at UT Tyler which also includes the Department of Computer Science.
• The Texas Productivity Center at UT Tyler is official now that the President and Provost signed off on it the previous day.
• The CBT has experienced 26% growth.
• He will make sure the board received brochures and other promotional materials that reflect current and upcoming changes.

Scott Riley: Brookshire’s
• Approves of the Texas Productivity Center and that it will provide an opportunity to join efforts.
• Concerned those online courses fail in providing necessary technical skills; he can tell the difference via performance among students taking online classes and those who take face-to-face classes. Dr. Dominque Fazarro agreed and added that students miss networking and social opportunities.
• What is the percentage of international students enrolled because they increase global opportunities?
• Dr. Miller response, ¾ due to word of mouth.

Tim Gill, Tyler Junior College
• Specific degrees (Electronic, HVAC) do not fully transfer.
• Concerned that online classes do not offer practical skills.
• Willing to revisit the possibility of transferring lower level Industrial Technology courses.
• Expressed a need to communicate in detail to students the benefits of our joint effort.

Wayne Dillon, TSTC
• Interested in partnering with UT Tyler to make the FANUC Certification available to their students.

Dr. Dominck Fazarro.
• Supports the idea of students completing their first two years at TJC or Kilgore. Their associate’s degree should be transferable for those seeking a BS in Industrial Technology at UT Tyler.
• Internship availability is a problem if this is how students gain real life job skills because it is difficult to place 100-200 students.
• Dr. Miller’s response- lack of internship availability due to layoffs when the economy is slow, but enrollment is up because more people are laid off. Therefore, it is hard to place all the students in an internship so we cannot require it.

Lauren McGrew, Eastman
• Students are going to SFA or Baylor because they offer duel degrees and certifications.
In the hiring process, we look for buzzword that provides a hint on competency, not all training and education programs are created equal. After hire, recent graduates have no critical thinking or complex reasoning skills.

Online classes at UT Tyler are becoming too large. Is it possible to split classes between professors at Longview and Palestine campuses?

How do students demonstrate their skill set? We need individuals with an understanding of logistics. When asked about planning process or to make an immediate decision they are blindsides and we have not time train that skill.

Kenya Ray (no more than 35 students) and Wayne Dillon (no more than 15 students) agreed that it is difficult to control learning in large online classes. They keep classes small at their institutions and require hands on activities to ensure learning via projects that demonstrate technical and problem solving skills.

Dr. Miller’s response- we offer support staff at three campuses to support the 100 + B.S. Industrial Technology and 90+ Industrial Management students. We tweak our programs to suit area business needs and we offer four work ready certifications built into our MS Degree. We want companies to know our graduates need minimal training upon hire because UT Tyler means quality. Our Project Management certification is offered through PMI and requires students to pass their exam which costs about $250.

Dr. Heshium Lawrence - The addition of the new PMI certification program has attracted 5-6 new students already with no advertising and has increased the overall number of students enrolled in the course.

Dr. Dominique Fazarro - Wanted suggestions regarding courses listed on the given degree plan because they could be tweaked to better suit the needs at Eastman?

Dr. Heshium Lawrence response, courses on the Industrial Management MS degree plan for the Supply Chain Management certification are:

MANA 5305 Decision Making in Operations Management
TECH 5306 Advanced Logistics Management
TECH 5308 Strategic Sourcing
ACCT 5320 Accounting for Management Control

XVII. Discuss any new business

Dr. Dominick Fazarro

Invited the educators and business leaders to attend the 2015 ATMAE conference at Pittsburgh, PA. They can get a booth in efforts to expand national presence.

XVIII. Adjournment

Dr. Miller thanked everyone for their feedback and attendance, meeting adjourned
Dr. Miller brought the meeting to order at 11:50 am by welcoming everyone in attendance:
John Hood, Argon Medical Devices, Jacksonville, Texas
Don Gilbreath, V.P. of Transportation, Brookshire Grocery Company, Tyler, Texas;
Dane Clark, Cardinal Health, Jacksonville, Texas
Kelly Kaemmerling, Instructor, Kilgore College
Kenya Ray, Corrosion Technology Instructor, Kilgore College
Heshium Lawrence, Professor, UT Tyler;
Stephanie Long, Academic Advisor, UT Tyler;
Peggye Mahfood, Administrative Asst., UT Tyler

Dr. Miller passed out the minutes from the last meeting on April 2, 2012 for everyone to review. A unanimous vote was made to approve last year’s minutes and proceed.

Reviewed undergraduate degree program changes – B.S. in Industrial Technology

- Change to reflect emphasis in Surveying and Mapping on transcript.
  - The Texas Board of Professional Land Surveying requires two years of experience under a Registered Professional Land Surveyor (RPLS) or a B.S. degree in Surveying; or a degree that has an emphasis in surveying.
  - The Industrial Technology Program currently has a degree plan with this emphasis in surveying, but now it will be listed on the transcript as B.S. in Industrial Technology with an emphasis in Surveying and Mapping.
- Previously removed TECH courses added back into the program. Degree plan essentially remains the same.
  - TECH 1320 Industrial Materials and TECH 2311 Mechanical and Fluid Systems were removed as it was previously assumed that most transfer students had taken these course equivalents via various technical two year programs.
  - Consequently, it has come to light that most, if not all, have not taken such a course.
  - TECH 1320 will be a required course. It is a required course in most ATMAE accredited Industrial Technology programs.
    - Because of the requirement of this TECH course, the optional CBT course to complete the minimum Business Administration minor hours will no longer be optional.
    - An existing TECH course such as TECH 3355 Supply Chain Management will be used.
  - TECH 2311 Mechanical and Fluid Systems will replace one of the six general electives courses that are currently listed on the degree plan.
• Advisory board discussed the importance of these courses.
• These courses will be offered once every two years.
• Advisory council agreed to the importance of these courses and with this decision.

  o TECH 2311 Course Change
    • Was Mechanical and Fluid Systems
    • Will be Electrical and Fluid Systems
      ➢ The purpose of this change in some course content is to give Industrial Technology majors an overview of basic electrical systems along with fluid power systems.
    • Discussed the importance that an electricity course plays in almost every ATMAE program. Adding this aspect back into the program will give Industrial Technology majors a better fundamental knowledge of electrical systems.
    • It was decided that to best accommodate transfer students who already have these courses, TECH 1320 and 2311 will not be changed to upper level courses.

  o TECH 3304 Introduction to Nanotechnology Safety
    • New course
      ➢ Will provide students with cutting edge knowledge of nano-safety
      ➢ Will provide students an additional skill set that will make them more competitive in the 21st century global market
      ➢ Will expand students critical-thinking skills to problem-solve and apply new concepts for new complex technologies

  ❖ Reviewed graduate degree program changes
    o Industrial Management program and ATMAE accreditation
      • ATMAE requires at least two research courses that the current degree plan does not include
        ➢ ATMAE Accreditation Handbook standard 7.5 Program Structure and Sequencing for Master’s Degree
      • Industrial Management program changes
        ➢ Two technical courses will be replaced by these research courses and included in the twelve that students have to choose from.
        The two research courses that will be required are existing courses offered by the Department of HRD and Technology: TECH 5303 Research Techniques and TECH 5329 Trends in Industry
      • ATMAE requires two research projects be listed on the degree plan
        ➢ Can include a lean six sigma black belt project for continuous improvement that can be completed during: an Internship (TECH 5371) a formal course (TECH 5329)
      • Discussion of the above: Kelly Kaemmerling asked if students that have taken the above courses would be eligible to take the six sigma exam? Don
Gilbreath, Dane Clark, and John Hood expressed the need for a business course that addresses how to save money through accounting time analysis, perhaps a Cost Accounting course that would give students the tools to determine the cost of labor in the workplace.

- **Lean Six Sigma Black Belt Certificate**
  - The Industrial Management program currently offers five courses that give students the content needed for them to earn a six sigma black belt certificate. The faculty of the program would like to award certificates to students who successfully complete the five courses with a grade of B or better. In addition, students must pass the comprehensive exam on the content covered in all five courses to become Lean Six Sigma Black Belt certified.

- **FANUK Robotics Accreditation** – will be available to students through the program in TECH 4317 and TECH 5317.

Dr. Miller asked for final comments, then concluded the meeting at 1:20 pm.
APPENDIX I – PEER REVIEW OBSERVATION FORM

Peer Observation Processes
College of Business and Technology
University of Texas at Tyler

Statement of purpose of peer observation process:

The purpose of this policy is to honor the importance of teaching by providing a system for formative feedback designed to strengthen teaching in the College of Business and Technology at the University of Texas at Tyler. The university recognizes the essential contribution of its faculty members to the quality of students’ education and learning experiences and supports faculty development in all aspects of instruction. An effective tool for faculty development is formative peer observation of teaching, which involves a constructive and open review of teaching for the sole purpose of fostering improvement.

The goal of the peer observation process is to improve teaching and student learning and should serve as a tool for mentoring. The peer observation process should foster a culture of teaching excellence through collegial dialogue. Thus, the outcome of the faculty peer observation process should be a reflective summary written by the observed faculty member describing any steps taken or changes made towards the enhancement of teaching and improvement of student learning.

A. Frequency of Peer Observations:

For tenure track Assistant Professors, peer observations will be conducted every other year unless an unfavorable review determines the need for additional observations.

Tenured faculty will have a peer observation every three years. If a post-tenure review determines that a tenured faculty member needs to improve in the area of teaching, more frequent peer observations can be scheduled.

Beginning fall 2015 full-time lecturers, visiting faculty, and clinical faculty would be observed annually, and senior lecturers would be observed every three years.

The Associate Dean will develop and maintain a rotation schedule for observations.

B. Timeline for peer observation process:

Chairpersons should identify and notify each faculty member who will be observed by a peer at least two weeks prior to the beginning of that semester. The chairperson and faculty member should determine in which course the observation will occur and in which semester. A recommended timeline is provided below.

* In the event a faculty member is hired within one month of the beginning of a semester, their observation would be moved to the next semester to allow reasonable notification.

Section A of the Peer Observation Report will be provided to the department chair or unit head or equivalent (or to the dean in the event the faculty member being observed is the department chair) no later than the last day of classes for the semester in which the observation takes place. The department chair, unit head, or equivalent or dean will file the report with the Faculty Member’s record.

By October 1 each year, the unit responsible for peer observation of teaching will submit to the Provost’s office a list of faculty who were observed during the prior academic year.

**C. Process for identifying peer observers**

All full-time faculty in the College of Business and Technology may serve as Peer Observers. Faculty members will generally conduct no more than two peer observations in any academic year.

**D. Description of how detailed guidance and opportunity for training will be provided to observers:**

Before peer observations are conducted peer observers shall be provided detailed guidance and opportunities for training on effective observation procedures using observation instruments, pre- and post- observation conferencing, and on the preparation of summary statements based on observations.

**E. Assurance that observed faculty members will have a say in the selection of peer observers**

*Revised Sept 15, 2014*
Faculty members will submit three peer observers from a list of approved observers. The observer may come from any department within the College of Business and Technology, but must be at least at the same rank as the instructor.

F. Number of visits per observation

The number of observations is at the discretion of the faculty member and peer observer. A minimum of one visit is required.

G. Assurance that class visits will occur only after prior notification and discussion with the faculty member being observed:

Observations will be conducted in accordance with the table in section B. of this document.

H. In classes consisting of lecture and lab will both lecture and lab be observed?

In classes consisting of lecture and lab the number of observations is at the discretion of the faculty member and peer observer.

I. Description of content of peer observation report: (Refer to Appendix A for required content.)

i. Number and title of course observed

ii. Date of report

iii. Name and signature of observer

iv. Date of pre-observation meeting between observer and instructor, at which the syllabus and assignments are reviewed, special instructor concerns are addressed, and a mutually agreed class and date are specified

v. Date of classroom or online observation

vi. An instrument that reflects methods by which instructor engages students in active learning

vii. Date of post-observation meeting of observer with instructor, at which the observation was discussed

viii. Instructor’s signature affirming that the discussions took place and Sections B and C.

J. Attach observation instrument(s) that will be used by the unit.
Peer observation instrument is in Appendix B below.

Revised Sept 15, 2014
K. Description of requirements for pre- and post-observation meetings.

The purpose of the pre-observation meeting between the peer observer and instructor is to help the observer understand the context of the classroom, receive and review a copy of the syllabus and selected instructional materials, address special instructor concerns, and mutually agree on a class and date for the observation. The observation instrument will be reviewed and discussed as part of the pre-observation conference. For online courses the aforementioned information can be shared electronically through the use of appropriate technologies.

A post observation conference must take place soon after the observation. During the post-observation session the instructor will receive a Peer Observation Report prepared by the peer observer. The report will include observed strengths and suggested areas for improvement (Section B). Feedback should be constructive, specific, focused, action oriented, clear, honest and positively phrased. The instructor will prepare a summary statement on how he/she will use suggestions from the observation (Section C).

L. Statement regarding the confidential nature of the peer observation report and pre-and post-observation meetings.

The Peer Observation Report is considered “collegial communication” between observer and instructor. Section B of the Observation Report is considered to be confidential and will not be submitted to the department by the observer. It may be given to the department by the instructor.

Revised Sept 15, 2014
Appendix J – Safety Policy & Rules
TECHNOLOGY DEPARTMENT LABORATORY SAFETY POLICY

Due to the exposure to certain equipment and conditions that could cause severe injuries, students are required to follow these safety guidelines:

1. Wear safety glasses at all times.
2. Do **NOT** wear shorts, dresses, or cutoffs in the laboratory.
3. Wear only closed toed shoes (boots preferred) in the laboratory.
4. Do **NOT** wear sweaters or loose long sleeve shirts.
5. Ties should be tucked in or removed.
6. Long hair must be tied back or contained with a hair net.
7. Do **NOT** wear rings, watches, or loose fitting necklaces.
8. Keep hands off of rotating parts.
9. No running or horseplay allowed in the laboratory.
10. Make sure parts and tooling are secured before turning on the machine.
11. Be watchful of oils, spills, trip hazards, and other obstructions.
12. No food, drinks, or tobacco in the laboratory.
13. Never use a machine or tool that you are not familiar with.
14. Always ask an instructor for help if you do not understand how to properly operate a piece of equipment.
15. Clean your work area (floor, machine, table, etc.) at the end of every class period.
16. Do **NOT** leave class until the instructor has checked your area and tells you to leave.

LABORATORY SAFETY CONTRACT

I fully understand the laboratory safety policy of the Technology Department at The University of Texas at Tyler. I also understand that failure to abide by these rules will endanger me and others, therefore, giving the instructor the right to dismiss me from class. The instructor also has the right to permanently dismiss me from the laboratory if inappropriate behavior continues which will substantially reduce my grade. Moreover, I understand that I will **NOT** hold anyone associated with The University of Texas at Tyler liable for any accident that may happen to me. I fully understand that when I am unsure of the proper operation of a machine or hand tool that I will ask an instructor for assistance. Furthermore, I also understand that I do not have to use any piece of equipment or hand tool unless it is made safe for my use.

Machining Safety Rules

Department of Technology
The University of Texas at Tyler

General Safety Rules

1. Safety glasses, or appropriate goggles / face shields are required in the shop, when lab work has ___________.
2. ___________ must be worn in any shop area. No one wearing ___________ will be allowed to enter any shop area. The minimum footwear must cover the ___________.
3. Do not operate any item of equipment unless you are familiar with its ___________ and have been ___________ to operate it. If you have any questions regarding the use of equipment ask the ___________.
4. Never use ___________ guns to clean clothing, hair, or aim at another person.
5. In case of injury, no matter how slight, you must report it to the ___________.

General Safety Rules

6. Machines must be ___________ when cleaning, repairing, or oiling.
7. Do not wear _____, loose ___________, long ___________, jewelry, gloves, etc. around moving or rotating machinery.
8. Long hair must be ___________ or covered to keep it away from moving machinery.
9. Hand protection in the form of suitable gloves should be used only for handling _____ objects, glass or ___________ items.
10. Wear appropriate clothing for the job (i.e. do not wear short sleeve shirts or short pants when welding).
General Safety Rules

11. Never indulge in ____________ in the shop areas.
12. All machines must be operated with all required ____________ in place.
13. A ____________ should be used for removing chips, shavings, etc. from the work area. Never use your ____________.
14. Keep all ____________ parts clear of the point of operation of machines by using special tools or devices, such as, push sticks, hooks, pliers, etc. NEVER use a ____________ near moving machinery.
15. A ____________ hammer should not be used to strike a hardened tool or any machine part. Use a ____________ hammer.

General Safety Rules

16. Keep the floor around machines clean, dry and free from trip hazards. Do not allow chips to accumulate.
17. Think through the entire job before starting. Ask the ____________ if you are ever unsure for any reason.
18. Before starting a machine, always check it for correct ____________ and always check to see if machine is clear by operating it ____________, if possible.

General Safety Rules

19. Practice ____________ and ____________ in the shop areas. Never leave a ____________ piece of equipment.
20. Keep the ____________ around machines clean, dry and free from ____________ hazards. Do not allow chips to ____________.
21. Don’t ____________ or take chances. Don’t say you know how to do something, when you ____________. Obey all safety rules at ALL times.
General Safety Rules

- 22. Heavy sanding and painting should only be done in ________________ areas.
- 23. Follow all appropriate precautions when working with solvents, paints, adhesives or other chemicals. Use appropriate ________________ equipment.
- 24. Check the power cords and plugs on portable tools for ___________ before using them.
- 25. ___________ all posted signs, warnings, posters and special instructions.

MILLING MACHINE SAFETY

Milling Machine Safety

- 1. Work must be _____________ securely in a vise and vise clamped tightly to the table, or, work must be clamped securely to the table.
- 2. Make sure cutter is rotating in the proper ________________ before cutting material.
- 3. Before running a machine the spindle should be rotated by ___________ to make sure it is clear for cutting.
- 4. Make sure the power is _______ before changing cutters (use the emergency stop button).
Milling Machine Safety

5. Never run the machine ________ than the correct cutting speed.
6. Make sure that the machine is fully ________ before taking any _________________.
7. Always use cutters which are ________ and in good condition.
8. Don't place anything on the milling machine ________ such as wrenches, hammers, or tools.
9. Always stay at the machine while it is _________________.

10. Don't take too _____________ a cut or use too _____________ a feed.
11. _____________ the collet tightening wrench immediately after using it.
12. If at all feasible, add a _____________ to prevent chips from hitting other people.
13. Before cleaning the mill remove cutting tools from the spindle to avoid _____________ yourself.
14. Push in the ________________ when setting up the machine.
15. Clean the machine after use with a _____________ and properly dispose of chips.

LATHE SAFETY
Lathe Safety

1. Make sure that the chuck or faceplate is securely _______________ onto the lathe spindle.
2. Remove _______________ immediately after use.
3. When installing the chuck or faceplate do not use machine _______________.
4. Move the tool bit a _______________ from the collet or chuck when inserting or removing work.
5. Don’t run the machine faster than the proper _______________.
6. Always clamp the cutter so it protrudes a _______________ distance from the toolholder to prevent it from breaking or _______________.

Lathe Safety

7. Always make sure that the tool (insert) is sharp and has the _______________. Ask for assistance when making adjustments.
8. If work is turned between centers, make sure that proper adjustment is made between centers and that the tailstock is _______________ in place.
9. Do not grasp or touch chips or turnings with your _______________, use the brush on the tool tray.
10. Turn off the lathe before clearing chips and use a brush. Do NOT _______________ the chips because they will clog the _______________.

Lathe Safety

11. Turn chuck or faceplate through by ______ before turning on the power to be sure there is no binding or clearance problems.
12. Always _______________ the machine before taking measurements.
13. Before cleaning the lathe, remove tools and place them in their proper position on the _______________.
14. Keep tool tray drawer _______________ while machining so the chips don’t fall in it.
GENERAL LABORATORY SAFETY

TECH 3311
MANUFACTURING PROCESSES

GENERAL SAFETY

Permission: Always obtain permission from the instructor before using a machine.

Clothing: Avoid wearing loose clothing. Button or roll up sleeves. Remove or clasp ties securely.

Jewelry: Remove rings, bracelets, and necklaces.

Eye protection: Always wear safety glasses when in the laboratory or working and/or watching someone work with tools.

GENERAL SAFETY

Hand protection: Keep your hands away from moving parts of the machine. Use a brush to clean off workbenches or machines. Only wear gloves when handling rough lumber.

Safety guards: Check and adjust all guards before using a machine.

Adjustments: Make sure a machine is properly adjusted for your application before turning it on.
GENERAL SAFETY

Material inspection: Inspect materials before you process it. Remove tacks, nails, or anything else that might dull a blade.

Accessories: Select and install properly sharpened blades, bits or abrasive devices.

Shavings & sawdust: Remove wood scraps and sawdust before and after using a machine.

Starting: Allow a machine to come to maximum speed before starting a process.

GENERAL SAFETY

Stopping: Do not leave or adjust a machine until it has come to a complete stop.

Hair: All long hair must be tied back, so it will not get caught in rotating devices.

Lumber handling: Never carry long pieces of wood vertically (over 6'). It may hit fluorescent lights which contain toxic materials. One person should be on each end of a board over 6' long.

Tool handling: Always carry tools with their sharp points down.

GENERAL SAFETY

Vise: Never leave sharp tools or materials sticking out of a vise.

Tool use: Cut away from your body and towards the center of a workbench.

Cords: Make sure power cords to electric tools are pulled back away from the cutting edge. Do not let cords dangle.
